Excite Work Bench E

30 split-and-add adventures · Grade 2

Split numbers into smaller parts to help you add. Example: pulling 5 out of 37 gives 30 + 5 + 2. You may split any new part again. Keep every row ordered biggest to smallest.

Name: _____

Online, quiet grey sliders let you split either or both numbers. Tap one of five answers, then use Check my answers. On paper, write your chosen parts and circle your total.

1. Books for our library

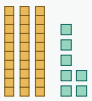

Excite Work Bench E

Our library has 37 books. We bring 16 more. How many books do we have now? Split either number to help you add. You can split both. Then circle your answer.

Ontario Math: B2.4 - Use sliders to decompose 37 and/or 16 into smaller whole-number parts without changing either value. Use the parts to solve 37 + 16.

37 + 16 = ?

Choose a part to pull out of either number. Write the new parts. You can split both numbers and split any part again. Empty boxes may stay empty.

37 

Pull out: _____

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

16 

Pull out: _____

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

Add your parts. Circle your answer:

( ) 52	( ) 53	( ) 54	( ) 63	( ) 43

[ ] I finished this question.

2. Stickers for the class

Excite Work Bench E

There are 24 star stickers and 18 animal stickers. How many stickers are there altogether? Split either number to help you add. You can split both. Then circle your answer.

Ontario Math: B2.4 - Use sliders to decompose 24 and/or 18 into smaller whole-number parts without changing either value. Use the parts to solve 24 + 18.

24 + 18 = ?

Choose a part to pull out of either number. Write the new parts. You can split both numbers and split any part again. Empty boxes may stay empty.

24 

Pull out: _____

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

18 

Pull out: _____

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

Add your parts. Circle your answer:

( ) 42	( ) 43	( ) 52	( ) 32	( ) 41

[ ] I finished this question.

3. Toy cars to put away

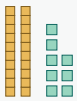

Excite Work Bench E

We have 28 toy cars on the mat and 15 in the box. How many toy cars do we have altogether? Split either number to help you add. You can split both. Then circle your answer.

Ontario Math: B2.4 - Use sliders to decompose 28 and/or 15 into smaller whole-number parts without changing either value. Use the parts to solve 28 + 15.

28 + 15 = ?

Choose a part to pull out of either number. Write the new parts. You can split both numbers and split any part again. Empty boxes may stay empty.

28 

Pull out: _____

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

15 

Pull out: _____

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

Add your parts. Circle your answer:

( ) 44	( ) 53	( ) 33	( ) 42	( ) 43

[ ] I finished this question.

4. Building with blocks

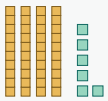

Excite Work Bench E

One tub has 46 blocks. Another tub has 27. How many blocks can we build with? Split either number to help you add. You can split both. Then circle your answer.

Ontario Math: B2.4 - Use sliders to decompose 46 and/or 27 into smaller whole-number parts without changing either value. Use the parts to solve 46 + 27.

46 + 27 = ?

Choose a part to pull out of either number. Write the new parts. You can split both numbers and split any part again. Empty boxes may stay empty.

46 

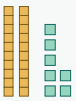

Pull out: _____

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

27 

Pull out: _____

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

Add your parts. Circle your answer:

( ) 83	( ) 63	( ) 72	( ) 73	( ) 74

[ ] I finished this question.

5. A collection of shells

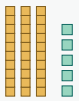

Excite Work Bench E

We find 35 shells on one walk and 29 on another. How many shells did we find? Split either number to help you add. You can split both. Then circle your answer.

Ontario Math: B2.4 - Use sliders to decompose 35 and/or 29 into smaller whole-number parts without changing either value. Use the parts to solve 35 + 29.

35 + 29 = ?

Choose a part to pull out of either number. Write the new parts. You can split both numbers and split any part again. Empty boxes may stay empty.

35 

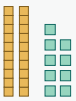

Pull out: _____

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

29 

Pull out: _____

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

Add your parts. Circle your answer:

( ) 54	( ) 63	( ) 64	( ) 65	( ) 74

[ ] I finished this question.

6. Cards for a game

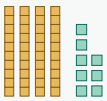

Excite Work Bench E

Our first pack has 48 cards. Our second pack has 16. How many cards do we have altogether? Split either number to help you add. You can split both. Then circle your answer.

Ontario Math: B2.4 - Use sliders to decompose 48 and/or 16 into smaller whole-number parts without changing either value. Use the parts to solve 48 + 16.

48 + 16 = ?

Choose a part to pull out of either number. Write the new parts. You can split both numbers and split any part again. Empty boxes may stay empty.

48 

Pull out: _____

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

16 

Pull out: _____

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

Add your parts. Circle your answer:

( ) 63	( ) 64	( ) 65	( ) 74	( ) 54

[ ] I finished this question.

7. Pencils for drawing

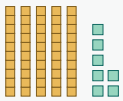

Excite Work Bench E

There are 57 pencils in one box and 24 in another. How many pencils are there altogether? Split either number to help you add. You can split both. Then circle your answer.

Ontario Math: B2.4 - Use sliders to decompose 57 and/or 24 into smaller whole-number parts without changing either value. Use the parts to solve 57 + 24.

57 + 24 = ?

Choose a part to pull out of either number. Write the new parts. You can split both numbers and split any part again. Empty boxes may stay empty.

57 

Pull out: _____

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

24 

Pull out: _____

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

Add your parts. Circle your answer:

( ) 81	( ) 82	( ) 91	( ) 71	( ) 80

[ ] I finished this question.

8. Tickets for our show

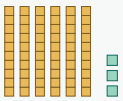

Excite Work Bench E

We give out 63 tickets in the morning and 18 later. How many tickets did we give out? Split either number to help you add. You can split both. Then circle your answer.

Ontario Math: B2.4 - Use sliders to decompose 63 and/or 18 into smaller whole-number parts without changing either value. Use the parts to solve 63 + 18.

63 + 18 = ?

Choose a part to pull out of either number. Write the new parts. You can split both numbers and split any part again. Empty boxes may stay empty.

63 

Pull out: _____

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

18 

Pull out: _____

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

Add your parts. Circle your answer:

( ) 82	( ) 91	( ) 71	( ) 80	( ) 81

[ ] I finished this question.

9. Pictures on the wall

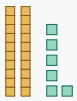

Excite Work Bench E

Our class makes 26 pictures. Another class makes 37. How many pictures can we put up? Split either number to help you add. You can split both. Then circle your answer.

Ontario Math: B2.4 - Use sliders to decompose 26 and/or 37 into smaller whole-number parts without changing either value. Use the parts to solve 26 + 37.

26 + 37 = ?

Choose a part to pull out of either number. Write the new parts. You can split both numbers and split any part again. Empty boxes may stay empty.

26 

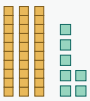

Pull out: _____

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

37 

Pull out: _____

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

Add your parts. Circle your answer:

( ) 73	( ) 53	( ) 62	( ) 63	( ) 64

[ ] I finished this question.

10. Planting a garden

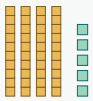

Excite Work Bench E

We plant 45 seeds in one bed and 28 in another. How many seeds did we plant? Split either number to help you add. You can split both. Then circle your answer.

Ontario Math: B2.4 - Use sliders to decompose 45 and/or 28 into smaller whole-number parts without changing either value. Use the parts to solve 45 + 28.

45 + 28 = ?

Choose a part to pull out of either number. Write the new parts. You can split both numbers and split any part again. Empty boxes may stay empty.

45 

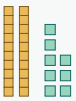

Pull out: _____

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

28 

Pull out: _____

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

Add your parts. Circle your answer:

( ) 63	( ) 72	( ) 73	( ) 74	( ) 83

[ ] I finished this question.

11. Books for our library

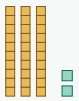

Excite Work Bench E

Our library has 32 books. We bring 19 more. How many books do we have now? Split either number to help you add. You can split both. Then circle your answer.

Ontario Math: B2.4 - Use sliders to decompose 32 and/or 19 into smaller whole-number parts without changing either value. Use the parts to solve 32 + 19.

32 + 19 = ?

Choose a part to pull out of either number. Write the new parts. You can split both numbers and split any part again. Empty boxes may stay empty.

32 

Pull out: _____

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

19 

Pull out: _____

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

Add your parts. Circle your answer:

( ) 50	( ) 51	( ) 52	( ) 61	( ) 41

[ ] I finished this question.

12. Stickers for the class

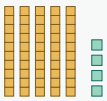

Excite Work Bench E

There are 54 star stickers and 17 animal stickers. How many stickers are there altogether? Split either number to help you add. You can split both. Then circle your answer.

Ontario Math: B2.4 - Use sliders to decompose 54 and/or 17 into smaller whole-number parts without changing either value. Use the parts to solve 54 + 17.

54 + 17 = ?

Choose a part to pull out of either number. Write the new parts. You can split both numbers and split any part again. Empty boxes may stay empty.

54 

Pull out: _____

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

17 

Pull out: _____

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

Add your parts. Circle your answer:

( ) 71	( ) 72	( ) 81	( ) 61	( ) 70

[ ] I finished this question.

13. Toy cars to put away

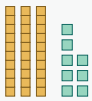

Excite Work Bench E

We have 38 toy cars on the mat and 25 in the box. How many toy cars do we have altogether? Split either number to help you add. You can split both. Then circle your answer.

Ontario Math: B2.4 - Use sliders to decompose 38 and/or 25 into smaller whole-number parts without changing either value. Use the parts to solve 38 + 25.

38 + 25 = ?

Choose a part to pull out of either number. Write the new parts. You can split both numbers and split any part again. Empty boxes may stay empty.

38 

Pull out: _____

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

25 

Pull out: _____

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

Add your parts. Circle your answer:

( ) 64	( ) 73	( ) 53	( ) 62	( ) 63

[ ] I finished this question.

14. Building with blocks

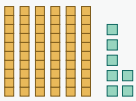

Excite Work Bench E

One tub has 67 blocks. Another tub has 14. How many blocks can we build with? Split either number to help you add. You can split both. Then circle your answer.

Ontario Math: B2.4 - Use sliders to decompose 67 and/or 14 into smaller whole-number parts without changing either value. Use the parts to solve 67 + 14.

67 + 14 = ?

Choose a part to pull out of either number. Write the new parts. You can split both numbers and split any part again. Empty boxes may stay empty.

67 

Pull out: _____

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

14 

Pull out: _____

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

Add your parts. Circle your answer:

( ) 91	( ) 71	( ) 80	( ) 81	( ) 82

[ ] I finished this question.

15. A collection of shells

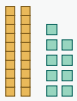

Excite Work Bench E

We find 29 shells on one walk and 36 on another. How many shells did we find? Split either number to help you add. You can split both. Then circle your answer.

Ontario Math: B2.4 - Use sliders to decompose 29 and/or 36 into smaller whole-number parts without changing either value. Use the parts to solve 29 + 36.

29 + 36 = ?

Choose a part to pull out of either number. Write the new parts. You can split both numbers and split any part again. Empty boxes may stay empty.

29 

Pull out: _____

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

36 

Pull out: _____

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

Add your parts. Circle your answer:

( ) 55	( ) 64	( ) 65	( ) 66	( ) 75

[ ] I finished this question.

16. Cards for a game

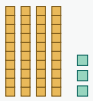

Excite Work Bench E

Our first pack has 43 cards. Our second pack has 28. How many cards do we have altogether? Split either number to help you add. You can split both. Then circle your answer.

Ontario Math: B2.4 - Use sliders to decompose 43 and/or 28 into smaller whole-number parts without changing either value. Use the parts to solve 43 + 28.

43 + 28 = ?

Choose a part to pull out of either number. Write the new parts. You can split both numbers and split any part again. Empty boxes may stay empty.

43 

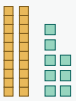

Pull out: _____

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

28 

Pull out: _____

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

Add your parts. Circle your answer:

( ) 70	( ) 71	( ) 72	( ) 81	( ) 61

[ ] I finished this question.

17. Pencils for drawing

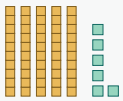

Excite Work Bench E

There are 56 pencils in one box and 19 in another. How many pencils are there altogether? Split either number to help you add. You can split both. Then circle your answer.

Ontario Math: B2.4 - Use sliders to decompose 56 and/or 19 into smaller whole-number parts without changing either value. Use the parts to solve 56 + 19.

56 + 19 = ?

Choose a part to pull out of either number. Write the new parts. You can split both numbers and split any part again. Empty boxes may stay empty.

56 

Pull out: _____

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

19 

Pull out: _____

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

Add your parts. Circle your answer:

( ) 75	( ) 76	( ) 85	( ) 65	( ) 74

[ ] I finished this question.

18. Tickets for our show

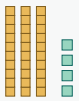

Excite Work Bench E

We give out 34 tickets in the morning and 47 later. How many tickets did we give out? Split either number to help you add. You can split both. Then circle your answer.

Ontario Math: B2.4 - Use sliders to decompose 34 and/or 47 into smaller whole-number parts without changing either value. Use the parts to solve 34 + 47.

34 + 47 = ?

Choose a part to pull out of either number. Write the new parts. You can split both numbers and split any part again. Empty boxes may stay empty.

34 

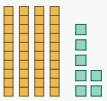

Pull out: _____

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

47 

Pull out: _____

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

Add your parts. Circle your answer:

( ) 82	( ) 91	( ) 71	( ) 80	( ) 81

[ ] I finished this question.

19. Pictures on the wall

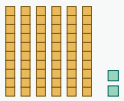

Excite Work Bench E

Our class makes 62 pictures. Another class makes 29. How many pictures can we put up? Split either number to help you add. You can split both. Then circle your answer.

Ontario Math: B2.4 - Use sliders to decompose 62 and/or 29 into smaller whole-number parts without changing either value. Use the parts to solve 62 + 29.

62 + 29 = ?

Choose a part to pull out of either number. Write the new parts. You can split both numbers and split any part again. Empty boxes may stay empty.

62 

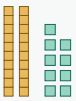

Pull out: _____

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

29 

Pull out: _____

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

Add your parts. Circle your answer:

( ) 92	( ) 71	( ) 81	( ) 90	( ) 91

[ ] I finished this question.

20. Planting a garden

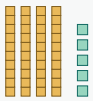

Excite Work Bench E

We plant 45 seeds in one bed and 37 in another. How many seeds did we plant? Split either number to help you add. You can split both. Then circle your answer.

Ontario Math: B2.4 - Use sliders to decompose 45 and/or 37 into smaller whole-number parts without changing either value. Use the parts to solve 45 + 37.

45 + 37 = ?

Choose a part to pull out of either number. Write the new parts. You can split both numbers and split any part again. Empty boxes may stay empty.

45 

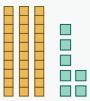

Pull out: _____

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

37 

Pull out: _____

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

Add your parts. Circle your answer:

( ) 72	( ) 81	( ) 82	( ) 83	( ) 92

[ ] I finished this question.

21. Books for our library

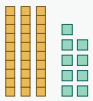

Excite Work Bench E

Our library has 39 books. We bring 28 more. How many books do we have now? Split either number to help you add. You can split both. Then circle your answer.

Ontario Math: B2.4 - Use sliders to decompose 39 and/or 28 into smaller whole-number parts without changing either value. Use the parts to solve 39 + 28.

39 + 28 = ?

Choose a part to pull out of either number. Write the new parts. You can split both numbers and split any part again. Empty boxes may stay empty.

39 

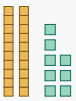

Pull out: _____

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

28 

Pull out: _____

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

Add your parts. Circle your answer:

( ) 66	( ) 67	( ) 68	( ) 77	( ) 57

[ ] I finished this question.

22. Stickers for the class

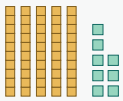

Excite Work Bench E

There are 58 star stickers and 26 animal stickers. How many stickers are there altogether? Split either number to help you add. You can split both. Then circle your answer.

Ontario Math: B2.4 - Use sliders to decompose 58 and/or 26 into smaller whole-number parts without changing either value. Use the parts to solve 58 + 26.

58 + 26 = ?

Choose a part to pull out of either number. Write the new parts. You can split both numbers and split any part again. Empty boxes may stay empty.

58 

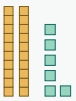

Pull out: _____

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

26 

Pull out: _____

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

Add your parts. Circle your answer:

( ) 84	( ) 85	( ) 94	( ) 74	( ) 83

[ ] I finished this question.

23. Toy cars to put away

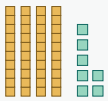

Excite Work Bench E

We have 47 toy cars on the mat and 35 in the box. How many toy cars do we have altogether? Split either number to help you add. You can split both. Then circle your answer.

Ontario Math: B2.4 - Use sliders to decompose 47 and/or 35 into smaller whole-number parts without changing either value. Use the parts to solve 47 + 35.

47 + 35 = ?

Choose a part to pull out of either number. Write the new parts. You can split both numbers and split any part again. Empty boxes may stay empty.

47 

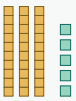

Pull out: _____

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

35 

Pull out: _____

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

Add your parts. Circle your answer:

( ) 83	( ) 92	( ) 72	( ) 81	( ) 82

[ ] I finished this question.

24. Building with blocks

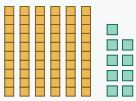

Excite Work Bench E

One tub has 69 blocks. Another tub has 17. How many blocks can we build with? Split either number to help you add. You can split both. Then circle your answer.

Ontario Math: B2.4 - Use sliders to decompose 69 and/or 17 into smaller whole-number parts without changing either value. Use the parts to solve 69 + 17.

69 + 17 = ?

Choose a part to pull out of either number. Write the new parts. You can split both numbers and split any part again. Empty boxes may stay empty.

69 

Pull out: _____

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

17 

Pull out: _____

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

Add your parts. Circle your answer:

( ) 96	( ) 76	( ) 85	( ) 86	( ) 87

[ ] I finished this question.

25. A collection of shells

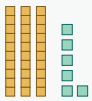

Excite Work Bench E

We find 36 shells on one walk and 48 on another. How many shells did we find? Split either number to help you add. You can split both. Then circle your answer.

Ontario Math: B2.4 - Use sliders to decompose 36 and/or 48 into smaller whole-number parts without changing either value. Use the parts to solve 36 + 48.

36 + 48 = ?

Choose a part to pull out of either number. Write the new parts. You can split both numbers and split any part again. Empty boxes may stay empty.

36 

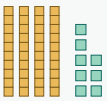

Pull out: _____

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

48 

Pull out: _____

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

Add your parts. Circle your answer:

( ) 74	( ) 83	( ) 84	( ) 85	( ) 94

[ ] I finished this question.

26. Cards for a game

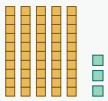

Excite Work Bench E

Our first pack has 53 cards. Our second pack has 29. How many cards do we have altogether? Split either number to help you add. You can split both. Then circle your answer.

Ontario Math: B2.4 - Use sliders to decompose 53 and/or 29 into smaller whole-number parts without changing either value. Use the parts to solve 53 + 29.

53 + 29 = ?

Choose a part to pull out of either number. Write the new parts. You can split both numbers and split any part again. Empty boxes may stay empty.

53 

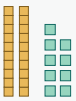

Pull out: _____

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

29 

Pull out: _____

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

Add your parts. Circle your answer:

( ) 81	( ) 82	( ) 83	( ) 92	( ) 72

[ ] I finished this question.

27. Pencils for drawing

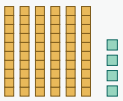

Excite Work Bench E

There are 64 pencils in one box and 27 in another. How many pencils are there altogether? Split either number to help you add. You can split both. Then circle your answer.

Ontario Math: B2.4 - Use sliders to decompose 64 and/or 27 into smaller whole-number parts without changing either value. Use the parts to solve 64 + 27.

64 + 27 = ?

Choose a part to pull out of either number. Write the new parts. You can split both numbers and split any part again. Empty boxes may stay empty.

64 

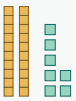

Pull out: _____

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

27 

Pull out: _____

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

Add your parts. Circle your answer:

( ) 90	( ) 91	( ) 92	( ) 71	( ) 81

[ ] I finished this question.

28. Tickets for our show

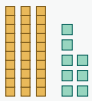

Excite Work Bench E

We give out 38 tickets in the morning and 49 later. How many tickets did we give out? Split either number to help you add. You can split both. Then circle your answer.

Ontario Math: B2.4 - Use sliders to decompose 38 and/or 49 into smaller whole-number parts without changing either value. Use the parts to solve 38 + 49.

38 + 49 = ?

Choose a part to pull out of either number. Write the new parts. You can split both numbers and split any part again. Empty boxes may stay empty.

38 

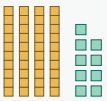

Pull out: _____

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

49 

Pull out: _____

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

Add your parts. Circle your answer:

( ) 88	( ) 97	( ) 77	( ) 86	( ) 87

[ ] I finished this question.

29. Pictures on the wall

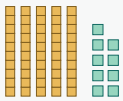

Excite Work Bench E

Our class makes 59 pictures. Another class makes 32. How many pictures can we put up? Split either number to help you add. You can split both. Then circle your answer.

Ontario Math: B2.4 - Use sliders to decompose 59 and/or 32 into smaller whole-number parts without changing either value. Use the parts to solve 59 + 32.

59 + 32 = ?

Choose a part to pull out of either number. Write the new parts. You can split both numbers and split any part again. Empty boxes may stay empty.

59 

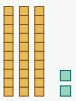

Pull out: _____

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

32 

Pull out: _____

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

Add your parts. Circle your answer:

( ) 92	( ) 71	( ) 81	( ) 90	( ) 91

[ ] I finished this question.

30. Planting a garden

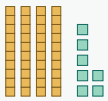

Excite Work Bench E

We plant 47 seeds in one bed and 53 in another. How many seeds did we plant? Split either number to help you add. You can split both. Then circle your answer.

Ontario Math: B2.4 - Use sliders to decompose 47 and/or 53 into smaller whole-number parts without changing either value. Use the parts to solve 47 + 53.

47 + 53 = ?

Choose a part to pull out of either number. Write the new parts. You can split both numbers and split any part again. Empty boxes may stay empty.

47 

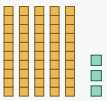

Pull out: _____

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

53 

Pull out: _____

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

Add your parts. Circle your answer:

( ) 80	( ) 90	( ) 98	( ) 99	( ) 100

[ ] I finished this question.

Excite Work Bench E · Answer guide

1. Books for our library

37 + 16 = 53. Accept any valid decomposition of either or both addends, including further splits. Every row stays ordered biggest to smallest. Parts for the first number must total 37; parts for the second must total 16. At least one number is split before choosing the sum.

B2.4: Use sliders to decompose 37 and/or 16 into smaller whole-number parts without changing either value. Use the parts to solve 37 + 16.

2. Stickers for the class

24 + 18 = 42. Accept any valid decomposition of either or both addends, including further splits. Every row stays ordered biggest to smallest. Parts for the first number must total 24; parts for the second must total 18. At least one number is split before choosing the sum.

B2.4: Use sliders to decompose 24 and/or 18 into smaller whole-number parts without changing either value. Use the parts to solve 24 + 18.

3. Toy cars to put away

28 + 15 = 43. Accept any valid decomposition of either or both addends, including further splits. Every row stays ordered biggest to smallest. Parts for the first number must total 28; parts for the second must total 15. At least one number is split before choosing the sum.

B2.4: Use sliders to decompose 28 and/or 15 into smaller whole-number parts without changing either value. Use the parts to solve 28 + 15.

4. Building with blocks

46 + 27 = 73. Accept any valid decomposition of either or both addends, including further splits. Every row stays ordered biggest to smallest. Parts for the first number must total 46; parts for the second must total 27. At least one number is split before choosing the sum.

B2.4: Use sliders to decompose 46 and/or 27 into smaller whole-number parts without changing either value. Use the parts to solve 46 + 27.

5. A collection of shells

35 + 29 = 64. Accept any valid decomposition of either or both addends, including further splits. Every row stays ordered biggest to smallest. Parts for the first number must total 35; parts for the second must total 29. At least one number is split before choosing the sum.

B2.4: Use sliders to decompose 35 and/or 29 into smaller whole-number parts without changing either value. Use the parts to solve 35 + 29.

6. Cards for a game

48 + 16 = 64. Accept any valid decomposition of either or both addends, including further splits. Every row stays ordered biggest to smallest. Parts for the first number must total 48; parts for the second must total 16. At least one number is split before choosing the sum.

B2.4: Use sliders to decompose 48 and/or 16 into smaller whole-number parts without changing either value. Use the parts to solve 48 + 16.

7. Pencils for drawing

57 + 24 = 81. Accept any valid decomposition of either or both addends, including further splits. Every row stays ordered biggest to smallest. Parts for the first number must total 57; parts for the second must total 24. At least one number is split before choosing the sum.

B2.4: Use sliders to decompose 57 and/or 24 into smaller whole-number parts without changing either value. Use the parts to solve 57 + 24.

8. Tickets for our show

63 + 18 = 81. Accept any valid decomposition of either or both addends, including further splits. Every row stays ordered biggest to smallest. Parts for the first number must total 63; parts for the second must total 18. At least one number is split before choosing the sum.

B2.4: Use sliders to decompose 63 and/or 18 into smaller whole-number parts without changing either value. Use the parts to solve 63 + 18.

9. Pictures on the wall

26 + 37 = 63. Accept any valid decomposition of either or both addends, including further splits. Every row stays ordered biggest to smallest. Parts for the first number must total 26; parts for the second must total 37. At least one number is split before choosing the sum.

B2.4: Use sliders to decompose 26 and/or 37 into smaller whole-number parts without changing either value. Use the parts to solve 26 + 37.

10. Planting a garden

45 + 28 = 73. Accept any valid decomposition of either or both addends, including further splits. Every row stays ordered biggest to smallest. Parts for the first number must total 45; parts for the second must total 28. At least one number is split before choosing the sum.

B2.4: Use sliders to decompose 45 and/or 28 into smaller whole-number parts without changing either value. Use the parts to solve 45 + 28.

11. Books for our library

32 + 19 = 51. Accept any valid decomposition of either or both addends, including further splits. Every row stays ordered biggest to smallest. Parts for the first number must total 32; parts for the second must total 19. At least one number is split before choosing the sum.

B2.4: Use sliders to decompose 32 and/or 19 into smaller whole-number parts without changing either value. Use the parts to solve 32 + 19.

12. Stickers for the class

54 + 17 = 71. Accept any valid decomposition of either or both addends, including further splits. Every row stays ordered biggest to smallest. Parts for the first number must total 54; parts for the second must total 17. At least one number is split before choosing the sum.

B2.4: Use sliders to decompose 54 and/or 17 into smaller whole-number parts without changing either value. Use the parts to solve 54 + 17.

13. Toy cars to put away

38 + 25 = 63. Accept any valid decomposition of either or both addends, including further splits. Every row stays ordered biggest to smallest. Parts for the first number must total 38; parts for the second must total 25. At least one number is split before choosing the sum.

B2.4: Use sliders to decompose 38 and/or 25 into smaller whole-number parts without changing either value. Use the parts to solve 38 + 25.

14. Building with blocks

67 + 14 = 81. Accept any valid decomposition of either or both addends, including further splits. Every row stays ordered biggest to smallest. Parts for the first number must total 67; parts for the second must total 14. At least one number is split before choosing the sum.

B2.4: Use sliders to decompose 67 and/or 14 into smaller whole-number parts without changing either value. Use the parts to solve 67 + 14.

15. A collection of shells

29 + 36 = 65. Accept any valid decomposition of either or both addends, including further splits. Every row stays ordered biggest to smallest. Parts for the first number must total 29; parts for the second must total 36. At least one number is split before choosing the sum.

B2.4: Use sliders to decompose 29 and/or 36 into smaller whole-number parts without changing either value. Use the parts to solve 29 + 36.

16. Cards for a game

43 + 28 = 71. Accept any valid decomposition of either or both addends, including further splits. Every row stays ordered biggest to smallest. Parts for the first number must total 43; parts for the second must total 28. At least one number is split before choosing the sum.

B2.4: Use sliders to decompose 43 and/or 28 into smaller whole-number parts without changing either value. Use the parts to solve 43 + 28.

17. Pencils for drawing

56 + 19 = 75. Accept any valid decomposition of either or both addends, including further splits. Every row stays ordered biggest to smallest. Parts for the first number must total 56; parts for the second must total 19. At least one number is split before choosing the sum.

B2.4: Use sliders to decompose 56 and/or 19 into smaller whole-number parts without changing either value. Use the parts to solve 56 + 19.

18. Tickets for our show

34 + 47 = 81. Accept any valid decomposition of either or both addends, including further splits. Every row stays ordered biggest to smallest. Parts for the first number must total 34; parts for the second must total 47. At least one number is split before choosing the sum.

B2.4: Use sliders to decompose 34 and/or 47 into smaller whole-number parts without changing either value. Use the parts to solve 34 + 47.

19. Pictures on the wall

62 + 29 = 91. Accept any valid decomposition of either or both addends, including further splits. Every row stays ordered biggest to smallest. Parts for the first number must total 62; parts for the second must total 29. At least one number is split before choosing the sum.

B2.4: Use sliders to decompose 62 and/or 29 into smaller whole-number parts without changing either value. Use the parts to solve 62 + 29.

20. Planting a garden

45 + 37 = 82. Accept any valid decomposition of either or both addends, including further splits. Every row stays ordered biggest to smallest. Parts for the first number must total 45; parts for the second must total 37. At least one number is split before choosing the sum.

B2.4: Use sliders to decompose 45 and/or 37 into smaller whole-number parts without changing either value. Use the parts to solve 45 + 37.

21. Books for our library

39 + 28 = 67. Accept any valid decomposition of either or both addends, including further splits. Every row stays ordered biggest to smallest. Parts for the first number must total 39; parts for the second must total 28. At least one number is split before choosing the sum.

B2.4: Use sliders to decompose 39 and/or 28 into smaller whole-number parts without changing either value. Use the parts to solve 39 + 28.

22. Stickers for the class

58 + 26 = 84. Accept any valid decomposition of either or both addends, including further splits. Every row stays ordered biggest to smallest. Parts for the first number must total 58; parts for the second must total 26. At least one number is split before choosing the sum.

B2.4: Use sliders to decompose 58 and/or 26 into smaller whole-number parts without changing either value. Use the parts to solve 58 + 26.

23. Toy cars to put away

47 + 35 = 82. Accept any valid decomposition of either or both addends, including further splits. Every row stays ordered biggest to smallest. Parts for the first number must total 47; parts for the second must total 35. At least one number is split before choosing the sum.

B2.4: Use sliders to decompose 47 and/or 35 into smaller whole-number parts without changing either value. Use the parts to solve 47 + 35.

24. Building with blocks

69 + 17 = 86. Accept any valid decomposition of either or both addends, including further splits. Every row stays ordered biggest to smallest. Parts for the first number must total 69; parts for the second must total 17. At least one number is split before choosing the sum.

B2.4: Use sliders to decompose 69 and/or 17 into smaller whole-number parts without changing either value. Use the parts to solve 69 + 17.

25. A collection of shells

36 + 48 = 84. Accept any valid decomposition of either or both addends, including further splits. Every row stays ordered biggest to smallest. Parts for the first number must total 36; parts for the second must total 48. At least one number is split before choosing the sum.

B2.4: Use sliders to decompose 36 and/or 48 into smaller whole-number parts without changing either value. Use the parts to solve 36 + 48.

26. Cards for a game

53 + 29 = 82. Accept any valid decomposition of either or both addends, including further splits. Every row stays ordered biggest to smallest. Parts for the first number must total 53; parts for the second must total 29. At least one number is split before choosing the sum.

B2.4: Use sliders to decompose 53 and/or 29 into smaller whole-number parts without changing either value. Use the parts to solve 53 + 29.

27. Pencils for drawing

64 + 27 = 91. Accept any valid decomposition of either or both addends, including further splits. Every row stays ordered biggest to smallest. Parts for the first number must total 64; parts for the second must total 27. At least one number is split before choosing the sum.

B2.4: Use sliders to decompose 64 and/or 27 into smaller whole-number parts without changing either value. Use the parts to solve 64 + 27.

28. Tickets for our show

38 + 49 = 87. Accept any valid decomposition of either or both addends, including further splits. Every row stays ordered biggest to smallest. Parts for the first number must total 38; parts for the second must total 49. At least one number is split before choosing the sum.

B2.4: Use sliders to decompose 38 and/or 49 into smaller whole-number parts without changing either value. Use the parts to solve 38 + 49.

29. Pictures on the wall

59 + 32 = 91. Accept any valid decomposition of either or both addends, including further splits. Every row stays ordered biggest to smallest. Parts for the first number must total 59; parts for the second must total 32. At least one number is split before choosing the sum.

B2.4: Use sliders to decompose 59 and/or 32 into smaller whole-number parts without changing either value. Use the parts to solve 59 + 32.

30. Planting a garden

47 + 53 = 100. Accept any valid decomposition of either or both addends, including further splits. Every row stays ordered biggest to smallest. Parts for the first number must total 47; parts for the second must total 53. At least one number is split before choosing the sum.

B2.4: Use sliders to decompose 47 and/or 53 into smaller whole-number parts without changing either value. Use the parts to solve 47 + 53.

Inspire Work Bench E

30 split-and-add adventures · Grade 3

Split numbers into smaller parts to help you add. Example: pulling 5 out of 37 gives 30 + 5 + 2. You may split any new part again. Keep every row ordered biggest to smallest.

Name: _____

Online, quiet grey sliders let you split either or both numbers. Tap one of five answers, then use Check my answers. On paper, write your chosen parts and circle your total.

1. Books for our library

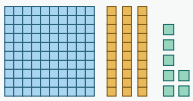

Inspire Work Bench E

Our library has 137 books. We bring 116 more. How many books do we have now? Split either number to help you add. You can split both. Then circle your answer.

Ontario Math: B2.5 - Use sliders to decompose 137 and/or 116 into smaller whole-number parts without changing either value. Use the parts to solve 137 + 116.

137 + 116 = ?

Choose a part to pull out of either number. Write the new parts. You can split both numbers and split any part again. Empty boxes may stay empty.

137 

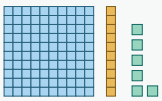

Pull out: _____

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

116 

Pull out: _____

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

Add your parts. Circle your answer:

( ) 252	( ) 253	( ) 254	( ) 263	( ) 243

[ ] I finished this question.

2. Stickers for the class

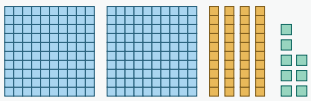

Inspire Work Bench E

There are 248 star stickers and 126 animal stickers. How many stickers are there altogether? Split either number to help you add. You can split both. Then circle your answer.

Ontario Math: B2.5 - Use sliders to decompose 248 and/or 126 into smaller whole-number parts without changing either value. Use the parts to solve 248 + 126.

248 + 126 = ?

Choose a part to pull out of either number. Write the new parts. You can split both numbers and split any part again. Empty boxes may stay empty.

248 

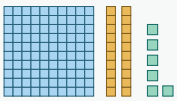

Pull out: _____

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

126 

Pull out: _____

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

Add your parts. Circle your answer:

( ) 374	( ) 375	( ) 384	( ) 364	( ) 373

[ ] I finished this question.

3. Toy cars to put away

Inspire Work Bench E

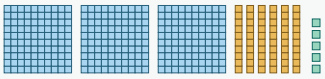

We have 365 toy cars on the mat and 217 in the box. How many toy cars do we have altogether? Split either number to help you add. You can split both. Then circle your answer.

Ontario Math: B2.5 - Use sliders to decompose 365 and/or 217 into smaller whole-number parts without changing either value. Use the parts to solve 365 + 217.

365 + 217 = ?

Choose a part to pull out of either number. Write the new parts. You can split both numbers and split any part again. Empty boxes may stay empty.

365

Pull out: _____

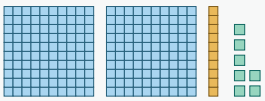

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

217

Pull out: _____

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

Add your parts. Circle your answer:

( ) 583	( ) 592	( ) 572	( ) 581	( ) 582

[ ] I finished this question.

4. Building with blocks

Inspire Work Bench E

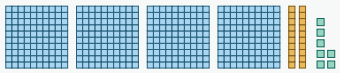

One tub has 427 blocks. Another tub has 158. How many blocks can we build with? Split either number to help you add. You can split both. Then circle your answer.

Ontario Math: B2.5 - Use sliders to decompose 427 and/or 158 into smaller whole-number parts without changing either value. Use the parts to solve 427 + 158.

427 + 158 = ?

Choose a part to pull out of either number. Write the new parts. You can split both numbers and split any part again. Empty boxes may stay empty.

427

Pull out: _____

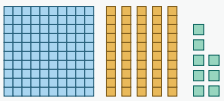

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

158

Pull out: _____

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

Add your parts. Circle your answer:

( ) 595	( ) 575	( ) 584	( ) 585	( ) 586

[ ] I finished this question.

5. A collection of shells

Inspire Work Bench E

We find 536 shells on one walk and 247 on another. How many shells did we find? Split either number to help you add. You can split both. Then circle your answer.

Ontario Math: B2.5 - Use sliders to decompose 536 and/or 247 into smaller whole-number parts without changing either value. Use the parts to solve 536 + 247.

536 + 247 = ?

Choose a part to pull out of either number. Write the new parts. You can split both numbers and split any part again. Empty boxes may stay empty.

536

Pull out: _____

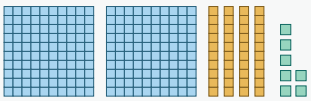

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

247

Pull out: _____

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

Add your parts. Circle your answer:

( ) 773	( ) 782	( ) 783	( ) 784	( ) 793

[ ] I finished this question.

6. Cards for a game

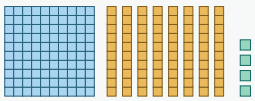

Inspire Work Bench E

Our first pack has 184 cards. Our second pack has 269. How many cards do we have altogether? Split either number to help you add. You can split both. Then circle your answer.

Ontario Math: B2.5 - Use sliders to decompose 184 and/or 269 into smaller whole-number parts without changing either value. Use the parts to solve 184 + 269.

184 + 269 = ?

Choose a part to pull out of either number. Write the new parts. You can split both numbers and split any part again. Empty boxes may stay empty.

184 

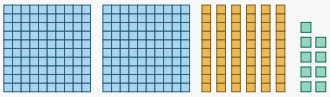

Pull out: _____

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

269 

Pull out: _____

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

Add your parts. Circle your answer:

( ) 452	( ) 453	( ) 454	( ) 463	( ) 443

[ ] I finished this question.

7. Pencils for drawing

Inspire Work Bench E

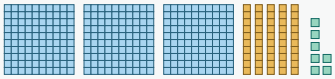

There are 357 pencils in one box and 286 in another. How many pencils are there altogether? Split either number to help you add. You can split both. Then circle your answer.

Ontario Math: B2.5 - Use sliders to decompose 357 and/or 286 into smaller whole-number parts without changing either value. Use the parts to solve 357 + 286.

357 + 286 = ?

Choose a part to pull out of either number. Write the new parts. You can split both numbers and split any part again. Empty boxes may stay empty.

357

Pull out: _____

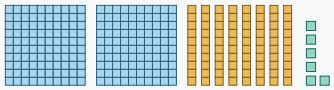

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

286

Pull out: _____

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

Add your parts. Circle your answer:

( ) 643	( ) 644	( ) 653	( ) 633	( ) 642

[ ] I finished this question.

8. Tickets for our show

Inspire Work Bench E

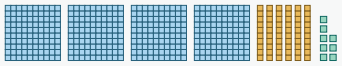

We give out 468 tickets in the morning and 175 later. How many tickets did we give out? Split either number to help you add. You can split both. Then circle your answer.

Ontario Math: B2.5 - Use sliders to decompose 468 and/or 175 into smaller whole-number parts without changing either value. Use the parts to solve 468 + 175.

468 + 175 = ?

Choose a part to pull out of either number. Write the new parts. You can split both numbers and split any part again. Empty boxes may stay empty.

468

Pull out: _____

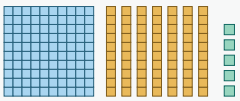

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

175

Pull out: _____

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

Add your parts. Circle your answer:

( ) 644	( ) 653	( ) 633	( ) 642	( ) 643

[ ] I finished this question.

9. Pictures on the wall

Inspire Work Bench E

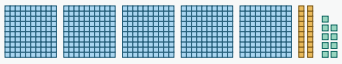

Our class makes 529 pictures. Another class makes 264. How many pictures can we put up? Split either number to help you add. You can split both. Then circle your answer.

Ontario Math: B2.5 - Use sliders to decompose 529 and/or 264 into smaller whole-number parts without changing either value. Use the parts to solve 529 + 264.

529 + 264 = ?

Choose a part to pull out of either number. Write the new parts. You can split both numbers and split any part again. Empty boxes may stay empty.

529

Pull out: _____

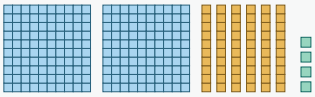

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

264

Pull out: _____

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

Add your parts. Circle your answer:

( ) 803	( ) 783	( ) 792	( ) 793	( ) 794

[ ] I finished this question.

10. Planting a garden

Inspire Work Bench E

We plant 637 seeds in one bed and 186 in another. How many seeds did we plant? Split either number to help you add. You can split both. Then circle your answer.

Ontario Math: B2.5 - Use sliders to decompose 637 and/or 186 into smaller whole-number parts without changing either value. Use the parts to solve 637 + 186.

637 + 186 = ?

Choose a part to pull out of either number. Write the new parts. You can split both numbers and split any part again. Empty boxes may stay empty.

637

Pull out: _____

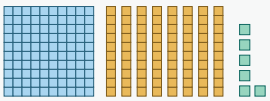

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

186

Pull out: _____

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

Add your parts. Circle your answer:

( ) 813	( ) 822	( ) 823	( ) 824	( ) 833

[ ] I finished this question.

11. Books for our library

Inspire Work Bench E

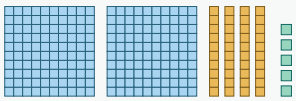

Our library has 245 books. We bring 378 more. How many books do we have now? Split either number to help you add. You can split both. Then circle your answer.

Ontario Math: B2.5 - Use sliders to decompose 245 and/or 378 into smaller whole-number parts without changing either value. Use the parts to solve 245 + 378.

245 + 378 = ?

Choose a part to pull out of either number. Write the new parts. You can split both numbers and split any part again. Empty boxes may stay empty.

245

Pull out: _____

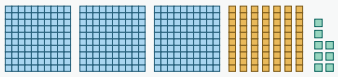

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

378

Pull out: _____

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

Add your parts. Circle your answer:

( ) 622	( ) 623	( ) 624	( ) 633	( ) 613

[ ] I finished this question.

12. Stickers for the class

Inspire Work Bench E

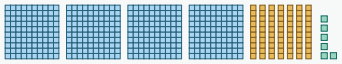

There are 476 star stickers and 257 animal stickers. How many stickers are there altogether? Split either number to help you add. You can split both. Then circle your answer.

Ontario Math: B2.5 - Use sliders to decompose 476 and/or 257 into smaller whole-number parts without changing either value. Use the parts to solve 476 + 257.

476 + 257 = ?

Choose a part to pull out of either number. Write the new parts. You can split both numbers and split any part again. Empty boxes may stay empty.

476

Pull out: _____

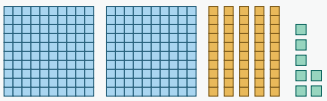

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

257

Pull out: _____

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

Add your parts. Circle your answer:

( ) 733	( ) 734	( ) 743	( ) 723	( ) 732

[ ] I finished this question.

13. Toy cars to put away

Inspire Work Bench E

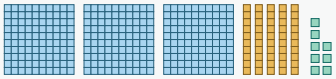

We have 358 toy cars on the mat and 469 in the box. How many toy cars do we have altogether? Split either number to help you add. You can split both. Then circle your answer.

Ontario Math: B2.5 - Use sliders to decompose 358 and/or 469 into smaller whole-number parts without changing either value. Use the parts to solve 358 + 469.

358 + 469 = ?

Choose a part to pull out of either number. Write the new parts. You can split both numbers and split any part again. Empty boxes may stay empty.

358

Pull out: _____

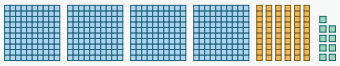

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

469

Pull out: _____

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

Add your parts. Circle your answer:

( ) 828	( ) 837	( ) 817	( ) 826	( ) 827

[ ] I finished this question.

14. Building with blocks

Inspire Work Bench E

One tub has 684 blocks. Another tub has 127. How many blocks can we build with? Split either number to help you add. You can split both. Then circle your answer.

Ontario Math: B2.5 - Use sliders to decompose 684 and/or 127 into smaller whole-number parts without changing either value. Use the parts to solve 684 + 127.

684 + 127 = ?

Choose a part to pull out of either number. Write the new parts. You can split both numbers and split any part again. Empty boxes may stay empty.

684

Pull out: _____

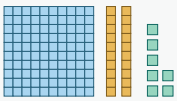

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

127

Pull out: _____

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

Add your parts. Circle your answer:

( ) 821	( ) 801	( ) 810	( ) 811	( ) 812

[ ] I finished this question.

15. A collection of shells

Inspire Work Bench E

We find 572 shells on one walk and 239 on another. How many shells did we find? Split either number to help you add. You can split both. Then circle your answer.

Ontario Math: B2.5 - Use sliders to decompose 572 and/or 239 into smaller whole-number parts without changing either value. Use the parts to solve 572 + 239.

572 + 239 = ?

Choose a part to pull out of either number. Write the new parts. You can split both numbers and split any part again. Empty boxes may stay empty.

572

Pull out: _____

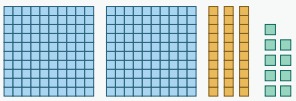

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

239

Pull out: _____

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

Add your parts. Circle your answer:

( ) 801	( ) 810	( ) 811	( ) 812	( ) 821

[ ] I finished this question.

16. Cards for a game

Inspire Work Bench E

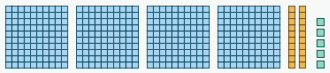

Our first pack has 425 cards. Our second pack has 386. How many cards do we have altogether? Split either number to help you add. You can split both. Then circle your answer.

Ontario Math: B2.5 - Use sliders to decompose 425 and/or 386 into smaller whole-number parts without changing either value. Use the parts to solve 425 + 386.

425 + 386 = ?

Choose a part to pull out of either number. Write the new parts. You can split both numbers and split any part again. Empty boxes may stay empty.

425

Pull out: _____

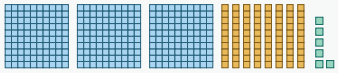

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

386

Pull out: _____

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

Add your parts. Circle your answer:

( ) 810	( ) 811	( ) 812	( ) 821	( ) 801

[ ] I finished this question.

17. Pencils for drawing

Inspire Work Bench E

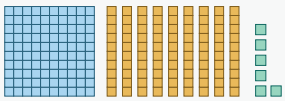

There are 196 pencils in one box and 587 in another. How many pencils are there altogether? Split either number to help you add. You can split both. Then circle your answer.

Ontario Math: B2.5 - Use sliders to decompose 196 and/or 587 into smaller whole-number parts without changing either value. Use the parts to solve 196 + 587.

196 + 587 = ?

Choose a part to pull out of either number. Write the new parts. You can split both numbers and split any part again. Empty boxes may stay empty.

196

Pull out: _____

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

587

Pull out: _____

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

Add your parts. Circle your answer:

( ) 783	( ) 784	( ) 793	( ) 773	( ) 782

[ ] I finished this question.

18. Tickets for our show

Inspire Work Bench E

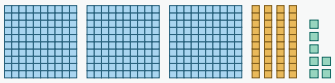

We give out 347 tickets in the morning and 468 later. How many tickets did we give out? Split either number to help you add. You can split both. Then circle your answer.

Ontario Math: B2.5 - Use sliders to decompose 347 and/or 468 into smaller whole-number parts without changing either value. Use the parts to solve 347 + 468.

347 + 468 = ?

Choose a part to pull out of either number. Write the new parts. You can split both numbers and split any part again. Empty boxes may stay empty.

347

Pull out: _____

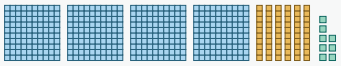

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

468

Pull out: _____

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

Add your parts. Circle your answer:

( ) 816	( ) 825	( ) 805	( ) 814	( ) 815

[ ] I finished this question.

19. Pictures on the wall

Inspire Work Bench E

Our class makes 658 pictures. Another class makes 179. How many pictures can we put up? Split either number to help you add. You can split both. Then circle your answer.

Ontario Math: B2.5 - Use sliders to decompose 658 and/or 179 into smaller whole-number parts without changing either value. Use the parts to solve 658 + 179.

658 + 179 = ?

Choose a part to pull out of either number. Write the new parts. You can split both numbers and split any part again. Empty boxes may stay empty.

658

Pull out: _____

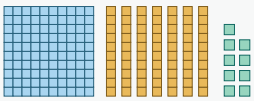

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

179

Pull out: _____

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

Add your parts. Circle your answer:

( ) 847	( ) 827	( ) 836	( ) 837	( ) 838

[ ] I finished this question.

20. Planting a garden

Inspire Work Bench E

We plant 764 seeds in one bed and 158 in another. How many seeds did we plant? Split either number to help you add. You can split both. Then circle your answer.

Ontario Math: B2.5 - Use sliders to decompose 764 and/or 158 into smaller whole-number parts without changing either value. Use the parts to solve 764 + 158.

764 + 158 = ?

Choose a part to pull out of either number. Write the new parts. You can split both numbers and split any part again. Empty boxes may stay empty.

764

Pull out: _____

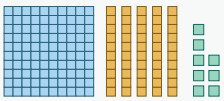

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

158

Pull out: _____

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

Add your parts. Circle your answer:

( ) 912	( ) 921	( ) 922	( ) 923	( ) 932

[ ] I finished this question.

21. Books for our library

Inspire Work Bench E

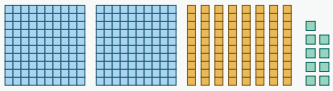

Our library has 289 books. We bring 476 more. How many books do we have now? Split either number to help you add. You can split both. Then circle your answer.

Ontario Math: B2.5 - Use sliders to decompose 289 and/or 476 into smaller whole-number parts without changing either value. Use the parts to solve 289 + 476.

289 + 476 = ?

Choose a part to pull out of either number. Write the new parts. You can split both numbers and split any part again. Empty boxes may stay empty.

289

Pull out: _____

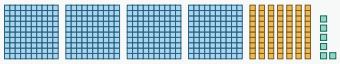

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

476

Pull out: _____

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

Add your parts. Circle your answer:

( ) 764	( ) 765	( ) 766	( ) 775	( ) 755

[ ] I finished this question.

22. Stickers for the class

Inspire Work Bench E

There are 537 star stickers and 286 animal stickers. How many stickers are there altogether? Split either number to help you add. You can split both. Then circle your answer.

Ontario Math: B2.5 - Use sliders to decompose 537 and/or 286 into smaller whole-number parts without changing either value. Use the parts to solve 537 + 286.

537 + 286 = ?

Choose a part to pull out of either number. Write the new parts. You can split both numbers and split any part again. Empty boxes may stay empty.

537

Pull out: _____

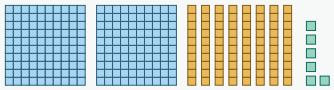

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

286

Pull out: _____

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

Add your parts. Circle your answer:

( ) 823	( ) 824	( ) 833	( ) 813	( ) 822

[ ] I finished this question.

23. Toy cars to put away

Inspire Work Bench E

We have 648 toy cars on the mat and 175 in the box. How many toy cars do we have altogether? Split either number to help you add. You can split both. Then circle your answer.

Ontario Math: B2.5 - Use sliders to decompose 648 and/or 175 into smaller whole-number parts without changing either value. Use the parts to solve 648 + 175.

648 + 175 = ?

Choose a part to pull out of either number. Write the new parts. You can split both numbers and split any part again. Empty boxes may stay empty.

648

Pull out: _____

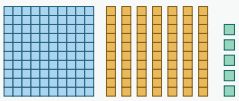

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

175

Pull out: _____

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

Add your parts. Circle your answer:

( ) 824	( ) 833	( ) 813	( ) 822	( ) 823

[ ] I finished this question.

24. Building with blocks

Inspire Work Bench E

One tub has 729 blocks. Another tub has 164. How many blocks can we build with? Split either number to help you add. You can split both. Then circle your answer.

Ontario Math: B2.5 - Use sliders to decompose 729 and/or 164 into smaller whole-number parts without changing either value. Use the parts to solve 729 + 164.

729 + 164 = ?

Choose a part to pull out of either number. Write the new parts. You can split both numbers and split any part again. Empty boxes may stay empty.

729

Pull out: _____

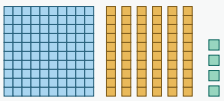

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

164

Pull out: _____

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

Add your parts. Circle your answer:

( ) 903	( ) 883	( ) 892	( ) 893	( ) 894

[ ] I finished this question.

25. A collection of shells

Inspire Work Bench E

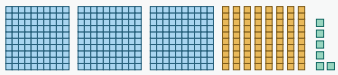

We find 386 shells on one walk and 497 on another. How many shells did we find? Split either number to help you add. You can split both. Then circle your answer.

Ontario Math: B2.5 - Use sliders to decompose 386 and/or 497 into smaller whole-number parts without changing either value. Use the parts to solve 386 + 497.

386 + 497 = ?

Choose a part to pull out of either number. Write the new parts. You can split both numbers and split any part again. Empty boxes may stay empty.

386

Pull out: _____

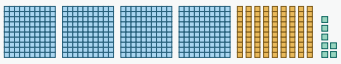

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

497

Pull out: _____

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

Add your parts. Circle your answer:

( ) 873	( ) 882	( ) 883	( ) 884	( ) 893

[ ] I finished this question.

26. Cards for a game

Inspire Work Bench E

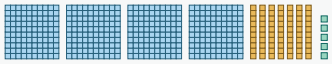

Our first pack has 475 cards. Our second pack has 386. How many cards do we have altogether? Split either number to help you add. You can split both. Then circle your answer.

Ontario Math: B2.5 - Use sliders to decompose 475 and/or 386 into smaller whole-number parts without changing either value. Use the parts to solve 475 + 386.

475 + 386 = ?

Choose a part to pull out of either number. Write the new parts. You can split both numbers and split any part again. Empty boxes may stay empty.

475

Pull out: _____

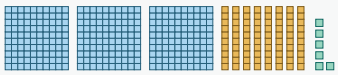

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

386

Pull out: _____

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

Add your parts. Circle your answer:

( ) 860	( ) 861	( ) 862	( ) 871	( ) 851

[ ] I finished this question.

27. Pencils for drawing

Inspire Work Bench E

There are 594 pencils in one box and 287 in another. How many pencils are there altogether? Split either number to help you add. You can split both. Then circle your answer.

Ontario Math: B2.5 - Use sliders to decompose 594 and/or 287 into smaller whole-number parts without changing either value. Use the parts to solve 594 + 287.

594 + 287 = ?

Choose a part to pull out of either number. Write the new parts. You can split both numbers and split any part again. Empty boxes may stay empty.

594

Pull out: _____

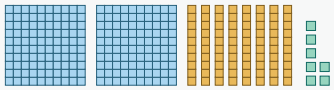

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

287

Pull out: _____

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

Add your parts. Circle your answer:

( ) 881	( ) 882	( ) 891	( ) 871	( ) 880

[ ] I finished this question.

28. Tickets for our show

Inspire Work Bench E

We give out 658 tickets in the morning and 269 later. How many tickets did we give out? Split either number to help you add. You can split both. Then circle your answer.

Ontario Math: B2.5 - Use sliders to decompose 658 and/or 269 into smaller whole-number parts without changing either value. Use the parts to solve 658 + 269.

658 + 269 = ?

Choose a part to pull out of either number. Write the new parts. You can split both numbers and split any part again. Empty boxes may stay empty.

658

Pull out: _____

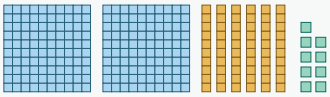

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

269

Pull out: _____

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

Add your parts. Circle your answer:

( ) 928	( ) 937	( ) 917	( ) 926	( ) 927

[ ] I finished this question.

29. Pictures on the wall

Inspire Work Bench E

Our class makes 746 pictures. Another class makes 187. How many pictures can we put up? Split either number to help you add. You can split both. Then circle your answer.

Ontario Math: B2.5 - Use sliders to decompose 746 and/or 187 into smaller whole-number parts without changing either value. Use the parts to solve 746 + 187.

746 + 187 = ?

Choose a part to pull out of either number. Write the new parts. You can split both numbers and split any part again. Empty boxes may stay empty.

746

Pull out: _____

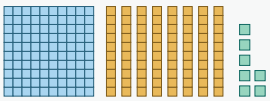

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

187

Pull out: _____

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

Add your parts. Circle your answer:

( ) 943	( ) 923	( ) 932	( ) 933	( ) 934

[ ] I finished this question.

30. Planting a garden

Inspire Work Bench E

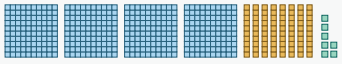

We plant 487 seeds in one bed and 513 in another. How many seeds did we plant? Split either number to help you add. You can split both. Then circle your answer.

Ontario Math: B2.5 - Use sliders to decompose 487 and/or 513 into smaller whole-number parts without changing either value. Use the parts to solve 487 + 513.

487 + 513 = ?

Choose a part to pull out of either number. Write the new parts. You can split both numbers and split any part again. Empty boxes may stay empty.

487

Pull out: _____

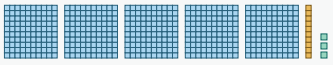

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

513

Pull out: _____

My parts (biggest to smallest):

[ ] + [ ] + [ ] + [ ]

Split a part again if it helps:

[ ] + [ ] + [ ] + [ ]

Add your parts. Circle your answer:

( ) 980	( ) 990	( ) 998	( ) 999	( ) 1000

[ ] I finished this question.

Inspire Work Bench E · Answer guide

1. Books for our library

137 + 116 = 253. Accept any valid decomposition of either or both addends, including further splits. Every row stays ordered biggest to smallest. Parts for the first number must total 137; parts for the second must total 116. At least one number is split before choosing the sum.

B2.5: Use sliders to decompose 137 and/or 116 into smaller whole-number parts without changing either value. Use the parts to solve 137 + 116.

2. Stickers for the class

248 + 126 = 374. Accept any valid decomposition of either or both addends, including further splits. Every row stays ordered biggest to smallest. Parts for the first number must total 248; parts for the second must total 126. At least one number is split before choosing the sum.

B2.5: Use sliders to decompose 248 and/or 126 into smaller whole-number parts without changing either value. Use the parts to solve 248 + 126.

3. Toy cars to put away

365 + 217 = 582. Accept any valid decomposition of either or both addends, including further splits. Every row stays ordered biggest to smallest. Parts for the first number must total 365; parts for the second must total 217. At least one number is split before choosing the sum.

B2.5: Use sliders to decompose 365 and/or 217 into smaller whole-number parts without changing either value. Use the parts to solve 365 + 217.

4. Building with blocks

427 + 158 = 585. Accept any valid decomposition of either or both addends, including further splits. Every row stays ordered biggest to smallest. Parts for the first number must total 427; parts for the second must total 158. At least one number is split before choosing the sum.

B2.5: Use sliders to decompose 427 and/or 158 into smaller whole-number parts without changing either value. Use the parts to solve 427 + 158.

5. A collection of shells

536 + 247 = 783. Accept any valid decomposition of either or both addends, including further splits. Every row stays ordered biggest to smallest. Parts for the first number must total 536; parts for the second must total 247. At least one number is split before choosing the sum.

B2.5: Use sliders to decompose 536 and/or 247 into smaller whole-number parts without changing either value. Use the parts to solve 536 + 247.

6. Cards for a game

184 + 269 = 453. Accept any valid decomposition of either or both addends, including further splits. Every row stays ordered biggest to smallest. Parts for the first number must total 184; parts for the second must total 269. At least one number is split before choosing the sum.

B2.5: Use sliders to decompose 184 and/or 269 into smaller whole-number parts without changing either value. Use the parts to solve 184 + 269.

7. Pencils for drawing

357 + 286 = 643. Accept any valid decomposition of either or both addends, including further splits. Every row stays ordered biggest to smallest. Parts for the first number must total 357; parts for the second must total 286. At least one number is split before choosing the sum.

B2.5: Use sliders to decompose 357 and/or 286 into smaller whole-number parts without changing either value. Use the parts to solve 357 + 286.

8. Tickets for our show

468 + 175 = 643. Accept any valid decomposition of either or both addends, including further splits. Every row stays ordered biggest to smallest. Parts for the first number must total 468; parts for the second must total 175. At least one number is split before choosing the sum.

B2.5: Use sliders to decompose 468 and/or 175 into smaller whole-number parts without changing either value. Use the parts to solve 468 + 175.

9. Pictures on the wall

529 + 264 = 793. Accept any valid decomposition of either or both addends, including further splits. Every row stays ordered biggest to smallest. Parts for the first number must total 529; parts for the second must total 264. At least one number is split before choosing the sum.

B2.5: Use sliders to decompose 529 and/or 264 into smaller whole-number parts without changing either value. Use the parts to solve 529 + 264.

10. Planting a garden

637 + 186 = 823. Accept any valid decomposition of either or both addends, including further splits. Every row stays ordered biggest to smallest. Parts for the first number must total 637; parts for the second must total 186. At least one number is split before choosing the sum.

B2.5: Use sliders to decompose 637 and/or 186 into smaller whole-number parts without changing either value. Use the parts to solve 637 + 186.

11. Books for our library

245 + 378 = 623. Accept any valid decomposition of either or both addends, including further splits. Every row stays ordered biggest to smallest. Parts for the first number must total 245; parts for the second must total 378. At least one number is split before choosing the sum.

B2.5: Use sliders to decompose 245 and/or 378 into smaller whole-number parts without changing either value. Use the parts to solve 245 + 378.

12. Stickers for the class

476 + 257 = 733. Accept any valid decomposition of either or both addends, including further splits. Every row stays ordered biggest to smallest. Parts for the first number must total 476; parts for the second must total 257. At least one number is split before choosing the sum.

B2.5: Use sliders to decompose 476 and/or 257 into smaller whole-number parts without changing either value. Use the parts to solve 476 + 257.

13. Toy cars to put away

358 + 469 = 827. Accept any valid decomposition of either or both addends, including further splits. Every row stays ordered biggest to smallest. Parts for the first number must total 358; parts for the second must total 469. At least one number is split before choosing the sum.

B2.5: Use sliders to decompose 358 and/or 469 into smaller whole-number parts without changing either value. Use the parts to solve 358 + 469.

14. Building with blocks

684 + 127 = 811. Accept any valid decomposition of either or both addends, including further splits. Every row stays ordered biggest to smallest. Parts for the first number must total 684; parts for the second must total 127. At least one number is split before choosing the sum.

B2.5: Use sliders to decompose 684 and/or 127 into smaller whole-number parts without changing either value. Use the parts to solve 684 + 127.

15. A collection of shells

572 + 239 = 811. Accept any valid decomposition of either or both addends, including further splits. Every row stays ordered biggest to smallest. Parts for the first number must total 572; parts for the second must total 239. At least one number is split before choosing the sum.

B2.5: Use sliders to decompose 572 and/or 239 into smaller whole-number parts without changing either value. Use the parts to solve 572 + 239.

16. Cards for a game

425 + 386 = 811. Accept any valid decomposition of either or both addends, including further splits. Every row stays ordered biggest to smallest. Parts for the first number must total 425; parts for the second must total 386. At least one number is split before choosing the sum.

B2.5: Use sliders to decompose 425 and/or 386 into smaller whole-number parts without changing either value. Use the parts to solve 425 + 386.

17. Pencils for drawing

196 + 587 = 783. Accept any valid decomposition of either or both addends, including further splits. Every row stays ordered biggest to smallest. Parts for the first number must total 196; parts for the second must total 587. At least one number is split before choosing the sum.

B2.5: Use sliders to decompose 196 and/or 587 into smaller whole-number parts without changing either value. Use the parts to solve 196 + 587.

18. Tickets for our show

347 + 468 = 815. Accept any valid decomposition of either or both addends, including further splits. Every row stays ordered biggest to smallest. Parts for the first number must total 347; parts for the second must total 468. At least one number is split before choosing the sum.

B2.5: Use sliders to decompose 347 and/or 468 into smaller whole-number parts without changing either value. Use the parts to solve 347 + 468.

19. Pictures on the wall

658 + 179 = 837. Accept any valid decomposition of either or both addends, including further splits. Every row stays ordered biggest to smallest. Parts for the first number must total 658; parts for the second must total 179. At least one number is split before choosing the sum.

B2.5: Use sliders to decompose 658 and/or 179 into smaller whole-number parts without changing either value. Use the parts to solve 658 + 179.

20. Planting a garden

764 + 158 = 922. Accept any valid decomposition of either or both addends, including further splits. Every row stays ordered biggest to smallest. Parts for the first number must total 764; parts for the second must total 158. At least one number is split before choosing the sum.

B2.5: Use sliders to decompose 764 and/or 158 into smaller whole-number parts without changing either value. Use the parts to solve 764 + 158.

21. Books for our library

289 + 476 = 765. Accept any valid decomposition of either or both addends, including further splits. Every row stays ordered biggest to smallest. Parts for the first number must total 289; parts for the second must total 476. At least one number is split before choosing the sum.

B2.5: Use sliders to decompose 289 and/or 476 into smaller whole-number parts without changing either value. Use the parts to solve 289 + 476.

22. Stickers for the class

537 + 286 = 823. Accept any valid decomposition of either or both addends, including further splits. Every row stays ordered biggest to smallest. Parts for the first number must total 537; parts for the second must total 286. At least one number is split before choosing the sum.

B2.5: Use sliders to decompose 537 and/or 286 into smaller whole-number parts without changing either value. Use the parts to solve 537 + 286.

23. Toy cars to put away

648 + 175 = 823. Accept any valid decomposition of either or both addends, including further splits. Every row stays ordered biggest to smallest. Parts for the first number must total 648; parts for the second must total 175. At least one number is split before choosing the sum.

B2.5: Use sliders to decompose 648 and/or 175 into smaller whole-number parts without changing either value. Use the parts to solve 648 + 175.

24. Building with blocks

729 + 164 = 893. Accept any valid decomposition of either or both addends, including further splits. Every row stays ordered biggest to smallest. Parts for the first number must total 729; parts for the second must total 164. At least one number is split before choosing the sum.

B2.5: Use sliders to decompose 729 and/or 164 into smaller whole-number parts without changing either value. Use the parts to solve 729 + 164.

25. A collection of shells

386 + 497 = 883. Accept any valid decomposition of either or both addends, including further splits. Every row stays ordered biggest to smallest. Parts for the first number must total 386; parts for the second must total 497. At least one number is split before choosing the sum.

B2.5: Use sliders to decompose 386 and/or 497 into smaller whole-number parts without changing either value. Use the parts to solve 386 + 497.

26. Cards for a game

475 + 386 = 861. Accept any valid decomposition of either or both addends, including further splits. Every row stays ordered biggest to smallest. Parts for the first number must total 475; parts for the second must total 386. At least one number is split before choosing the sum.

B2.5: Use sliders to decompose 475 and/or 386 into smaller whole-number parts without changing either value. Use the parts to solve 475 + 386.

27. Pencils for drawing

594 + 287 = 881. Accept any valid decomposition of either or both addends, including further splits. Every row stays ordered biggest to smallest. Parts for the first number must total 594; parts for the second must total 287. At least one number is split before choosing the sum.

B2.5: Use sliders to decompose 594 and/or 287 into smaller whole-number parts without changing either value. Use the parts to solve 594 + 287.

28. Tickets for our show

658 + 269 = 927. Accept any valid decomposition of either or both addends, including further splits. Every row stays ordered biggest to smallest. Parts for the first number must total 658; parts for the second must total 269. At least one number is split before choosing the sum.

B2.5: Use sliders to decompose 658 and/or 269 into smaller whole-number parts without changing either value. Use the parts to solve 658 + 269.

29. Pictures on the wall

746 + 187 = 933. Accept any valid decomposition of either or both addends, including further splits. Every row stays ordered biggest to smallest. Parts for the first number must total 746; parts for the second must total 187. At least one number is split before choosing the sum.

B2.5: Use sliders to decompose 746 and/or 187 into smaller whole-number parts without changing either value. Use the parts to solve 746 + 187.

30. Planting a garden

487 + 513 = 1000. Accept any valid decomposition of either or both addends, including further splits. Every row stays ordered biggest to smallest. Parts for the first number must total 487; parts for the second must total 513. At least one number is split before choosing the sum.

B2.5: Use sliders to decompose 487 and/or 513 into smaller whole-number parts without changing either value. Use the parts to solve 487 + 513.
