Excite Work Bench D

30 fair-sharing adventures · Grade 2

Look, share and count! Give everyone the same number of whole pencils. Put any leftovers on the pad. A grown-up can read with you.

Name: _____

Online, choose your pencils and children. Use the three dropdowns under each child to share in turns. Move leftover pencils to the Can't share equally pad. Check my answers looks at every child's total and the pad. Can every child get one more pencil? If so, keep sharing.

1. A fair share of pencils

Excite Work Bench D

Excite Work Bench D · Answer guide

1. A fair share of pencils

Choose 12 pencils and 3 children. Each child gets 4; 0 pencils go on the Can't share equally pad. The three sharing turns may be split in different ways; each child's total must be 4. Check: 3 x 4 + 0 = 12. The pad must hold fewer than 3 pencils, so no further whole-pencil sharing round is possible.

B2.6: Use the picture model to share 12 whole pencils as equally as possible among 3 children. Count each child's share and identify any pencils left over.

2. A fair share of pencils

Choose 6 pencils and 2 children. Each child gets 3; 0 pencils go on the Can't share equally pad. The three sharing turns may be split in different ways; each child's total must be 3. Check: 2 x 3 + 0 = 6. The pad must hold fewer than 2 pencils, so no further whole-pencil sharing round is possible.

B2.6: Use the picture model to share 6 whole pencils as equally as possible among 2 children. Count each child's share and identify any pencils left over.

3. A fair share of pencils

Choose 8 pencils and 4 children. Each child gets 2; 0 pencils go on the Can't share equally pad. The three sharing turns may be split in different ways; each child's total must be 2. Check: 4 x 2 + 0 = 8. The pad must hold fewer than 4 pencils, so no further whole-pencil sharing round is possible.

B2.6: Use the picture model to share 8 whole pencils as equally as possible among 4 children. Count each child's share and identify any pencils left over.

4. A fair share of pencils

Choose 10 pencils and 5 children. Each child gets 2; 0 pencils go on the Can't share equally pad. The three sharing turns may be split in different ways; each child's total must be 2. Check: 5 x 2 + 0 = 10. The pad must hold fewer than 5 pencils, so no further whole-pencil sharing round is possible.

B2.6: Use the picture model to share 10 whole pencils as equally as possible among 5 children. Count each child's share and identify any pencils left over.

5. A fair share of pencils

Choose 9 pencils and 3 children. Each child gets 3; 0 pencils go on the Can't share equally pad. The three sharing turns may be split in different ways; each child's total must be 3. Check: 3 x 3 + 0 = 9. The pad must hold fewer than 3 pencils, so no further whole-pencil sharing round is possible.

B2.6: Use the picture model to share 9 whole pencils as equally as possible among 3 children. Count each child's share and identify any pencils left over.

6. A fair share of pencils

Choose 12 pencils and 4 children. Each child gets 3; 0 pencils go on the Can't share equally pad. The three sharing turns may be split in different ways; each child's total must be 3. Check: 4 x 3 + 0 = 12. The pad must hold fewer than 4 pencils, so no further whole-pencil sharing round is possible.

B2.6: Use the picture model to share 12 whole pencils as equally as possible among 4 children. Count each child's share and identify any pencils left over.

7. A fair share of pencils

Choose 4 pencils and 2 children. Each child gets 2; 0 pencils go on the Can't share equally pad. The three sharing turns may be split in different ways; each child's total must be 2. Check: 2 x 2 + 0 = 4. The pad must hold fewer than 2 pencils, so no further whole-pencil sharing round is possible.

B2.6: Use the picture model to share 4 whole pencils as equally as possible among 2 children. Count each child's share and identify any pencils left over.

8. A fair share of pencils

Choose 8 pencils and 2 children. Each child gets 4; 0 pencils go on the Can't share equally pad. The three sharing turns may be split in different ways; each child's total must be 4. Check: 2 x 4 + 0 = 8. The pad must hold fewer than 2 pencils, so no further whole-pencil sharing round is possible.

B2.6: Use the picture model to share 8 whole pencils as equally as possible among 2 children. Count each child's share and identify any pencils left over.

9. A fair share of pencils

Choose 12 pencils and 6 children. Each child gets 2; 0 pencils go on the Can't share equally pad. The three sharing turns may be split in different ways; each child's total must be 2. Check: 6 x 2 + 0 = 12. The pad must hold fewer than 6 pencils, so no further whole-pencil sharing round is possible.

B2.6: Use the picture model to share 12 whole pencils as equally as possible among 6 children. Count each child's share and identify any pencils left over.

10. A fair share of pencils

Choose 6 pencils and 3 children. Each child gets 2; 0 pencils go on the Can't share equally pad. The three sharing turns may be split in different ways; each child's total must be 2. Check: 3 x 2 + 0 = 6. The pad must hold fewer than 3 pencils, so no further whole-pencil sharing round is possible.

B2.6: Use the picture model to share 6 whole pencils as equally as possible among 3 children. Count each child's share and identify any pencils left over.

11. A fair share of pencils

Choose 10 pencils and 2 children. Each child gets 5; 0 pencils go on the Can't share equally pad. The three sharing turns may be split in different ways; each child's total must be 5. Check: 2 x 5 + 0 = 10. The pad must hold fewer than 2 pencils, so no further whole-pencil sharing round is possible.

B2.6: Use the picture model to share 10 whole pencils as equally as possible among 2 children. Count each child's share and identify any pencils left over.

12. A fair share of pencils

Choose 12 pencils and 2 children. Each child gets 6; 0 pencils go on the Can't share equally pad. The three sharing turns may be split in different ways; each child's total must be 6. Check: 2 x 6 + 0 = 12. The pad must hold fewer than 2 pencils, so no further whole-pencil sharing round is possible.

B2.6: Use the picture model to share 12 whole pencils as equally as possible among 2 children. Count each child's share and identify any pencils left over.

13. A fair share of pencils

Choose 6 pencils and 6 children. Each child gets 1; 0 pencils go on the Can't share equally pad. The three sharing turns may be split in different ways; each child's total must be 1. Check: 6 x 1 + 0 = 6. The pad must hold fewer than 6 pencils, so no further whole-pencil sharing round is possible.

B2.6: Use the picture model to share 6 whole pencils as equally as possible among 6 children. Count each child's share and identify any pencils left over.

14. A fair share of pencils

Choose 4 pencils and 4 children. Each child gets 1; 0 pencils go on the Can't share equally pad. The three sharing turns may be split in different ways; each child's total must be 1. Check: 4 x 1 + 0 = 4. The pad must hold fewer than 4 pencils, so no further whole-pencil sharing round is possible.

B2.6: Use the picture model to share 4 whole pencils as equally as possible among 4 children. Count each child's share and identify any pencils left over.

15. A fair share of pencils

Choose 8 pencils and 4 children. Each child gets 2; 0 pencils go on the Can't share equally pad. The three sharing turns may be split in different ways; each child's total must be 2. Check: 4 x 2 + 0 = 8. The pad must hold fewer than 4 pencils, so no further whole-pencil sharing round is possible.

B2.6: Use the picture model to share 8 whole pencils as equally as possible among 4 children. Count each child's share and identify any pencils left over.

16. A fair share of pencils

Choose 10 pencils and 5 children. Each child gets 2; 0 pencils go on the Can't share equally pad. The three sharing turns may be split in different ways; each child's total must be 2. Check: 5 x 2 + 0 = 10. The pad must hold fewer than 5 pencils, so no further whole-pencil sharing round is possible.

B2.6: Use the picture model to share 10 whole pencils as equally as possible among 5 children. Count each child's share and identify any pencils left over.

17. A fair share of pencils

Choose 12 pencils and 6 children. Each child gets 2; 0 pencils go on the Can't share equally pad. The three sharing turns may be split in different ways; each child's total must be 2. Check: 6 x 2 + 0 = 12. The pad must hold fewer than 6 pencils, so no further whole-pencil sharing round is possible.

B2.6: Use the picture model to share 12 whole pencils as equally as possible among 6 children. Count each child's share and identify any pencils left over.

18. A fair share of pencils

Choose 3 pencils and 3 children. Each child gets 1; 0 pencils go on the Can't share equally pad. The three sharing turns may be split in different ways; each child's total must be 1. Check: 3 x 1 + 0 = 3. The pad must hold fewer than 3 pencils, so no further whole-pencil sharing round is possible.

B2.6: Use the picture model to share 3 whole pencils as equally as possible among 3 children. Count each child's share and identify any pencils left over.

19. A fair share of pencils

Choose 9 pencils and 3 children. Each child gets 3; 0 pencils go on the Can't share equally pad. The three sharing turns may be split in different ways; each child's total must be 3. Check: 3 x 3 + 0 = 9. The pad must hold fewer than 3 pencils, so no further whole-pencil sharing round is possible.

B2.6: Use the picture model to share 9 whole pencils as equally as possible among 3 children. Count each child's share and identify any pencils left over.

20. A fair share of pencils

Choose 5 pencils and 5 children. Each child gets 1; 0 pencils go on the Can't share equally pad. The three sharing turns may be split in different ways; each child's total must be 1. Check: 5 x 1 + 0 = 5. The pad must hold fewer than 5 pencils, so no further whole-pencil sharing round is possible.

B2.6: Use the picture model to share 5 whole pencils as equally as possible among 5 children. Count each child's share and identify any pencils left over.

21. A fair share of pencils

Choose 7 pencils and 2 children. Each child gets 3; 1 pencils go on the Can't share equally pad. The three sharing turns may be split in different ways; each child's total must be 3. Check: 2 x 3 + 1 = 7. The pad must hold fewer than 2 pencils, so no further whole-pencil sharing round is possible.

B2.6: Use the picture model to share 7 whole pencils as equally as possible among 2 children. Count each child's share and identify any pencils left over.

22. A fair share of pencils

Choose 9 pencils and 4 children. Each child gets 2; 1 pencils go on the Can't share equally pad. The three sharing turns may be split in different ways; each child's total must be 2. Check: 4 x 2 + 1 = 9. The pad must hold fewer than 4 pencils, so no further whole-pencil sharing round is possible.

B2.6: Use the picture model to share 9 whole pencils as equally as possible among 4 children. Count each child's share and identify any pencils left over.

23. A fair share of pencils

Choose 11 pencils and 3 children. Each child gets 3; 2 pencils go on the Can't share equally pad. The three sharing turns may be split in different ways; each child's total must be 3. Check: 3 x 3 + 2 = 11. The pad must hold fewer than 3 pencils, so no further whole-pencil sharing round is possible.

B2.6: Use the picture model to share 11 whole pencils as equally as possible among 3 children. Count each child's share and identify any pencils left over.

24. A fair share of pencils

Choose 8 pencils and 3 children. Each child gets 2; 2 pencils go on the Can't share equally pad. The three sharing turns may be split in different ways; each child's total must be 2. Check: 3 x 2 + 2 = 8. The pad must hold fewer than 3 pencils, so no further whole-pencil sharing round is possible.

B2.6: Use the picture model to share 8 whole pencils as equally as possible among 3 children. Count each child's share and identify any pencils left over.

25. A fair share of pencils

Choose 11 pencils and 5 children. Each child gets 2; 1 pencils go on the Can't share equally pad. The three sharing turns may be split in different ways; each child's total must be 2. Check: 5 x 2 + 1 = 11. The pad must hold fewer than 5 pencils, so no further whole-pencil sharing round is possible.

B2.6: Use the picture model to share 11 whole pencils as equally as possible among 5 children. Count each child's share and identify any pencils left over.

26. A fair share of pencils

Choose 10 pencils and 3 children. Each child gets 3; 1 pencils go on the Can't share equally pad. The three sharing turns may be split in different ways; each child's total must be 3. Check: 3 x 3 + 1 = 10. The pad must hold fewer than 3 pencils, so no further whole-pencil sharing round is possible.

B2.6: Use the picture model to share 10 whole pencils as equally as possible among 3 children. Count each child's share and identify any pencils left over.

27. A fair share of pencils

Choose 11 pencils and 4 children. Each child gets 2; 3 pencils go on the Can't share equally pad. The three sharing turns may be split in different ways; each child's total must be 2. Check: 4 x 2 + 3 = 11. The pad must hold fewer than 4 pencils, so no further whole-pencil sharing round is possible.

B2.6: Use the picture model to share 11 whole pencils as equally as possible among 4 children. Count each child's share and identify any pencils left over.

28. A fair share of pencils

Choose 9 pencils and 2 children. Each child gets 4; 1 pencils go on the Can't share equally pad. The three sharing turns may be split in different ways; each child's total must be 4. Check: 2 x 4 + 1 = 9. The pad must hold fewer than 2 pencils, so no further whole-pencil sharing round is possible.

B2.6: Use the picture model to share 9 whole pencils as equally as possible among 2 children. Count each child's share and identify any pencils left over.

29. A fair share of pencils

Choose 7 pencils and 3 children. Each child gets 2; 1 pencils go on the Can't share equally pad. The three sharing turns may be split in different ways; each child's total must be 2. Check: 3 x 2 + 1 = 7. The pad must hold fewer than 3 pencils, so no further whole-pencil sharing round is possible.

B2.6: Use the picture model to share 7 whole pencils as equally as possible among 3 children. Count each child's share and identify any pencils left over.

30. A fair share of pencils

Choose 12 pencils and 5 children. Each child gets 2; 2 pencils go on the Can't share equally pad. The three sharing turns may be split in different ways; each child's total must be 2. Check: 5 x 2 + 2 = 12. The pad must hold fewer than 5 pencils, so no further whole-pencil sharing round is possible.

B2.6: Use the picture model to share 12 whole pencils as equally as possible among 5 children. Count each child's share and identify any pencils left over.

28. A fair share of pencils

Inspire Work Bench D

4 children want to sketch animals. They have 29 whole pencils to share. Give each child as many as you can, with the same number for everyone. Put any leftovers on the "Can't share equally" pad.

Ontario Math: B2.6 - Use the picture model to share 29 whole pencils as equally as possible among 4 children. Count each child's share and identify any pencils left over.

Pencils: _____ Children: _____

Write how many you give each turn. Add each child's turns. Put any whole pencils left over on the pad.

Pencils to share

Child 1	Child 2	Child 3	Child 4
Turn 1 ☐	Turn 1 ☐	Turn 1 ☐	Turn 1 ☐
Turn 2 ☐	Turn 2 ☐	Turn 2 ☐	Turn 2 ☐
Turn 3 ☐	Turn 3 ☐	Turn 3 ☐	Turn 3 ☐
Total: ___	**Total: ___**	**Total: ___**	**Total: ___**

Can't share equally pad

Draw or count the leftover pencils here.

Left over: _____

Each child gets _____. Left on the pad: _____.

Could every child get one more pencil? Yes / No

[ ] I finished this question.

29. A fair share of pencils

Inspire Work Bench D

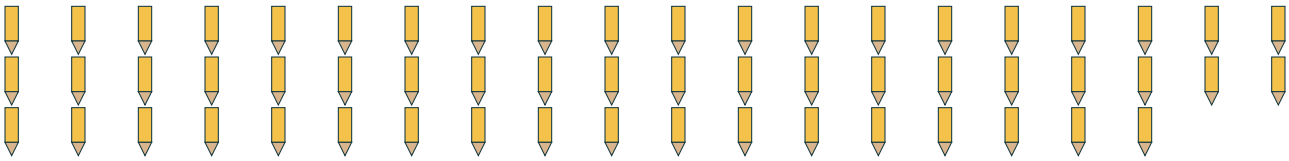

7 children want to draw maps. They have 58 whole pencils to share. Give each child as many as you can, with the same number for everyone. Put any leftovers on the "Can't share equally" pad.

Ontario Math: B2.6 - Use the picture model to share 58 whole pencils as equally as possible among 7 children. Count each child's share and identify any pencils left over.

Pencils: _____ Children: _____

Write how many you give each turn. Add each child's turns. Put any whole pencils left over on the pad.

Pencils to share

Child 1	Child 2	Child 3	Child 4	Child 5	Child 6	Child 7
Turn 1 ☐	Turn 1 ☐	Turn 1 ☐	Turn 1 ☐	Turn 1 ☐	Turn 1 ☐	Turn 1 ☐
Turn 2 ☐	Turn 2 ☐	Turn 2 ☐	Turn 2 ☐	Turn 2 ☐	Turn 2 ☐	Turn 2 ☐
Turn 3 ☐	Turn 3 ☐	Turn 3 ☐	Turn 3 ☐	Turn 3 ☐	Turn 3 ☐	Turn 3 ☐
Total: ___	**Total: ___**	**Total: ___**	**Total: ___**	**Total: ___**	**Total: ___**	**Total: ___**

Can't share equally pad

Draw or count the leftover pencils here.

Left over: _____

Each child gets _____. Left on the pad: _____.

Could every child get one more pencil? Yes / No

Inspire Work Bench D · Answer guide

1. A fair share of pencils

Choose 20 pencils and 5 children. Each child gets 4; 0 pencils go on the Can't share equally pad. The three sharing turns may be split in different ways; each child's total must be 4. Check: 5 x 4 + 0 = 20. The pad must hold fewer than 5 pencils, so no further whole-pencil sharing round is possible.

B2.6: Use the picture model to share 20 whole pencils as equally as possible among 5 children. Count each child's share and identify any pencils left over.

2. A fair share of pencils

Choose 24 pencils and 6 children. Each child gets 4; 0 pencils go on the Can't share equally pad. The three sharing turns may be split in different ways; each child's total must be 4. Check: 6 x 4 + 0 = 24. The pad must hold fewer than 6 pencils, so no further whole-pencil sharing round is possible.

B2.6: Use the picture model to share 24 whole pencils as equally as possible among 6 children. Count each child's share and identify any pencils left over.

3. A fair share of pencils

Choose 30 pencils and 5 children. Each child gets 6; 0 pencils go on the Can't share equally pad. The three sharing turns may be split in different ways; each child's total must be 6. Check: 5 x 6 + 0 = 30. The pad must hold fewer than 5 pencils, so no further whole-pencil sharing round is possible.

B2.6: Use the picture model to share 30 whole pencils as equally as possible among 5 children. Count each child's share and identify any pencils left over.

4. A fair share of pencils

Choose 40 pencils and 8 children. Each child gets 5; 0 pencils go on the Can't share equally pad. The three sharing turns may be split in different ways; each child's total must be 5. Check: 8 x 5 + 0 = 40. The pad must hold fewer than 8 pencils, so no further whole-pencil sharing round is possible.

B2.6: Use the picture model to share 40 whole pencils as equally as possible among 8 children. Count each child's share and identify any pencils left over.

5. A fair share of pencils

Choose 36 pencils and 4 children. Each child gets 9; 0 pencils go on the Can't share equally pad. The three sharing turns may be split in different ways; each child's total must be 9. Check: 4 x 9 + 0 = 36. The pad must hold fewer than 4 pencils, so no further whole-pencil sharing round is possible.

B2.6: Use the picture model to share 36 whole pencils as equally as possible among 4 children. Count each child's share and identify any pencils left over.

6. A fair share of pencils

Choose 42 pencils and 7 children. Each child gets 6; 0 pencils go on the Can't share equally pad. The three sharing turns may be split in different ways; each child's total must be 6. Check: 7 x 6 + 0 = 42. The pad must hold fewer than 7 pencils, so no further whole-pencil sharing round is possible.

B2.6: Use the picture model to share 42 whole pencils as equally as possible among 7 children. Count each child's share and identify any pencils left over.

7. A fair share of pencils

Choose 48 pencils and 6 children. Each child gets 8; 0 pencils go on the Can't share equally pad. The three sharing turns may be split in different ways; each child's total must be 8. Check: 6 x 8 + 0 = 48. The pad must hold fewer than 6 pencils, so no further whole-pencil sharing round is possible.

B2.6: Use the picture model to share 48 whole pencils as equally as possible among 6 children. Count each child's share and identify any pencils left over.

8. A fair share of pencils

Choose 56 pencils and 8 children. Each child gets 7; 0 pencils go on the Can't share equally pad. The three sharing turns may be split in different ways; each child's total must be 7. Check: 8 x 7 + 0 = 56. The pad must hold fewer than 8 pencils, so no further whole-pencil sharing round is possible.

B2.6: Use the picture model to share 56 whole pencils as equally as possible among 8 children. Count each child's share and identify any pencils left over.

9. A fair share of pencils

Choose 63 pencils and 9 children. Each child gets 7; 0 pencils go on the Can't share equally pad. The three sharing turns may be split in different ways; each child's total must be 7. Check: 9 x 7 + 0 = 63. The pad must hold fewer than 9 pencils, so no further whole-pencil sharing round is possible.

B2.6: Use the picture model to share 63 whole pencils as equally as possible among 9 children. Count each child's share and identify any pencils left over.

10. A fair share of pencils

Choose 72 pencils and 8 children. Each child gets 9; 0 pencils go on the Can't share equally pad. The three sharing turns may be split in different ways; each child's total must be 9. Check: 8 x 9 + 0 = 72. The pad must hold fewer than 8 pencils, so no further whole-pencil sharing round is possible.

B2.6: Use the picture model to share 72 whole pencils as equally as possible among 8 children. Count each child's share and identify any pencils left over.

11. A fair share of pencils

Choose 81 pencils and 9 children. Each child gets 9; 0 pencils go on the Can't share equally pad. The three sharing turns may be split in different ways; each child's total must be 9. Check: 9 x 9 + 0 = 81. The pad must hold fewer than 9 pencils, so no further whole-pencil sharing round is possible.

B2.6: Use the picture model to share 81 whole pencils as equally as possible among 9 children. Count each child's share and identify any pencils left over.

12. A fair share of pencils

Choose 90 pencils and 10 children. Each child gets 9; 0 pencils go on the Can't share equally pad. The three sharing turns may be split in different ways; each child's total must be 9. Check: 10 x 9 + 0 = 90. The pad must hold fewer than 10 pencils, so no further whole-pencil sharing round is possible.

B2.6: Use the picture model to share 90 whole pencils as equally as possible among 10 children. Count each child's share and identify any pencils left over.

13. A fair share of pencils

Choose 100 pencils and 10 children. Each child gets 10; 0 pencils go on the Can't share equally pad. The three sharing turns may be split in different ways; each child's total must be 10. Check: 10 x 10 + 0 = 100. The pad must hold fewer than 10 pencils, so no further whole-pencil sharing round is possible.

B2.6: Use the picture model to share 100 whole pencils as equally as possible among 10 children. Count each child's share and identify any pencils left over.

14. A fair share of pencils

Choose 45 pencils and 5 children. Each child gets 9; 0 pencils go on the Can't share equally pad. The three sharing turns may be split in different ways; each child's total must be 9. Check: 5 x 9 + 0 = 45. The pad must hold fewer than 5 pencils, so no further whole-pencil sharing round is possible.

B2.6: Use the picture model to share 45 whole pencils as equally as possible among 5 children. Count each child's share and identify any pencils left over.

15. A fair share of pencils

Choose 54 pencils and 6 children. Each child gets 9; 0 pencils go on the Can't share equally pad. The three sharing turns may be split in different ways; each child's total must be 9. Check: 6 x 9 + 0 = 54. The pad must hold fewer than 6 pencils, so no further whole-pencil sharing round is possible.

B2.6: Use the picture model to share 54 whole pencils as equally as possible among 6 children. Count each child's share and identify any pencils left over.

16. A fair share of pencils

Choose 64 pencils and 8 children. Each child gets 8; 0 pencils go on the Can't share equally pad. The three sharing turns may be split in different ways; each child's total must be 8. Check: 8 x 8 + 0 = 64. The pad must hold fewer than 8 pencils, so no further whole-pencil sharing round is possible.

B2.6: Use the picture model to share 64 whole pencils as equally as possible among 8 children. Count each child's share and identify any pencils left over.

17. A fair share of pencils

Choose 80 pencils and 10 children. Each child gets 8; 0 pencils go on the Can't share equally pad. The three sharing turns may be split in different ways; each child's total must be 8. Check: 10 x 8 + 0 = 80. The pad must hold fewer than 10 pencils, so no further whole-pencil sharing round is possible.

B2.6: Use the picture model to share 80 whole pencils as equally as possible among 10 children. Count each child's share and identify any pencils left over.

18. A fair share of pencils

Choose 28 pencils and 4 children. Each child gets 7; 0 pencils go on the Can't share equally pad. The three sharing turns may be split in different ways; each child's total must be 7. Check: 4 x 7 + 0 = 28. The pad must hold fewer than 4 pencils, so no further whole-pencil sharing round is possible.

B2.6: Use the picture model to share 28 whole pencils as equally as possible among 4 children. Count each child's share and identify any pencils left over.

19. A fair share of pencils

Choose 32 pencils and 4 children. Each child gets 8; 0 pencils go on the Can't share equally pad. The three sharing turns may be split in different ways; each child's total must be 8. Check: 4 x 8 + 0 = 32. The pad must hold fewer than 4 pencils, so no further whole-pencil sharing round is possible.

B2.6: Use the picture model to share 32 whole pencils as equally as possible among 4 children. Count each child's share and identify any pencils left over.

20. A fair share of pencils

Choose 35 pencils and 7 children. Each child gets 5; 0 pencils go on the Can't share equally pad. The three sharing turns may be split in different ways; each child's total must be 5. Check: 7 x 5 + 0 = 35. The pad must hold fewer than 7 pencils, so no further whole-pencil sharing round is possible.

B2.6: Use the picture model to share 35 whole pencils as equally as possible among 7 children. Count each child's share and identify any pencils left over.

21. A fair share of pencils

Choose 23 pencils and 5 children. Each child gets 4; 3 pencils go on the Can't share equally pad. The three sharing turns may be split in different ways; each child's total must be 4. Check: 5 x 4 + 3 = 23. The pad must hold fewer than 5 pencils, so no further whole-pencil sharing round is possible.

B2.6: Use the picture model to share 23 whole pencils as equally as possible among 5 children. Count each child's share and identify any pencils left over.

22. A fair share of pencils

Choose 31 pencils and 6 children. Each child gets 5; 1 pencils go on the Can't share equally pad. The three sharing turns may be split in different ways; each child's total must be 5. Check: 6 x 5 + 1 = 31. The pad must hold fewer than 6 pencils, so no further whole-pencil sharing round is possible.

B2.6: Use the picture model to share 31 whole pencils as equally as possible among 6 children. Count each child's share and identify any pencils left over.

23. A fair share of pencils

Choose 38 pencils and 7 children. Each child gets 5; 3 pencils go on the Can't share equally pad. The three sharing turns may be split in different ways; each child's total must be 5. Check: 7 x 5 + 3 = 38. The pad must hold fewer than 7 pencils, so no further whole-pencil sharing round is possible.

B2.6: Use the picture model to share 38 whole pencils as equally as possible among 7 children. Count each child's share and identify any pencils left over.

24. A fair share of pencils

Choose 47 pencils and 8 children. Each child gets 5; 7 pencils go on the Can't share equally pad. The three sharing turns may be split in different ways; each child's total must be 5. Check: 8 x 5 + 7 = 47. The pad must hold fewer than 8 pencils, so no further whole-pencil sharing round is possible.

B2.6: Use the picture model to share 47 whole pencils as equally as possible among 8 children. Count each child's share and identify any pencils left over.

25. A fair share of pencils

Choose 52 pencils and 6 children. Each child gets 8; 4 pencils go on the Can't share equally pad. The three sharing turns may be split in different ways; each child's total must be 8. Check: 6 x 8 + 4 = 52. The pad must hold fewer than 6 pencils, so no further whole-pencil sharing round is possible.

B2.6: Use the picture model to share 52 whole pencils as equally as possible among 6 children. Count each child's share and identify any pencils left over.

26. A fair share of pencils

Choose 65 pencils and 9 children. Each child gets 7; 2 pencils go on the Can't share equally pad. The three sharing turns may be split in different ways; each child's total must be 7. Check: 9 x 7 + 2 = 65. The pad must hold fewer than 9 pencils, so no further whole-pencil sharing round is possible.

B2.6: Use the picture model to share 65 whole pencils as equally as possible among 9 children. Count each child's share and identify any pencils left over.

27. A fair share of pencils

Choose 74 pencils and 10 children. Each child gets 7; 4 pencils go on the Can't share equally pad. The three sharing turns may be split in different ways; each child's total must be 7. Check: 10 x 7 + 4 = 74. The pad must hold fewer than 10 pencils, so no further whole-pencil sharing round is possible.

B2.6: Use the picture model to share 74 whole pencils as equally as possible among 10 children. Count each child's share and identify any pencils left over.

28. A fair share of pencils

Choose 29 pencils and 4 children. Each child gets 7; 1 pencils go on the Can't share equally pad. The three sharing turns may be split in different ways; each child's total must be 7. Check: 4 x 7 + 1 = 29. The pad must hold fewer than 4 pencils, so no further whole-pencil sharing round is possible.

B2.6: Use the picture model to share 29 whole pencils as equally as possible among 4 children. Count each child's share and identify any pencils left over.

29. A fair share of pencils

Choose 58 pencils and 7 children. Each child gets 8; 2 pencils go on the Can't share equally pad. The three sharing turns may be split in different ways; each child's total must be 8. Check: 7 x 8 + 2 = 58. The pad must hold fewer than 7 pencils, so no further whole-pencil sharing round is possible.

B2.6: Use the picture model to share 58 whole pencils as equally as possible among 7 children. Count each child's share and identify any pencils left over.

30. A fair share of pencils

Choose 97 pencils and 10 children. Each child gets 9; 7 pencils go on the Can't share equally pad. The three sharing turns may be split in different ways; each child's total must be 9. Check: 10 x 9 + 7 = 97. The pad must hold fewer than 10 pencils, so no further whole-pencil sharing round is possible.

B2.6: Use the picture model to share 97 whole pencils as equally as possible among 10 children. Count each child's share and identify any pencils left over.
