Excite Work Bench G · Equal groups

Grade 2 · 30 picture activities

Build the number of groups from each question. Put the same number of objects in every group. Count all the pictures and write the total.

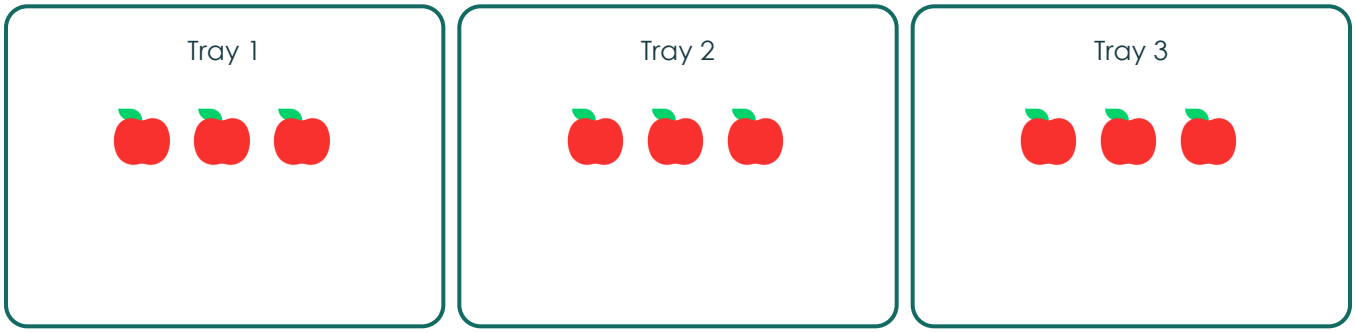

Online, both choices and the total are on one page. Tick Allow Check answer at the start to enable checking.

Name: _____ Date: _____

1. Make equal groups of apples

Make 3 trays. Put 3 apples in each tray. Count all the pictures. How many apples are there altogether?

Ontario Math · B2.5 - Represent multiplication as 3 repeated equal groups of 3 and find the total.

Number of groups: _____ Objects in each group: _____

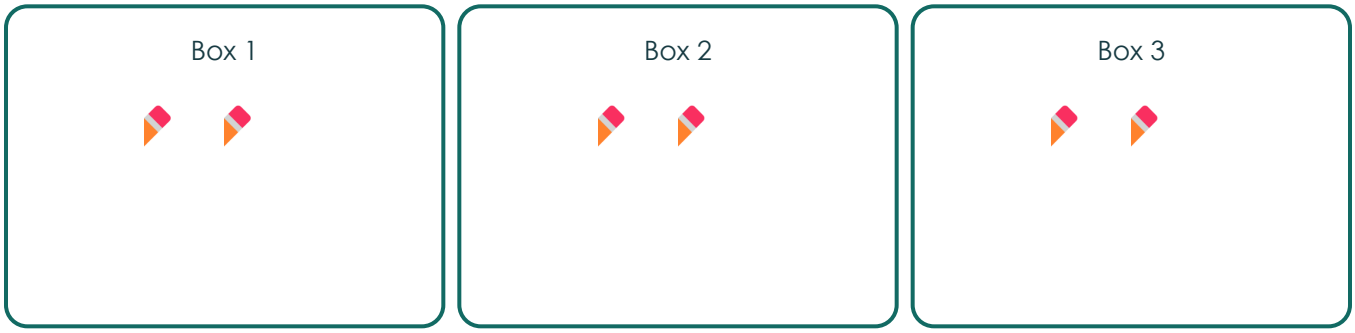

_____ groups x _____ in each = _____ altogether

[ ] I finished this question.

2. Make equal groups of pencils

Make 3 boxes. Put 2 pencils in each box. Count all the pictures. How many pencils are there altogether?

Ontario Math · B2.5 - Represent multiplication as 3 repeated equal groups of 2 and find the total.

Number of groups: _____ Objects in each group: _____

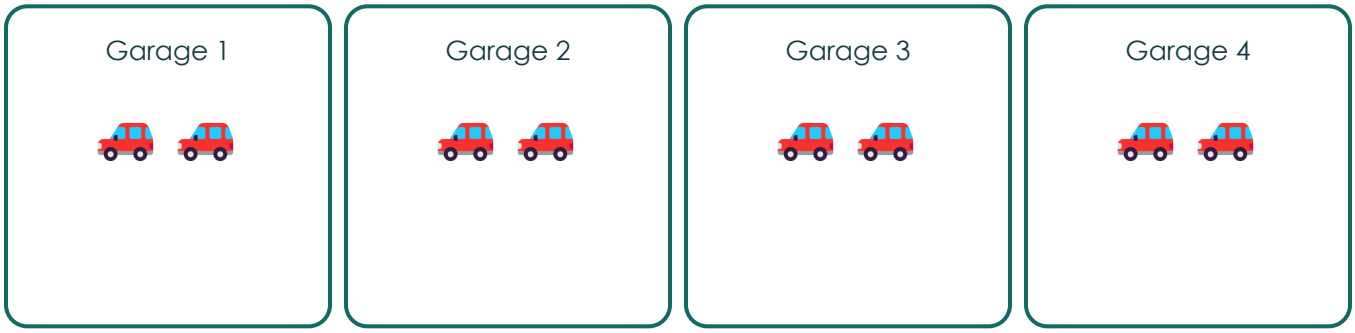

_____ groups x _____ in each = _____ altogether

[ ] I finished this question.

3. Make equal groups of toy cars

Make 4 garages. Put 2 toy cars in each garage. Count all the pictures. How many toy cars are there altogether?

Ontario Math · B2.5 - Represent multiplication as 4 repeated equal groups of 2 and find the total.

Number of groups: _____ Objects in each group: _____

_____ groups x _____ in each = _____ altogether

[ ] I finished this question.

4. Make equal groups of stars

Make 5 cards. Put 2 stars in each card. Count all the pictures. How many stars are there altogether?

Ontario Math · B2.5 - Represent multiplication as 5 repeated equal groups of 2 and find the total.

Number of groups: _____ Objects in each group: _____

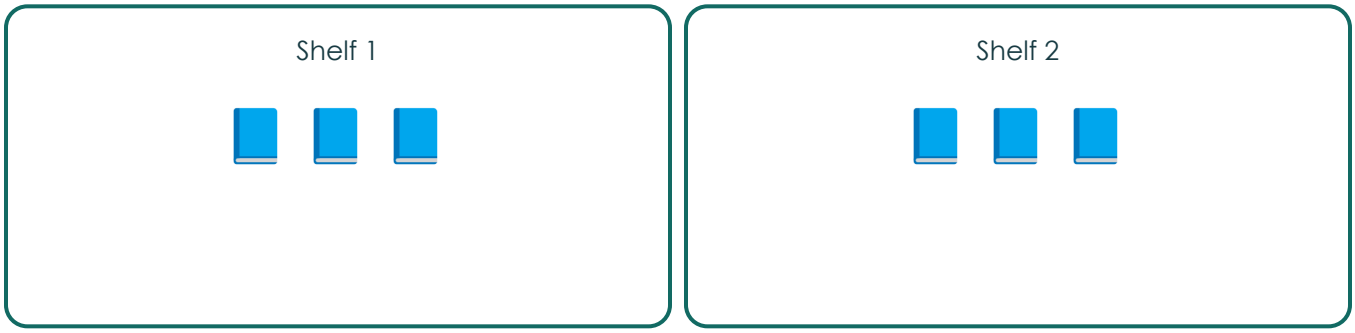

_____ groups x _____ in each = _____ altogether

[ ] I finished this question.

5. Make equal groups of books

Make 2 shelves. Put 3 books in each shelf. Count all the pictures. How many books are there altogether?

Ontario Math · B2.5 - Represent multiplication as 2 repeated equal groups of 3 and find the total.

Number of groups: _____ Objects in each group: _____

_____ groups x _____ in each = _____ altogether

[ ] I finished this question.

6. Make equal groups of balls

Make 3 baskets. Put 3 balls in each basket. Count all the pictures. How many balls are there altogether?

Ontario Math · B2.5 - Represent multiplication as 3 repeated equal groups of 3 and find the total.

Number of groups: _____ Objects in each group: _____

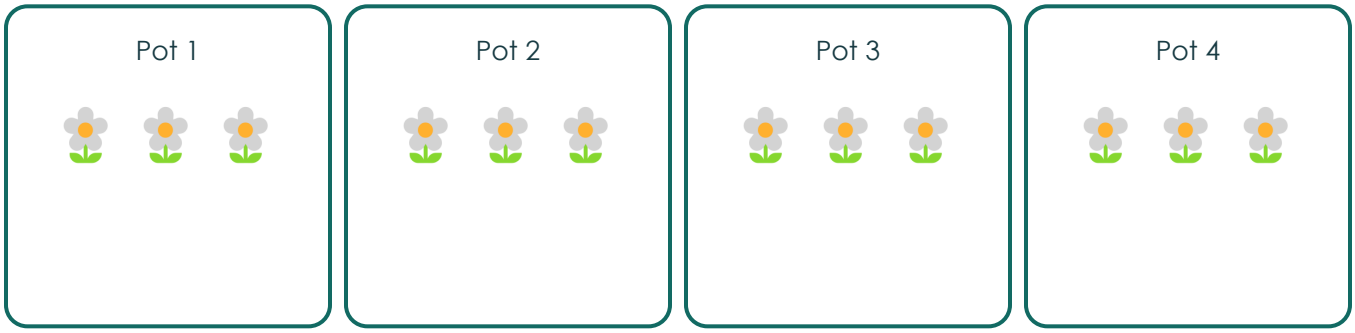

_____ groups x _____ in each = _____ altogether

[ ] I finished this question.

7. Make equal groups of flowers

Make 4 pots. Put 3 flowers in each pot. Count all the pictures. How many flowers are there altogether?

Ontario Math · B2.5 - Represent multiplication as 4 repeated equal groups of 3 and find the total.

Number of groups: _____ Objects in each group: _____

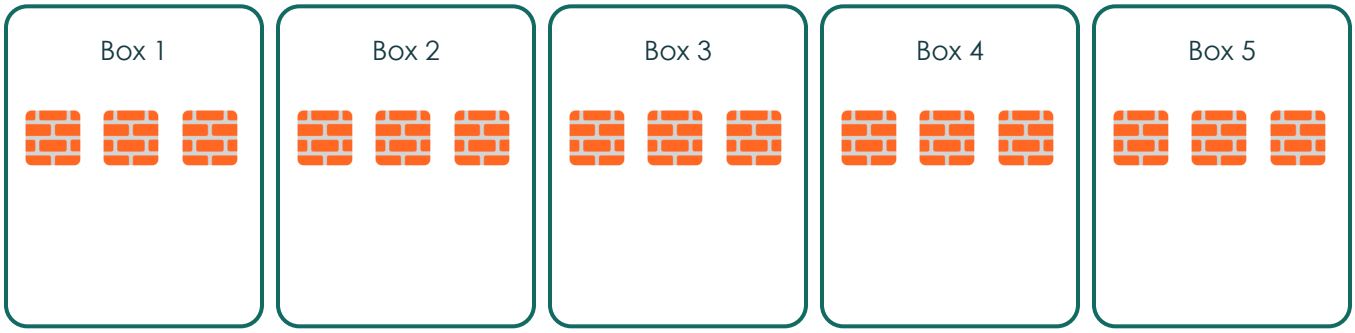

_____ groups x _____ in each = _____ altogether

[ ] I finished this question.

8. Make equal groups of blocks

Make 5 boxes. Put 3 blocks in each box. Count all the pictures. How many blocks are there altogether?

Ontario Math · B2.5 - Represent multiplication as 5 repeated equal groups of 3 and find the total.

Number of groups: _____ Objects in each group: _____

_____ groups x _____ in each = _____ altogether

[ ] I finished this question.

9. Make equal groups of apples

Make 2 trays. Put 4 apples in each tray. Count all the pictures. How many apples are there altogether?

Ontario Math · B2.5 - Represent multiplication as 2 repeated equal groups of 4 and find the total.

Tray 1

Tray 2

Number of groups: _____ Objects in each group: _____

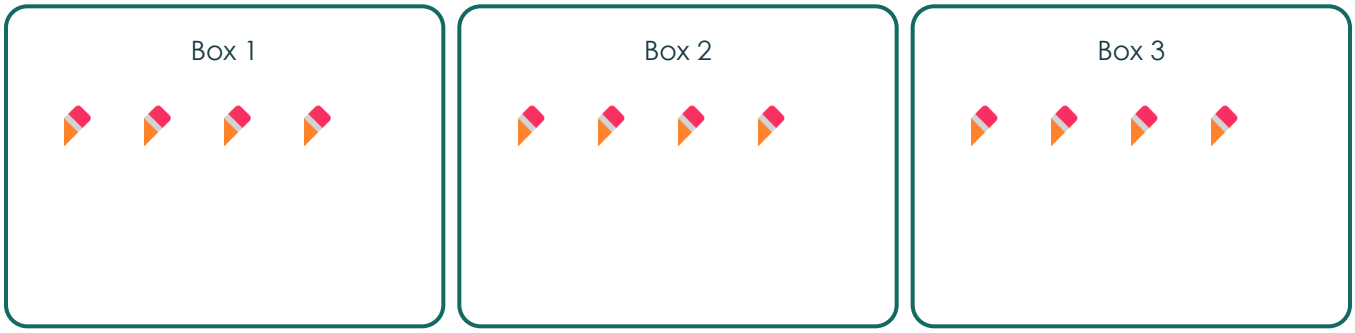

_____ groups x _____ in each = _____ altogether

[ ] I finished this question.

10. Make equal groups of pencils

Make 3 boxes. Put 4 pencils in each box. Count all the pictures. How many pencils are there altogether?

Ontario Math · B2.5 - Represent multiplication as 3 repeated equal groups of 4 and find the total.

Number of groups: _____ Objects in each group: _____

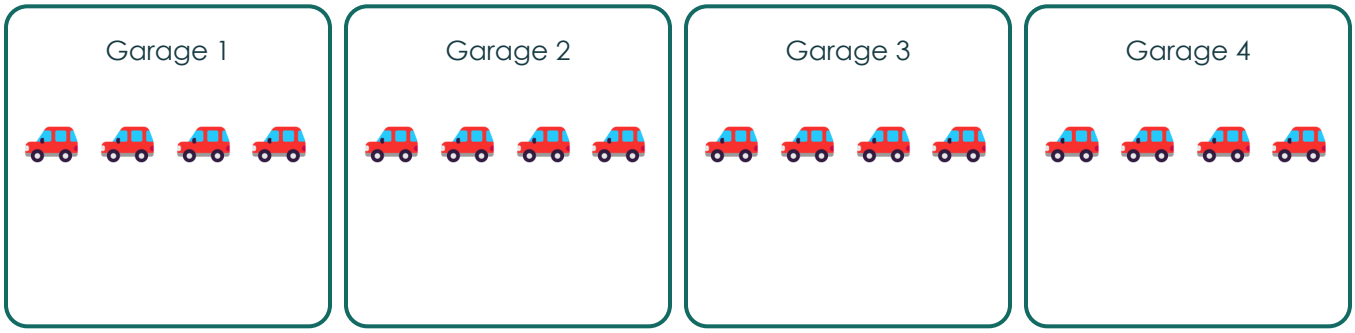

_____ groups x _____ in each = _____ altogether

[ ] I finished this question.

11. Make equal groups of toy cars

Make 4 garages. Put 4 toy cars in each garage. Count all the pictures. How many toy cars are there altogether?

Ontario Math · B2.5 - Represent multiplication as 4 repeated equal groups of 4 and find the total.

Number of groups: _____ Objects in each group: _____

_____ groups x _____ in each = _____ altogether

[ ] I finished this question.

12. Make equal groups of stars

Make 5 cards. Put 4 stars in each card. Count all the pictures. How many stars are there altogether?

Ontario Math · B2.5 - Represent multiplication as 5 repeated equal groups of 4 and find the total.

Number of groups: _____ Objects in each group: _____

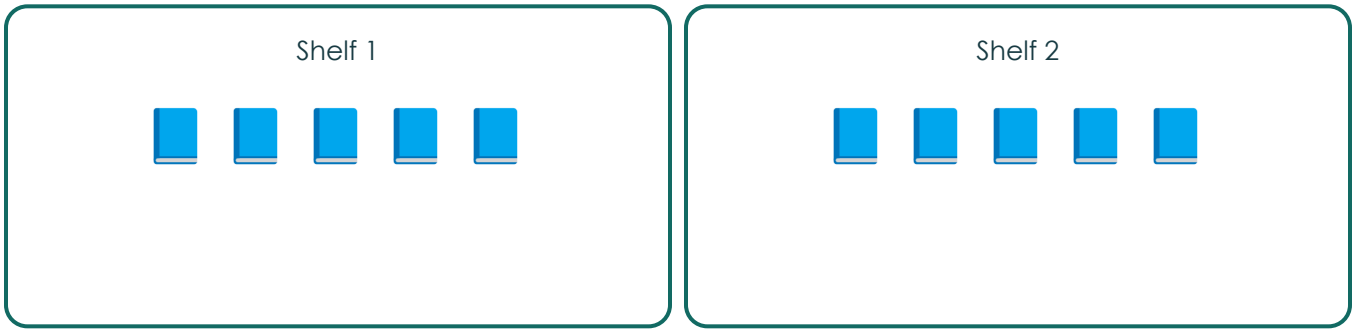

_____ groups x _____ in each = _____ altogether

[ ] I finished this question.

13. Make equal groups of books

Make 2 shelves. Put 5 books in each shelf. Count all the pictures. How many books are there altogether?

Ontario Math · B2.5 - Represent multiplication as 2 repeated equal groups of 5 and find the total.

Number of groups: _____ Objects in each group: _____

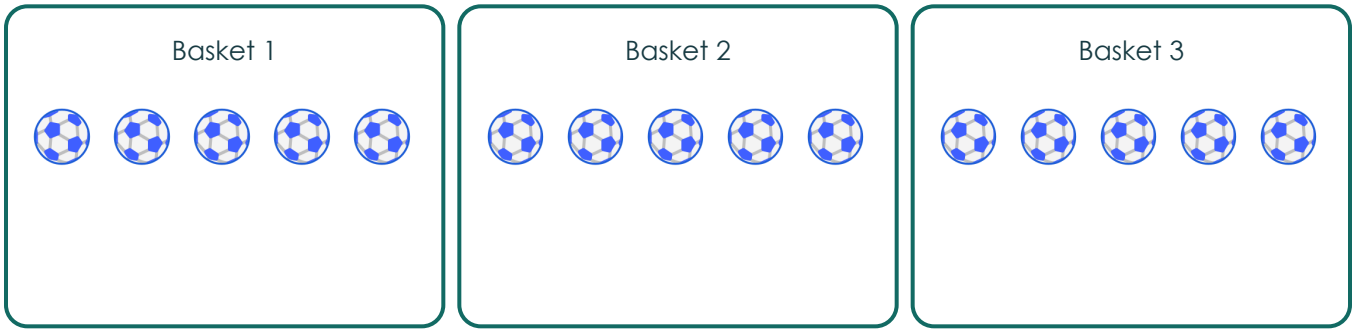

_____ groups x _____ in each = _____ altogether

[ ] I finished this question.

14. Make equal groups of balls

Make 3 baskets. Put 5 balls in each basket. Count all the pictures. How many balls are there altogether?

Ontario Math · B2.5 - Represent multiplication as 3 repeated equal groups of 5 and find the total.

Number of groups: _____ Objects in each group: _____

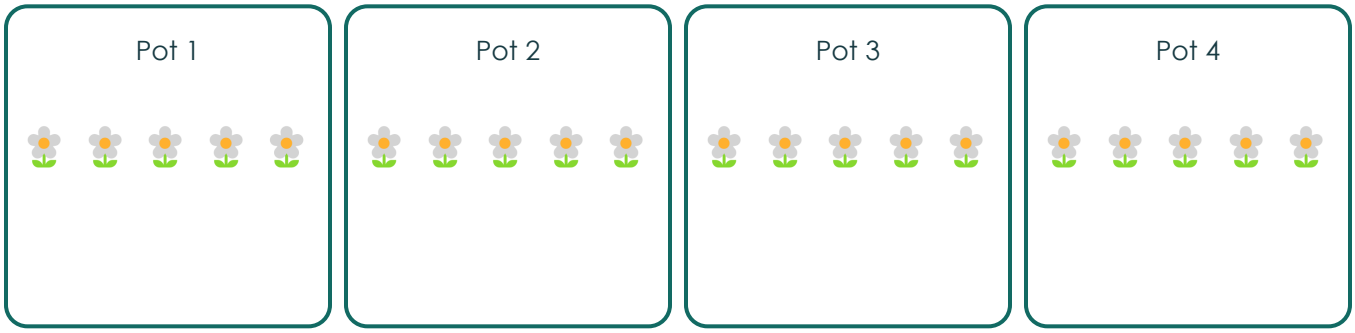

_____ groups x _____ in each = _____ altogether

[ ] I finished this question.

15. Make equal groups of flowers

Make 4 pots. Put 5 flowers in each pot. Count all the pictures. How many flowers are there altogether?

Ontario Math · B2.5 - Represent multiplication as 4 repeated equal groups of 5 and find the total.

Number of groups: _____ Objects in each group: _____

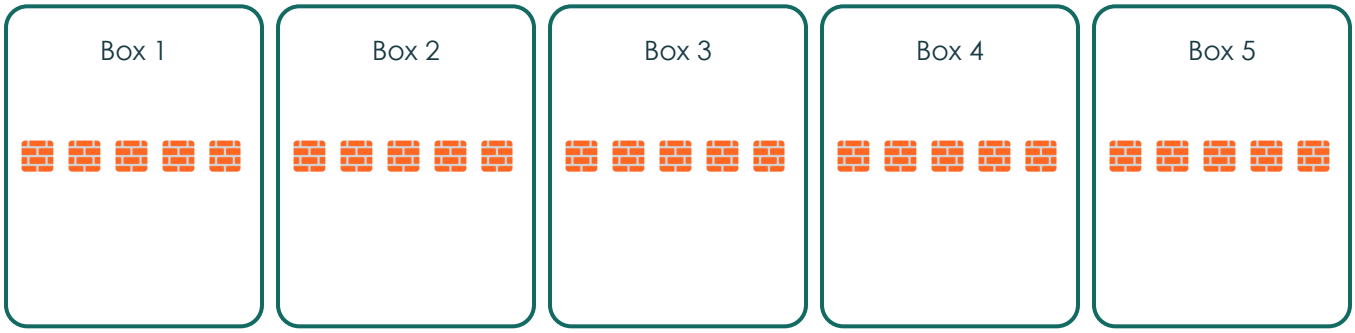

_____ groups x _____ in each = _____ altogether

[ ] I finished this question.

16. Make equal groups of blocks

Make 5 boxes. Put 5 blocks in each box. Count all the pictures. How many blocks are there altogether?

Ontario Math · B2.5 - Represent multiplication as 5 repeated equal groups of 5 and find the total.

Number of groups: _____ Objects in each group: _____

_____ groups x _____ in each = _____ altogether

[ ] I finished this question.

17. Make equal groups of apples

Make 2 trays. Put 6 apples in each tray. Count all the pictures. How many apples are there altogether?

Ontario Math · B2.5 - Represent multiplication as 2 repeated equal groups of 6 and find the total.

Tray 1

Tray 2

Number of groups: _____ Objects in each group: _____

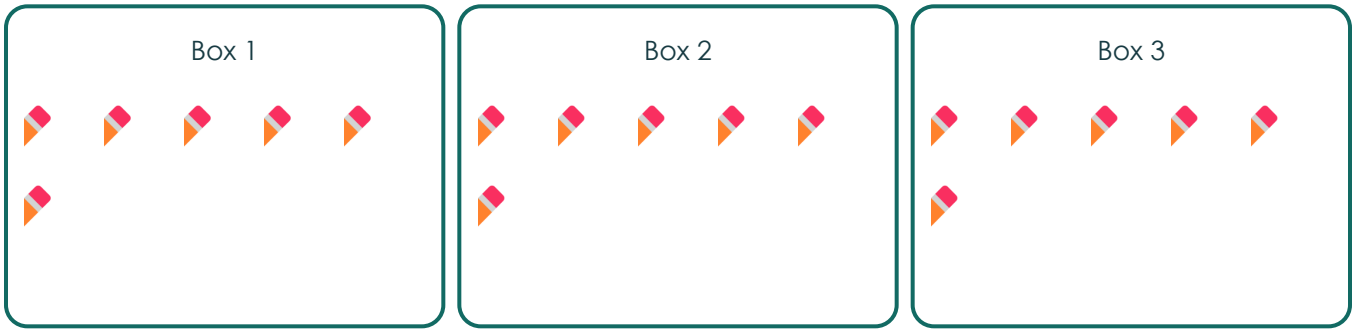

_____ groups x _____ in each = _____ altogether

[ ] I finished this question.

18. Make equal groups of pencils

Make 3 boxes. Put 6 pencils in each box. Count all the pictures. How many pencils are there altogether?

Ontario Math · B2.5 - Represent multiplication as 3 repeated equal groups of 6 and find the total.

Number of groups: _____ Objects in each group: _____

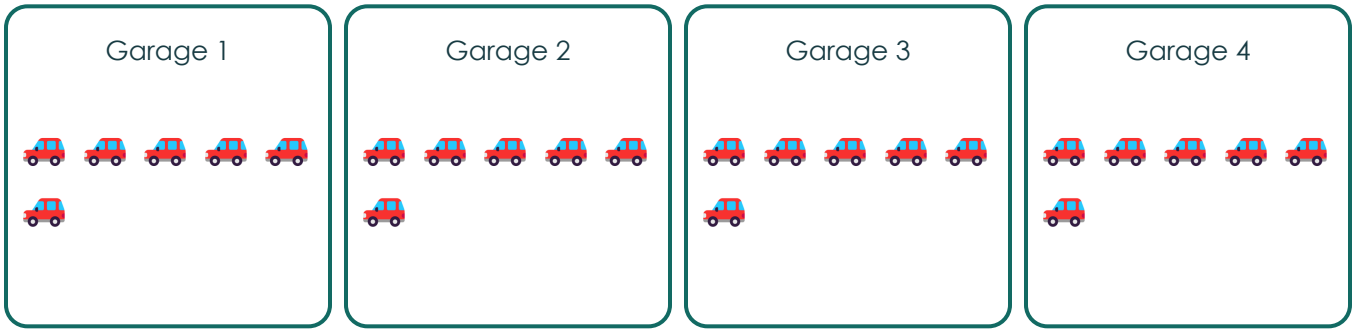

_____ groups x _____ in each = _____ altogether

[ ] I finished this question.

19. Make equal groups of toy cars

Make 4 garages. Put 6 toy cars in each garage. Count all the pictures. How many toy cars are there altogether?

Ontario Math · B2.5 - Represent multiplication as 4 repeated equal groups of 6 and find the total.

Number of groups: _____ Objects in each group: _____

_____ groups x _____ in each = _____ altogether

[ ] I finished this question.

20. Make equal groups of stars

Make 5 cards. Put 6 stars in each card. Count all the pictures. How many stars are there altogether?

Ontario Math · B2.5 - Represent multiplication as 5 repeated equal groups of 6 and find the total.

Number of groups: _____ Objects in each group: _____

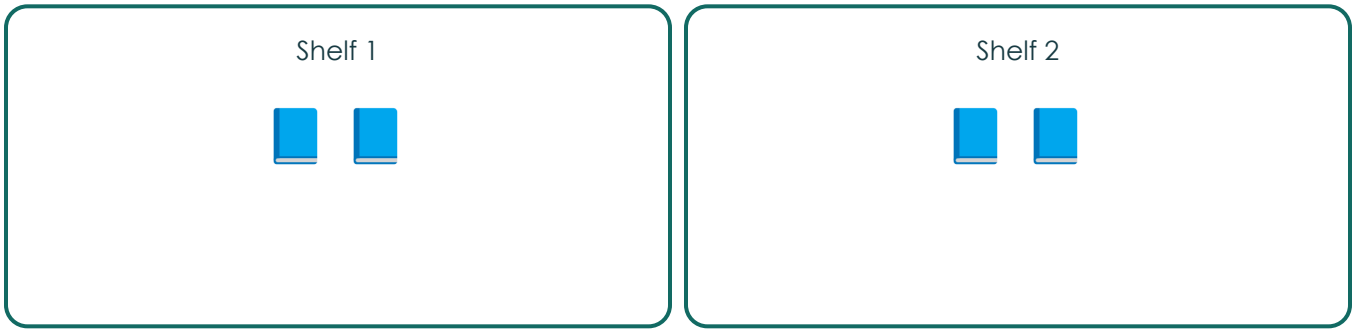

_____ groups x _____ in each = _____ altogether

[ ] I finished this question.

21. Make equal groups of books

Make 2 shelves. Put 2 books in each shelf. Count all the pictures. How many books are there altogether?

Ontario Math · B2.5 - Represent multiplication as 2 repeated equal groups of 2 and find the total.

Number of groups: _____ Objects in each group: _____

_____ groups x _____ in each = _____ altogether

[ ] I finished this question.

22. Make equal groups of balls

Make 3 baskets. Put 2 balls in each basket. Count all the pictures. How many balls are there altogether?

Ontario Math · B2.5 - Represent multiplication as 3 repeated equal groups of 2 and find the total.

Number of groups: _____ Objects in each group: _____

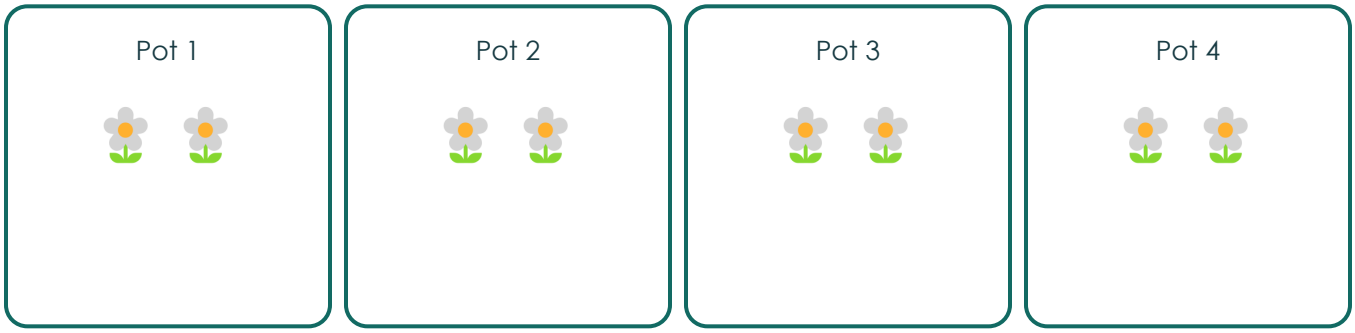

_____ groups x _____ in each = _____ altogether

[ ] I finished this question.

23. Make equal groups of flowers

Make 4 pots. Put 2 flowers in each pot. Count all the pictures. How many flowers are there altogether?

Ontario Math · B2.5 - Represent multiplication as 4 repeated equal groups of 2 and find the total.

Number of groups: _____ Objects in each group: _____

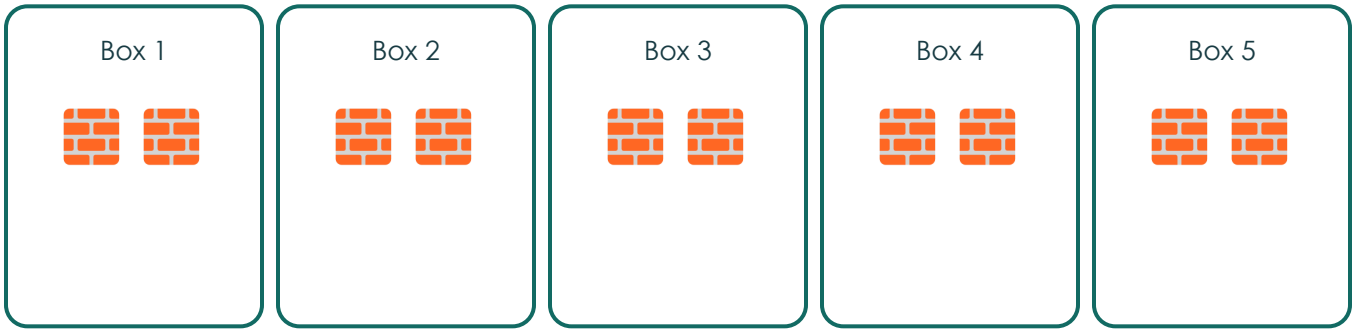

_____ groups x _____ in each = _____ altogether

[ ] I finished this question.

24. Make equal groups of blocks

Make 5 boxes. Put 2 blocks in each box. Count all the pictures. How many blocks are there altogether?

Ontario Math · B2.5 - Represent multiplication as 5 repeated equal groups of 2 and find the total.

Number of groups: _____ Objects in each group: _____

_____ groups x _____ in each = _____ altogether

[ ] I finished this question.

25. Make equal groups of apples

Make 2 trays. Put 3 apples in each tray. Count all the pictures. How many apples are there altogether?

Ontario Math · B2.5 - Represent multiplication as 2 repeated equal groups of 3 and find the total.

Tray 1

Tray 2

Number of groups: _____ Objects in each group: _____

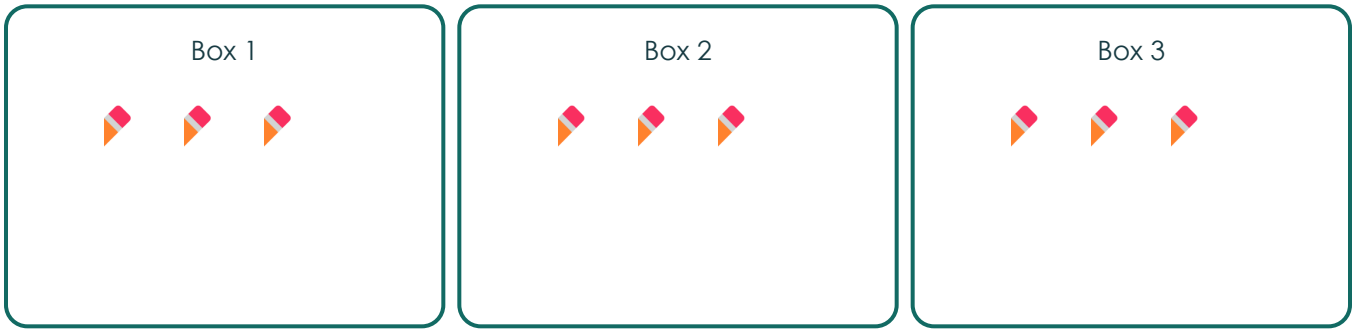

_____ groups x _____ in each = _____ altogether

[ ] I finished this question.

26. Make equal groups of pencils

Make 3 boxes. Put 3 pencils in each box. Count all the pictures. How many pencils are there altogether?

Ontario Math · B2.5 - Represent multiplication as 3 repeated equal groups of 3 and find the total.

Number of groups: _____ Objects in each group: _____

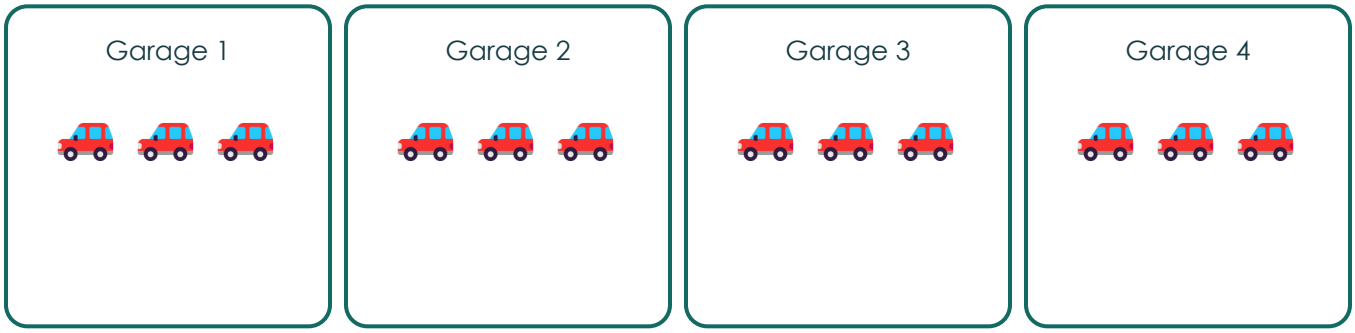

_____ groups x _____ in each = _____ altogether

[ ] I finished this question.

27. Make equal groups of toy cars

Make 4 garages. Put 3 toy cars in each garage. Count all the pictures. How many toy cars are there altogether?

Ontario Math · B2.5 - Represent multiplication as 4 repeated equal groups of 3 and find the total.

Number of groups: _____ Objects in each group: _____

_____ groups x _____ in each = _____ altogether

[ ] I finished this question.

28. Make equal groups of stars

Make 5 cards. Put 3 stars in each card. Count all the pictures. How many stars are there altogether?

Ontario Math · B2.5 - Represent multiplication as 5 repeated equal groups of 3 and find the total.

Number of groups: _____ Objects in each group: _____

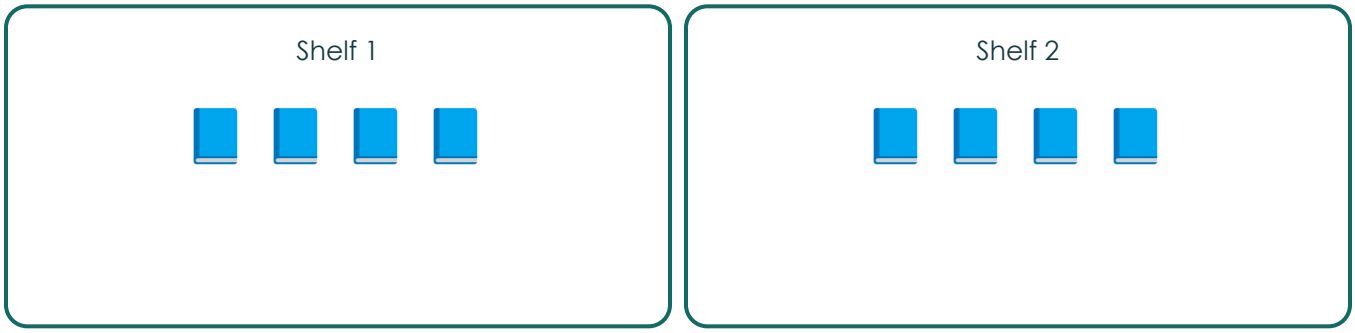

_____ groups x _____ in each = _____ altogether

[ ] I finished this question.

29. Make equal groups of books

Make 2 shelves. Put 4 books in each shelf. Count all the pictures. How many books are there altogether?

Ontario Math · B2.5 - Represent multiplication as 2 repeated equal groups of 4 and find the total.

Number of groups: _____ Objects in each group: _____

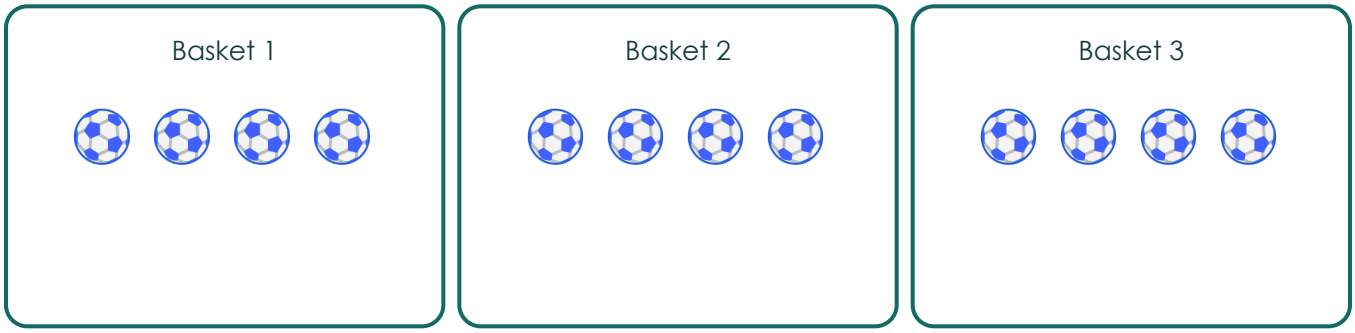

_____ groups x _____ in each = _____ altogether

[ ] I finished this question.

30. Make equal groups of balls

Make 3 baskets. Put 4 balls in each basket. Count all the pictures. How many balls are there altogether?

Ontario Math · B2.5 - Represent multiplication as 3 repeated equal groups of 4 and find the total.

Number of groups: _____ Objects in each group: _____

_____ groups x _____ in each = _____ altogether

[ ] I finished this question.

Excite Work Bench G · Answer guide

1. 3 groups of 3; 3 x 3 = 9.
2. 3 groups of 2; 3 x 2 = 6.
3. 4 groups of 2; 4 x 2 = 8.
4. 5 groups of 2; 5 x 2 = 10.
5. 2 groups of 3; 2 x 3 = 6.
6. 3 groups of 3; 3 x 3 = 9.
7. 4 groups of 3; 4 x 3 = 12.
8. 5 groups of 3; 5 x 3 = 15.
9. 2 groups of 4; 2 x 4 = 8.
10. 3 groups of 4; 3 x 4 = 12.
11. 4 groups of 4; 4 x 4 = 16.
12. 5 groups of 4; 5 x 4 = 20.
13. 2 groups of 5; 2 x 5 = 10.
14. 3 groups of 5; 3 x 5 = 15.
15. 4 groups of 5; 4 x 5 = 20.
16. 5 groups of 5; 5 x 5 = 25.
17. 2 groups of 6; 2 x 6 = 12.
18. 3 groups of 6; 3 x 6 = 18.
19. 4 groups of 6; 4 x 6 = 24.
20. 5 groups of 6; 5 x 6 = 30.
21. 2 groups of 2; 2 x 2 = 4.
22. 3 groups of 2; 3 x 2 = 6.
23. 4 groups of 2; 4 x 2 = 8.
24. 5 groups of 2; 5 x 2 = 10.
25. 2 groups of 3; 2 x 3 = 6.
26. 3 groups of 3; 3 x 3 = 9.
27. 4 groups of 3; 4 x 3 = 12.
28. 5 groups of 3; 5 x 3 = 15.
29. 2 groups of 4; 2 x 4 = 8.
30. 3 groups of 4; 3 x 4 = 12.

Name: _____ Date: _____

1. Make equal groups of apples

Make 3 trays. Put 6 apples in each tray. Count all the pictures. How many apples are there altogether?

Ontario Math · B2.6 - Represent multiplication as 3 repeated equal groups of 6 and find the total.

Number of groups: _____ Objects in each group: _____

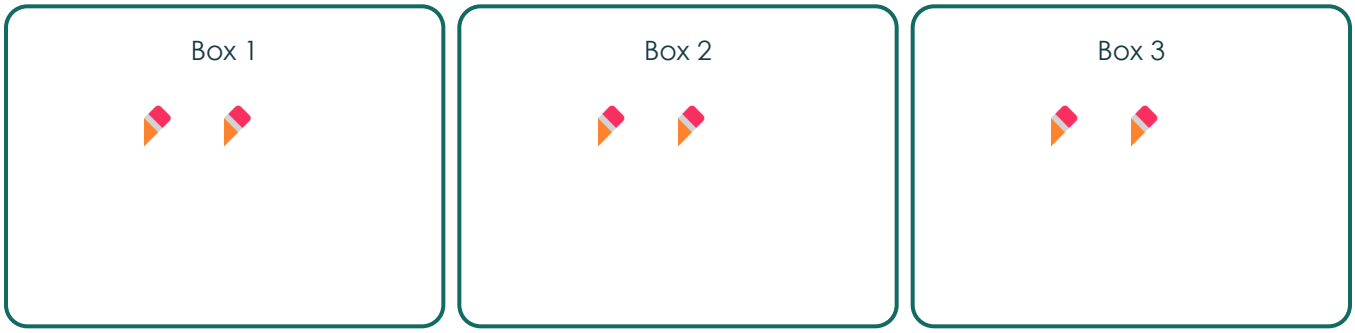

_____ groups x _____ in each = _____ altogether

[ ] I finished this question.

2. Make equal groups of pencils

Make 3 boxes. Put 2 pencils in each box. Count all the pictures. How many pencils are there altogether?

Ontario Math · B2.6 - Represent multiplication as 3 repeated equal groups of 2 and find the total.

Number of groups: _____ Objects in each group: _____

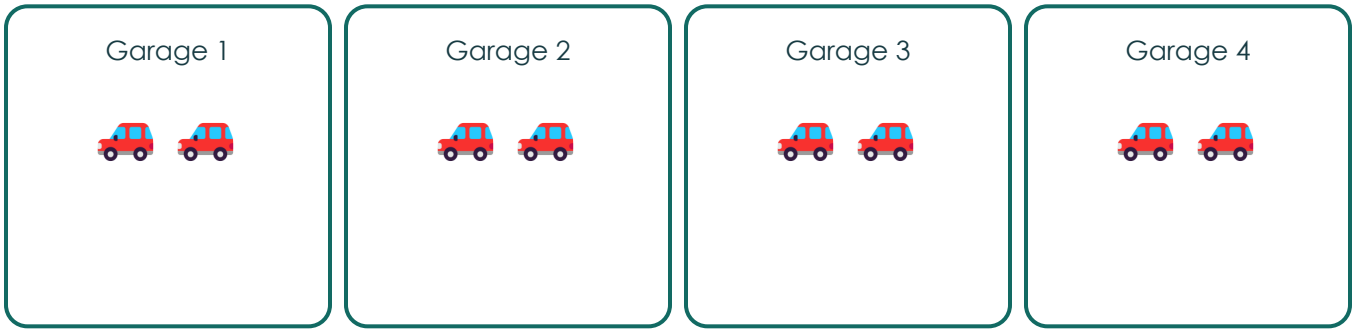

_____ groups x _____ in each = _____ altogether

[ ] I finished this question.

3. Make equal groups of toy cars

Make 4 garages. Put 2 toy cars in each garage. Count all the pictures. How many toy cars are there altogether?

Ontario Math · B2.6 - Represent multiplication as 4 repeated equal groups of 2 and find the total.

Number of groups: _____ Objects in each group: _____

_____ groups x _____ in each = _____ altogether

[ ] I finished this question.

4. Make equal groups of stars

Make 5 cards. Put 3 stars in each card. Count all the pictures. How many stars are there altogether?

Ontario Math · B2.6 - Represent multiplication as 5 repeated equal groups of 3 and find the total.

Number of groups: _____ Objects in each group: _____

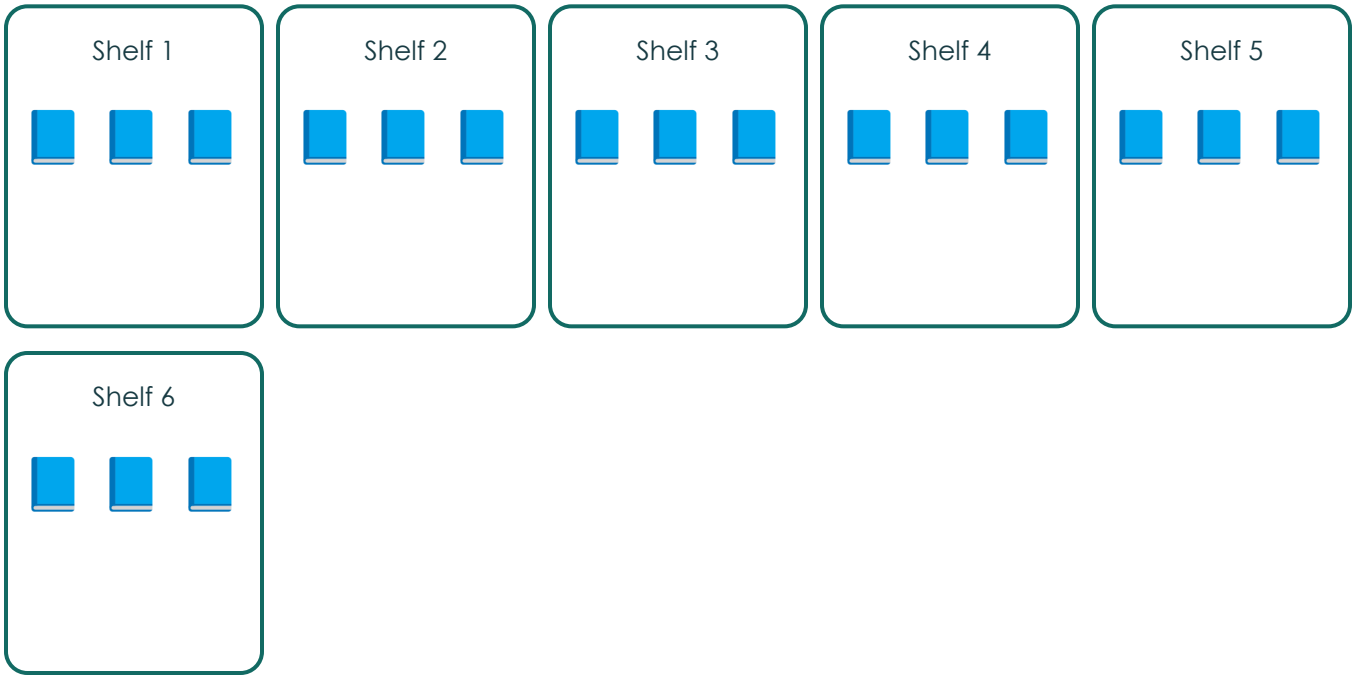

_____ groups x _____ in each = _____ altogether

[ ] I finished this question.

5. Make equal groups of books

Make 6 shelves. Put 3 books in each shelf. Count all the pictures. How many books are there altogether?

Ontario Math · B2.6 - Represent multiplication as 6 repeated equal groups of 3 and find the total.

Number of groups: _____ Objects in each group: _____

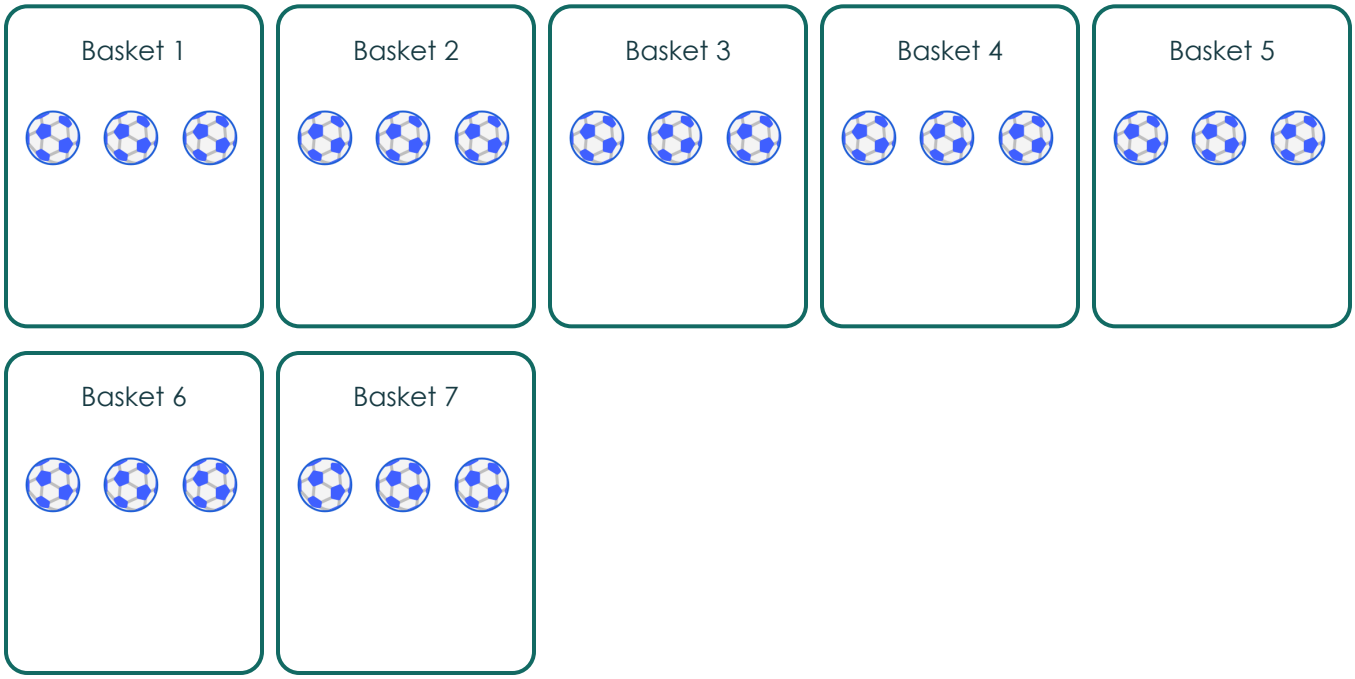

_____ groups x _____ in each = _____ altogether

[ ] I finished this question.

6. Make equal groups of balls

Make 7 baskets. Put 3 balls in each basket. Count all the pictures. How many balls are there altogether?

Ontario Math · B2.6 - Represent multiplication as 7 repeated equal groups of 3 and find the total.

Number of groups: _____ Objects in each group: _____

_____ groups x _____ in each = _____ altogether

[ ] I finished this question.

7. Make equal groups of flowers

Make 8 pots. Put 4 flowers in each pot. Count all the pictures. How many flowers are there altogether?

Ontario Math · B2.6 - Represent multiplication as 8 repeated equal groups of 4 and find the total.

Number of groups: _____ Objects in each group: _____

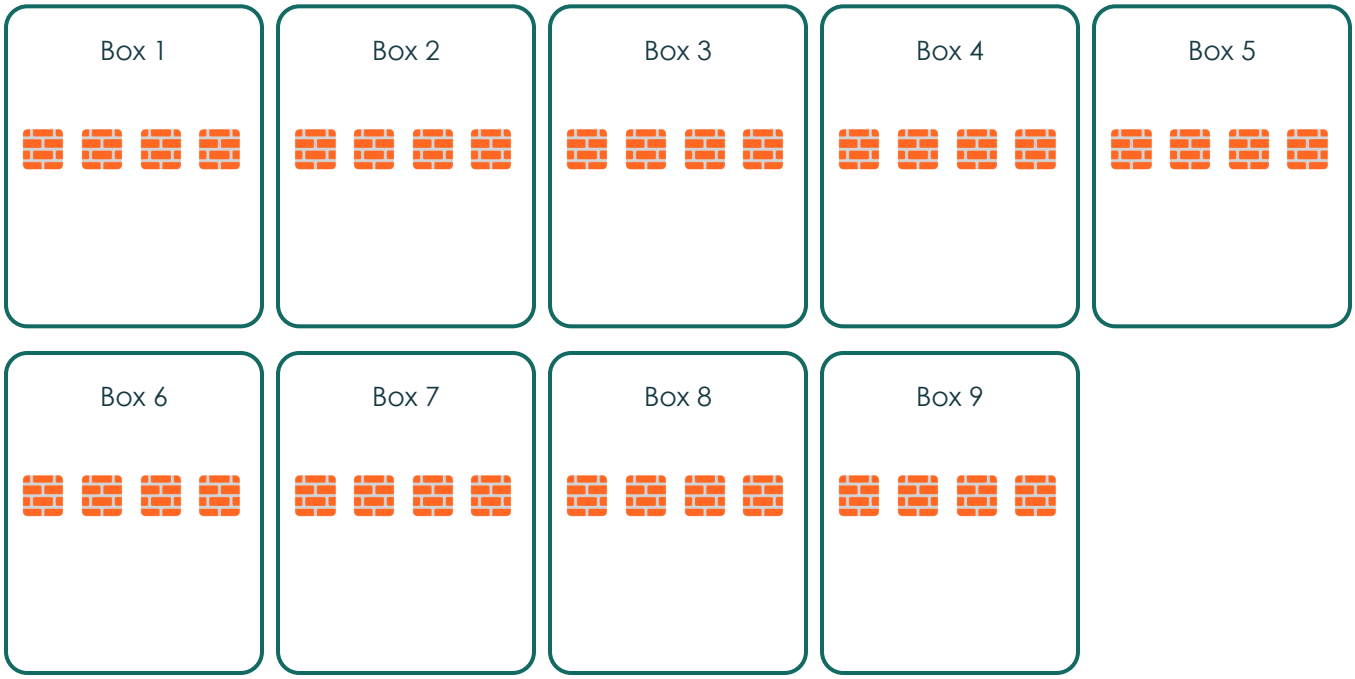

_____ groups x _____ in each = _____ altogether

[ ] I finished this question.

8. Make equal groups of blocks

Make 9 boxes. Put 4 blocks in each box. Count all the pictures. How many blocks are there altogether?

Ontario Math · B2.6 - Represent multiplication as 9 repeated equal groups of 4 and find the total.

Number of groups: _____ Objects in each group: _____

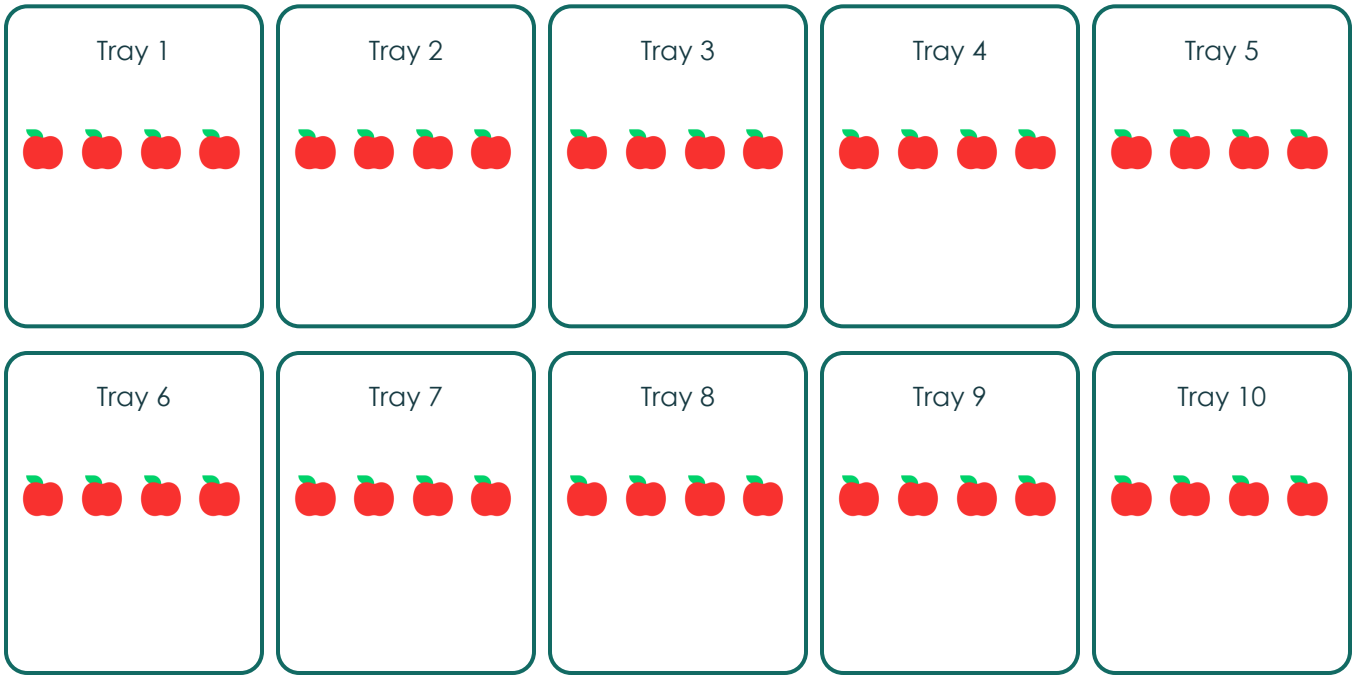

_____ groups x _____ in each = _____ altogether

[ ] I finished this question.

9. Make equal groups of apples

Make 10 trays. Put 4 apples in each tray. Count all the pictures. How many apples are there altogether?

Ontario Math · B2.6 - Represent multiplication as 10 repeated equal groups of 4 and find the total.

Number of groups: _____ Objects in each group: _____

_____ groups x _____ in each = _____ altogether

[ ] I finished this question.

10. Make equal groups of pencils

Make 2 boxes. Put 5 pencils in each box. Count all the pictures. How many pencils are there altogether?

Ontario Math · B2.6 - Represent multiplication as 2 repeated equal groups of 5 and find the total.

Box 1

Box 2

Number of groups: _____ Objects in each group: _____

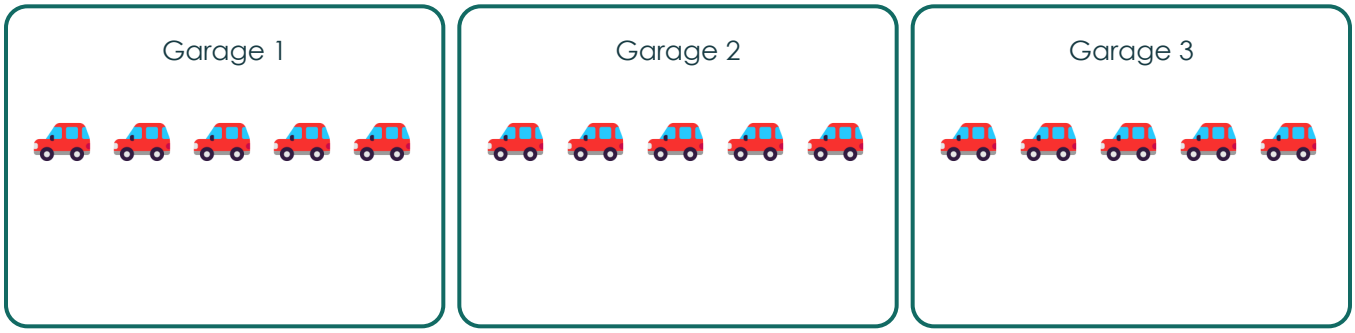

_____ groups x _____ in each = _____ altogether

[ ] I finished this question.

11. Make equal groups of toy cars

Make 3 garages. Put 5 toy cars in each garage. Count all the pictures. How many toy cars are there altogether?

Ontario Math · B2.6 - Represent multiplication as 3 repeated equal groups of 5 and find the total.

Number of groups: _____ Objects in each group: _____

_____ groups x _____ in each = _____ altogether

[ ] I finished this question.

12. Make equal groups of stars

Make 4 cards. Put 5 stars in each card. Count all the pictures. How many stars are there altogether?

Ontario Math · B2.6 - Represent multiplication as 4 repeated equal groups of 5 and find the total.

Number of groups: _____ Objects in each group: _____

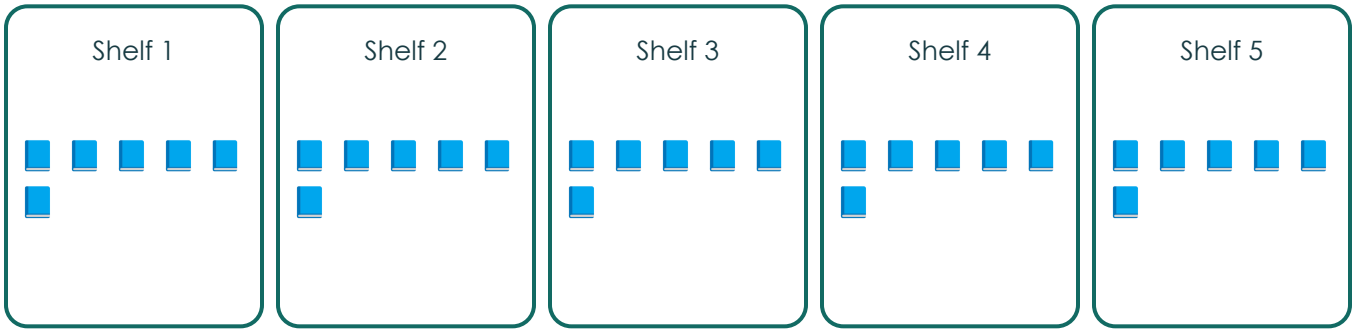

_____ groups x _____ in each = _____ altogether

[ ] I finished this question.

13. Make equal groups of books

Make 5 shelves. Put 6 books in each shelf. Count all the pictures. How many books are there altogether?

Ontario Math · B2.6 - Represent multiplication as 5 repeated equal groups of 6 and find the total.

Number of groups: _____ Objects in each group: _____

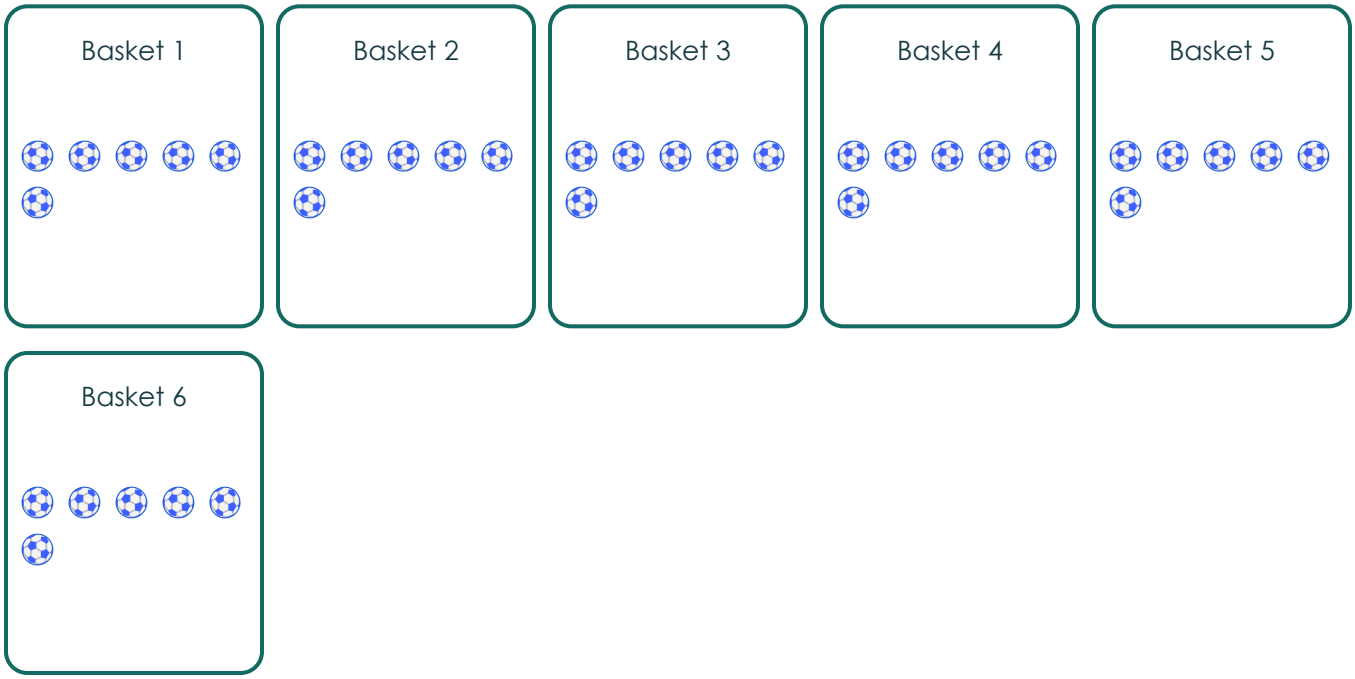

_____ groups x _____ in each = _____ altogether

[ ] I finished this question.

14. Make equal groups of balls

Make 6 baskets. Put 6 balls in each basket. Count all the pictures. How many balls are there altogether?

Ontario Math · B2.6 - Represent multiplication as 6 repeated equal groups of 6 and find the total.

Number of groups: _____ Objects in each group: _____

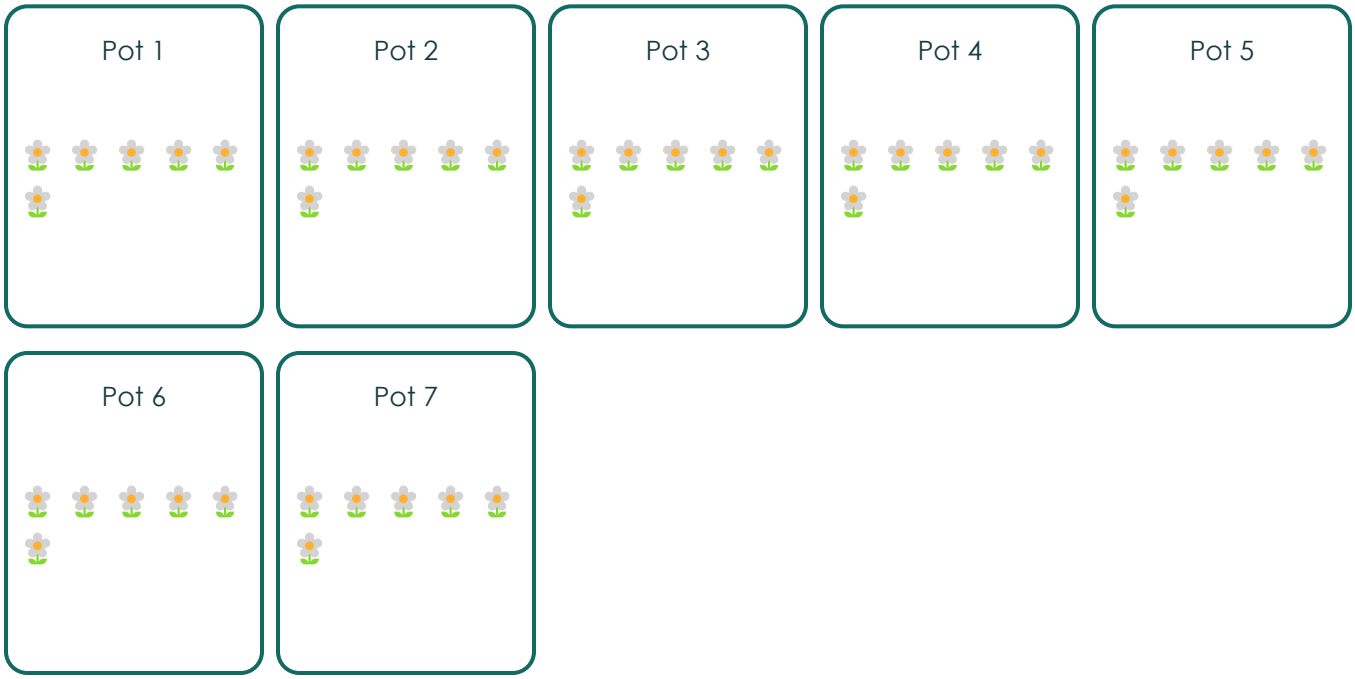

_____ groups x _____ in each = _____ altogether

[ ] I finished this question.

15. Make equal groups of flowers

Make 7 pots. Put 6 flowers in each pot. Count all the pictures. How many flowers are there altogether?

Ontario Math · B2.6 - Represent multiplication as 7 repeated equal groups of 6 and find the total.

Number of groups: _____ Objects in each group: _____

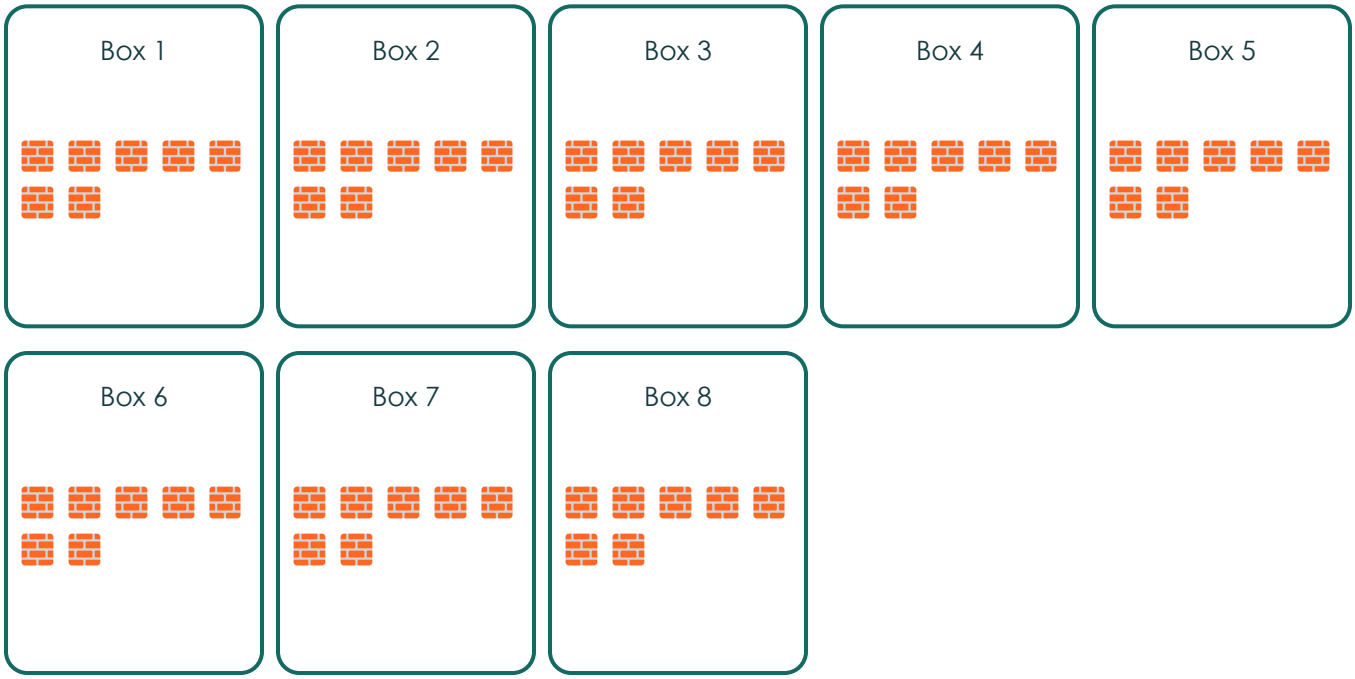

_____ groups x _____ in each = _____ altogether

[ ] I finished this question.

16. Make equal groups of blocks

Make 8 boxes. Put 7 blocks in each box. Count all the pictures. How many blocks are there altogether?

Ontario Math · B2.6 - Represent multiplication as 8 repeated equal groups of 7 and find the total.

Number of groups: _____ Objects in each group: _____

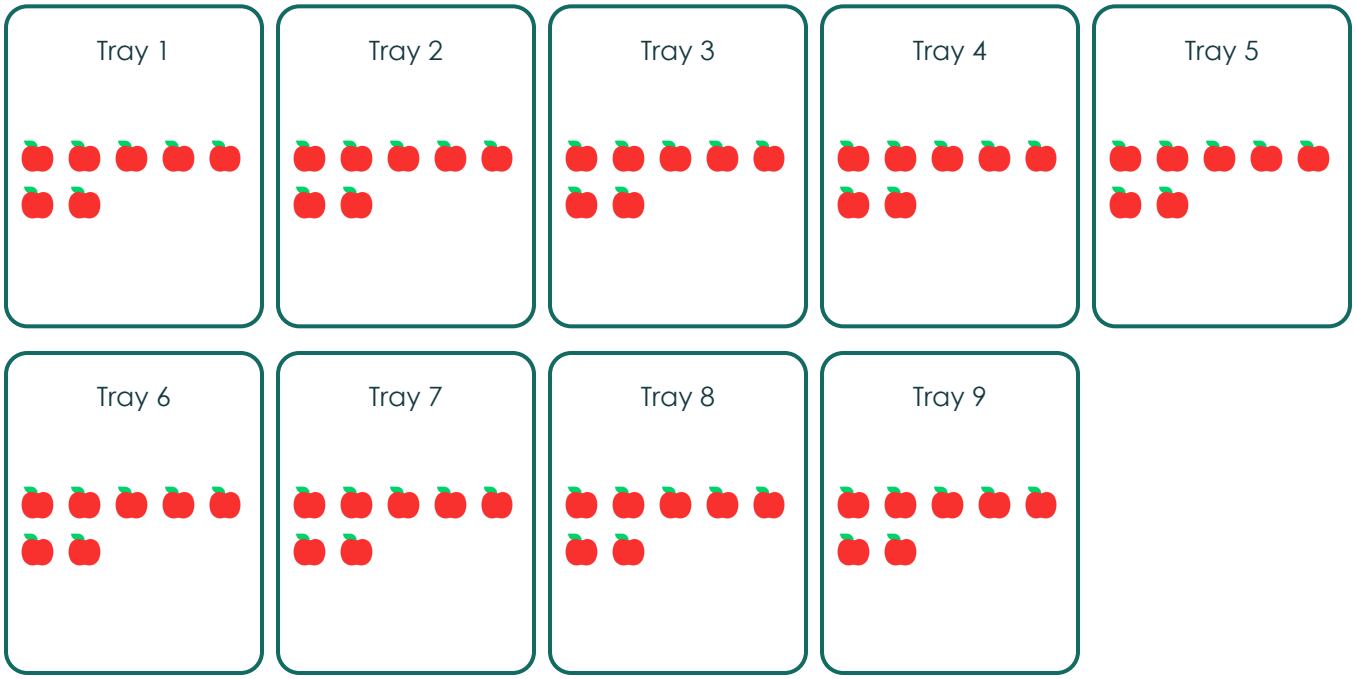

_____ groups x _____ in each = _____ altogether

[ ] I finished this question.

17. Make equal groups of apples

Make 9 trays. Put 7 apples in each tray. Count all the pictures. How many apples are there altogether?

Ontario Math · B2.6 - Represent multiplication as 9 repeated equal groups of 7 and find the total.

Number of groups: _____ Objects in each group: _____

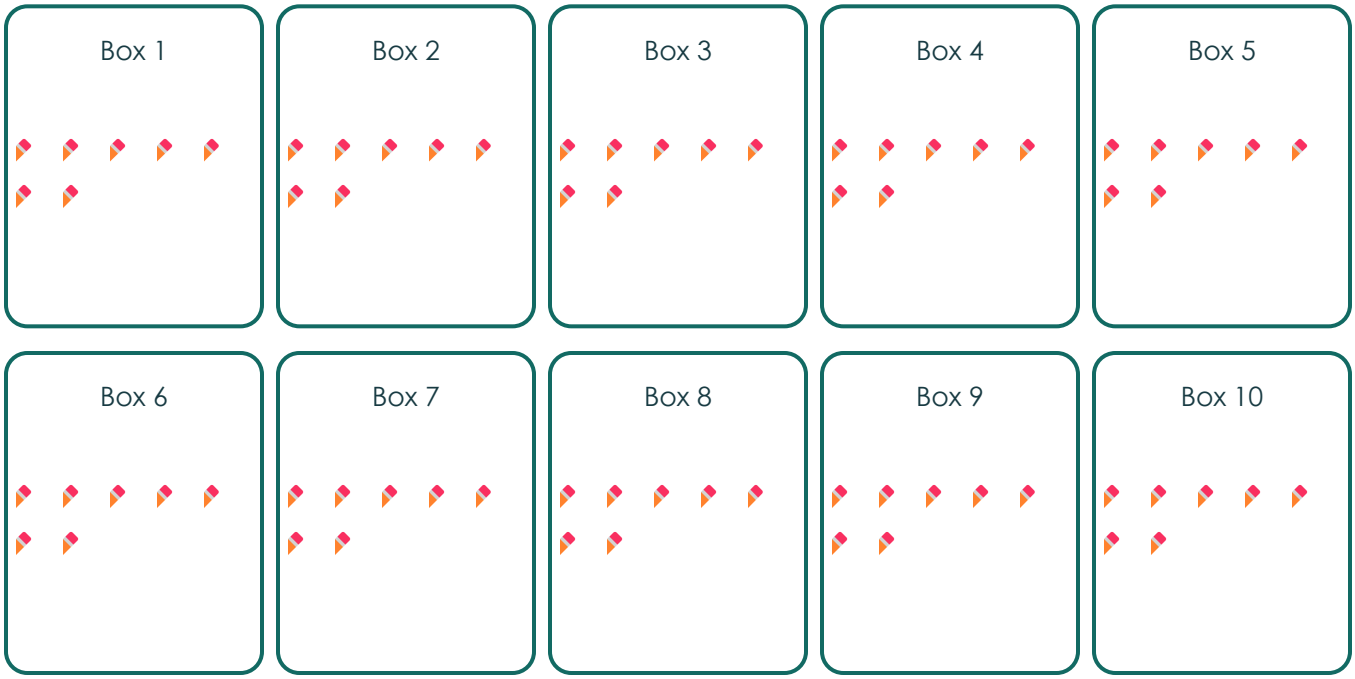

_____ groups x _____ in each = _____ altogether

[ ] I finished this question.

18. Make equal groups of pencils

Make 10 boxes. Put 7 pencils in each box. Count all the pictures. How many pencils are there altogether?

Ontario Math · B2.6 - Represent multiplication as 10 repeated equal groups of 7 and find the total.

Number of groups: _____ Objects in each group: _____

_____ groups x _____ in each = _____ altogether

[ ] I finished this question.

19. Make equal groups of toy cars

Make 2 garages. Put 8 toy cars in each garage. Count all the pictures. How many toy cars are there altogether?

Ontario Math · B2.6 - Represent multiplication as 2 repeated equal groups of 8 and find the total.

Garage 1

Garage 2

Number of groups: _____ Objects in each group: _____

_____ groups x _____ in each = _____ altogether

[ ] I finished this question.

20. Make equal groups of stars

Make 3 cards. Put 8 stars in each card. Count all the pictures. How many stars are there altogether?

Ontario Math · B2.6 - Represent multiplication as 3 repeated equal groups of 8 and find the total.

Number of groups: _____ Objects in each group: _____

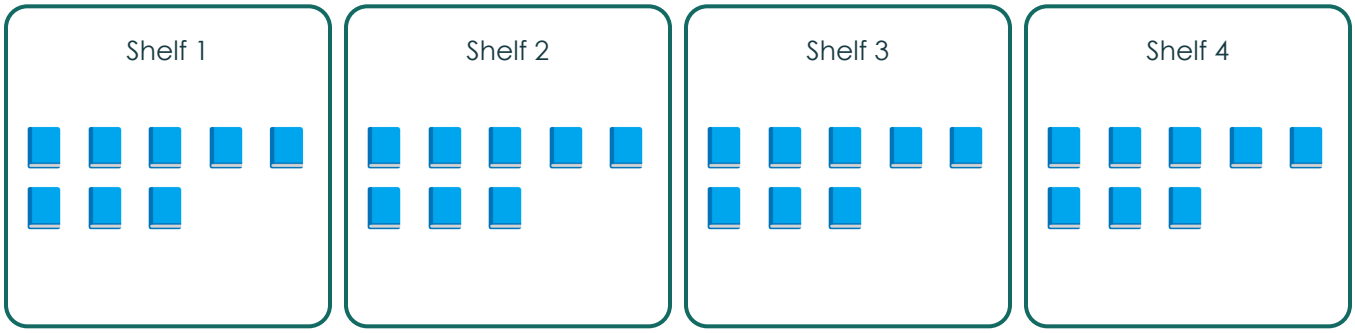

_____ groups x _____ in each = _____ altogether

[ ] I finished this question.

21. Make equal groups of books

Make 4 shelves. Put 8 books in each shelf. Count all the pictures. How many books are there altogether?

Ontario Math · B2.6 - Represent multiplication as 4 repeated equal groups of 8 and find the total.

Number of groups: _____ Objects in each group: _____

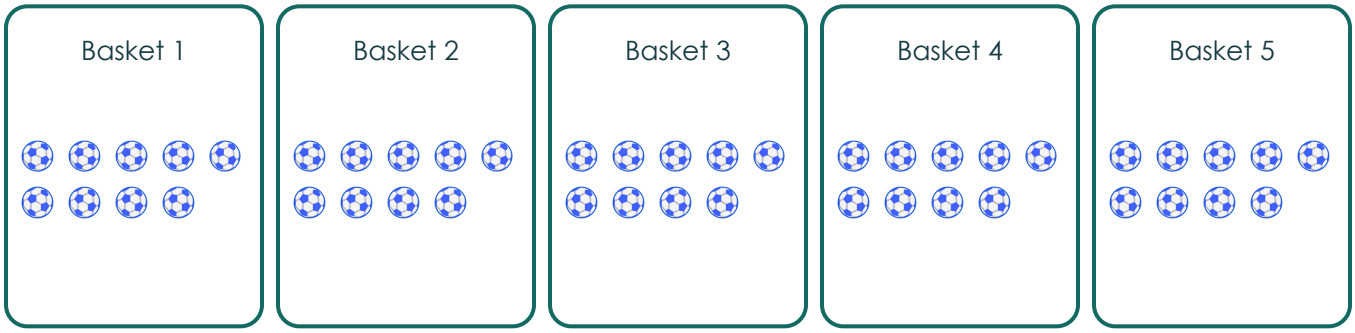

_____ groups x _____ in each = _____ altogether

[ ] I finished this question.

22. Make equal groups of balls

Make 5 baskets. Put 9 balls in each basket. Count all the pictures. How many balls are there altogether?

Ontario Math · B2.6 - Represent multiplication as 5 repeated equal groups of 9 and find the total.

Number of groups: _____ Objects in each group: _____

_____ groups x _____ in each = _____ altogether

[ ] I finished this question.

23. Make equal groups of flowers

Make 6 pots. Put 9 flowers in each pot. Count all the pictures. How many flowers are there altogether?

Ontario Math · B2.6 - Represent multiplication as 6 repeated equal groups of 9 and find the total.

Number of groups: _____ Objects in each group: _____

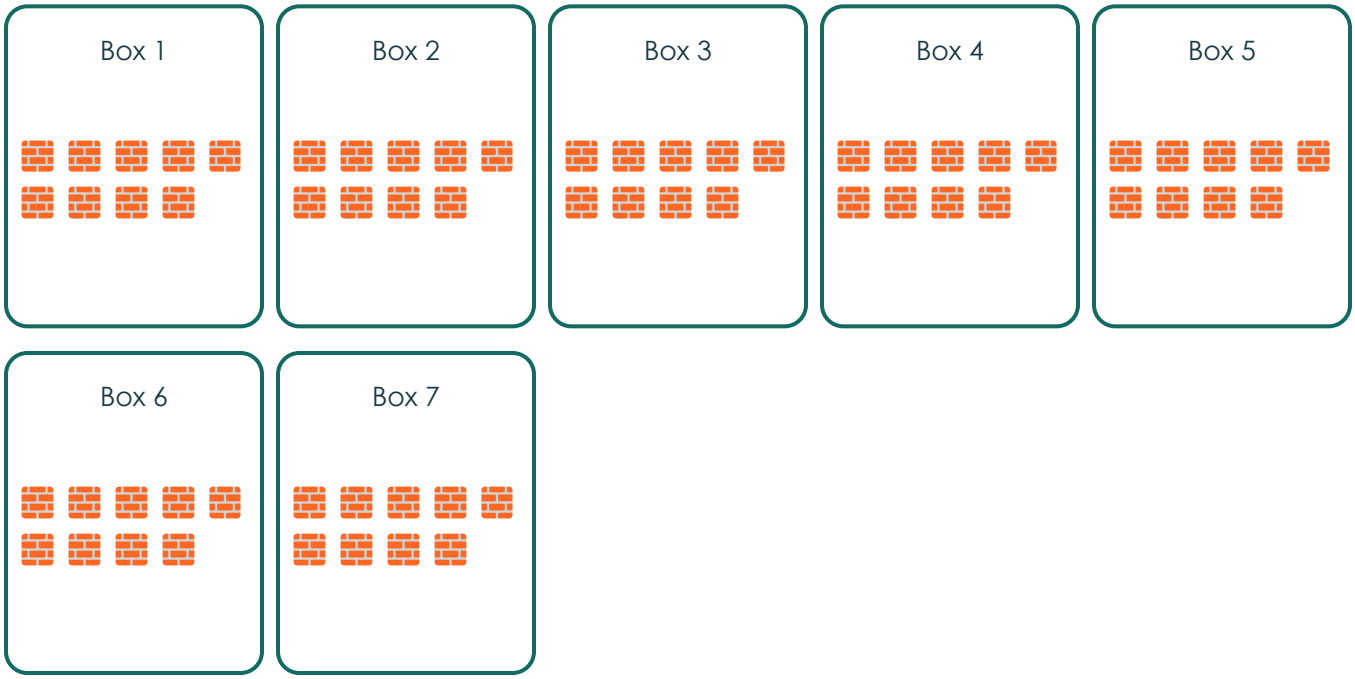

_____ groups x _____ in each = _____ altogether

[ ] I finished this question.

24. Make equal groups of blocks

Make 7 boxes. Put 9 blocks in each box. Count all the pictures. How many blocks are there altogether?

Ontario Math · B2.6 - Represent multiplication as 7 repeated equal groups of 9 and find the total.

Number of groups: _____ Objects in each group: _____

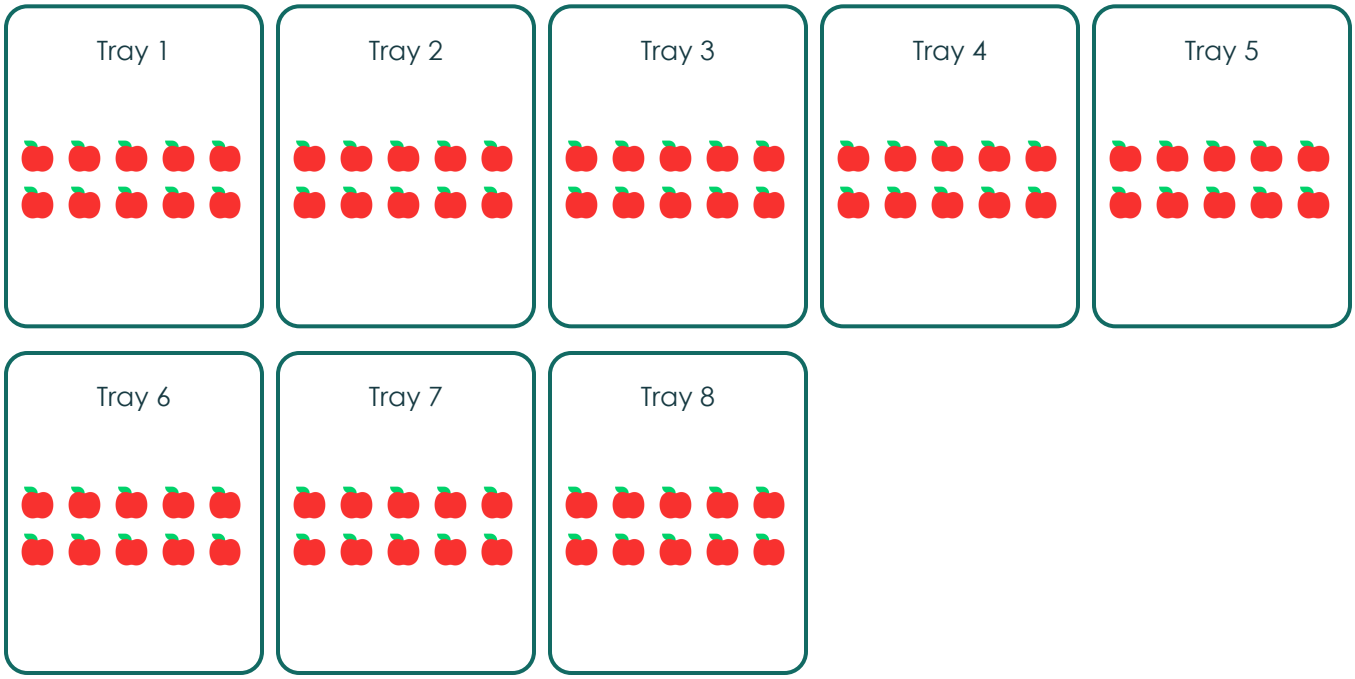

_____ groups x _____ in each = _____ altogether

[ ] I finished this question.

25. Make equal groups of apples

Make 8 trays. Put 10 apples in each tray. Count all the pictures. How many apples are there altogether?

Ontario Math · B2.6 - Represent multiplication as 8 repeated equal groups of 10 and find the total.

Number of groups: _____ Objects in each group: _____

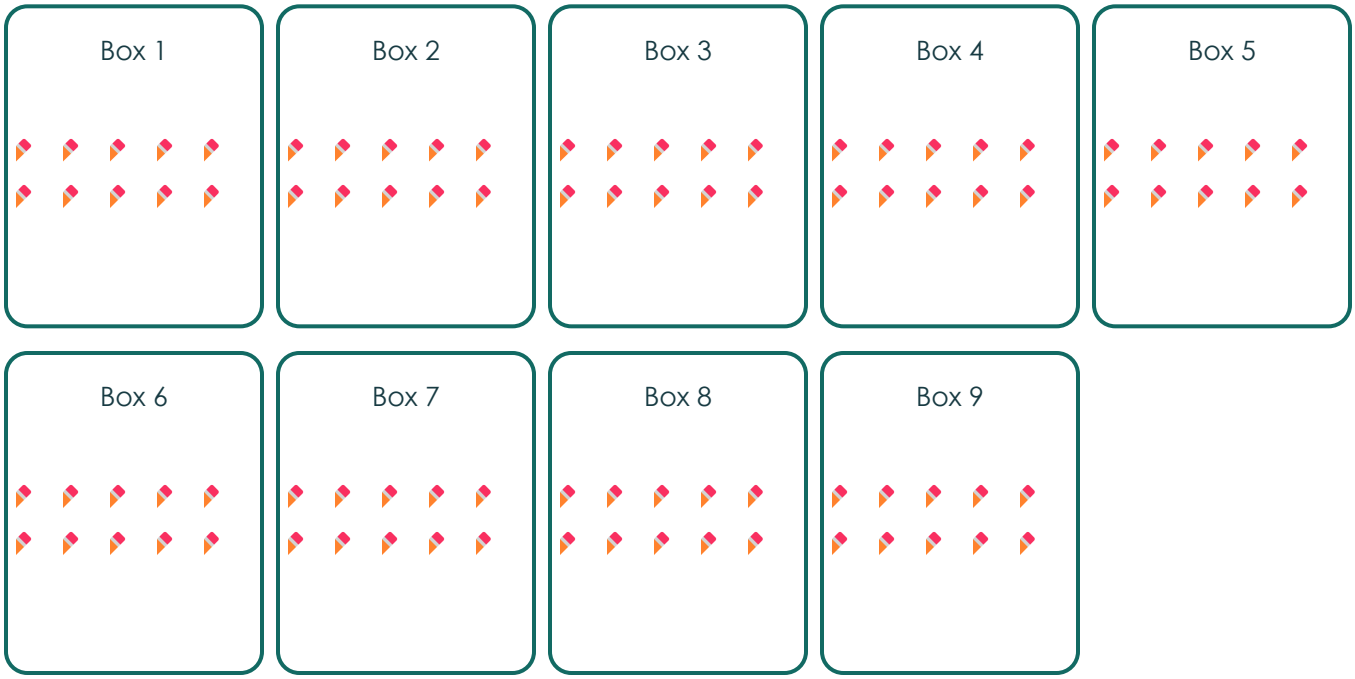

_____ groups x _____ in each = _____ altogether

[ ] I finished this question.

26. Make equal groups of pencils

Make 9 boxes. Put 10 pencils in each box. Count all the pictures. How many pencils are there altogether?

Ontario Math · B2.6 - Represent multiplication as 9 repeated equal groups of 10 and find the total.

Number of groups: _____ Objects in each group: _____

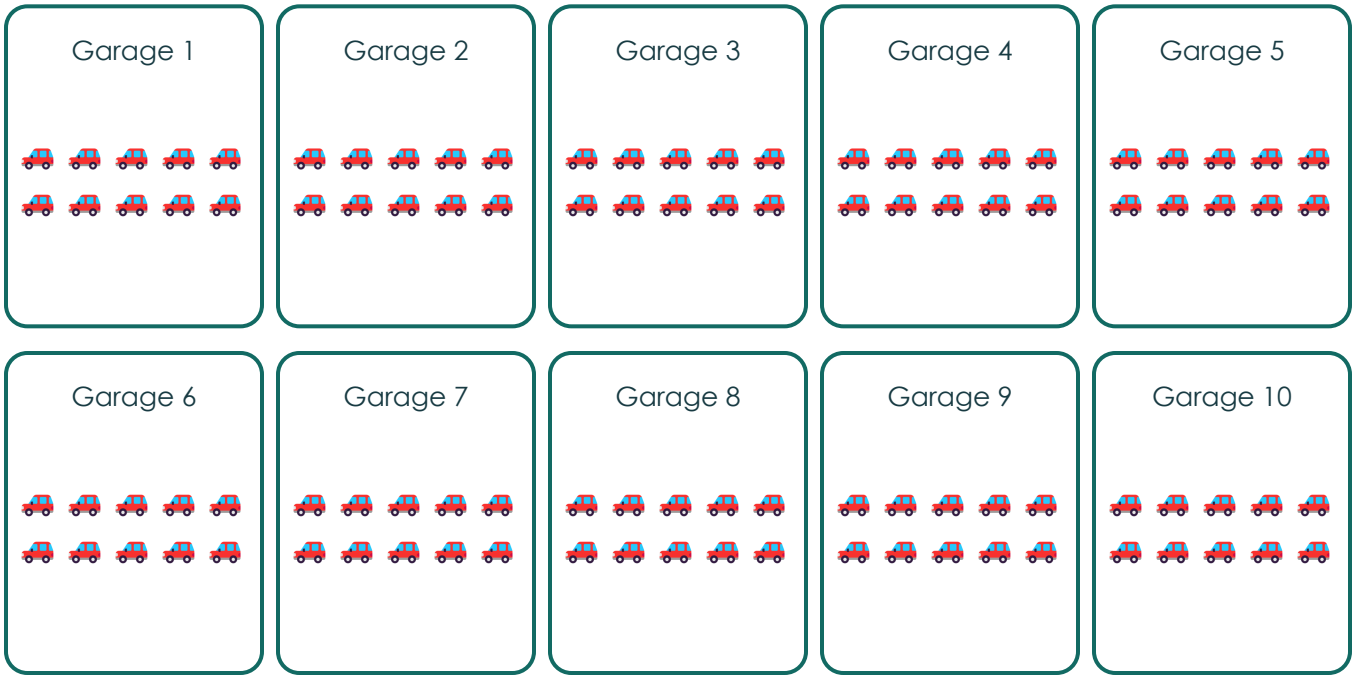

_____ groups x _____ in each = _____ altogether

[ ] I finished this question.

27. Make equal groups of toy cars

Make 10 garages. Put 10 toy cars in each garage. Count all the pictures. How many toy cars are there altogether?

Ontario Math · B2.6 - Represent multiplication as 10 repeated equal groups of 10 and find the total.

Number of groups: _____ Objects in each group: _____

_____ groups x _____ in each = _____ altogether

[ ] I finished this question.

28. Make equal groups of stars

Make 2 cards. Put 2 stars in each card. Count all the pictures. How many stars are there altogether?

Ontario Math · B2.6 - Represent multiplication as 2 repeated equal groups of 2 and find the total.

Card 1

Card 2

Number of groups: _____ Objects in each group: _____

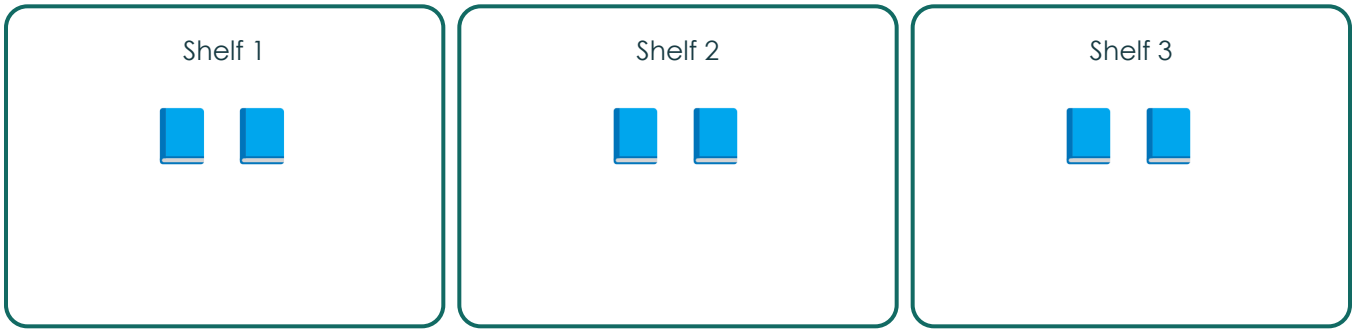

_____ groups x _____ in each = _____ altogether

[ ] I finished this question.

29. Make equal groups of books

Make 3 shelves. Put 2 books in each shelf. Count all the pictures. How many books are there altogether?

Ontario Math · B2.6 - Represent multiplication as 3 repeated equal groups of 2 and find the total.

Number of groups: _____ Objects in each group: _____

_____ groups x _____ in each = _____ altogether

[ ] I finished this question.

30. Make equal groups of balls

Make 4 baskets. Put 2 balls in each basket. Count all the pictures. How many balls are there altogether?

Ontario Math · B2.6 - Represent multiplication as 4 repeated equal groups of 2 and find the total.

Number of groups: _____ Objects in each group: _____

_____ groups x _____ in each = _____ altogether

[ ] I finished this question.

Inspire Work Bench G · Answer guide

1. 3 groups of 6; 3 x 6 = 18.
2. 3 groups of 2; 3 x 2 = 6.
3. 4 groups of 2; 4 x 2 = 8.
4. 5 groups of 3; 5 x 3 = 15.
5. 6 groups of 3; 6 x 3 = 18.
6. 7 groups of 3; 7 x 3 = 21.
7. 8 groups of 4; 8 x 4 = 32.
8. 9 groups of 4; 9 x 4 = 36.
9. 10 groups of 4; 10 x 4 = 40.
10. 2 groups of 5; 2 x 5 = 10.
