Math Mall 1

Excite - Grade 2

Five days of Math

Each day has 10 questions. You can start on any day. Look at the pictures. Circle choices, tick boxes and mark the diagrams. A grown-up can read with you.

Name: _____

The matching HTML shows one question at a time. Tap Next question to move on. All parts of a Math question appear together on its page. You can check each answer online.

Day covers: 2, 13, 24, 35 and 46.

Math Mall 1

Excite - Day 1

10 Math questions

Name: _____ Date: _____

This day has its own work. Start here whenever you are ready. Save your online answers when you finish. Your teacher assesses this day separately.

Excite Math 1: Whole or cut? Sort the pictures

Sort the picture cards

Ontario Math: D1.1 - Sort the pictured objects by both rules using the sorting boxes. · B1.1 - Count the picture cards and represent the number in each requested group.

Look at each picture. Can you see a cut piece? Write each card letter in a whole or cut-pieces box. Check if it is a fruit or vegetable too. Count the fruit cards.

A - Whole apple

B - Orange with a cut piece

C - Whole carrot

D - Cucumber with slices

E - Watermelon with a cut piece

F - Whole pear

Fruit: whole	Card letters: _____
Fruit: cut pieces shown	Card letters: _____
Vegetable: whole	Card letters: _____
Vegetable: cut pieces shown	Card letters: _____

How many fruit cards are there?

[ ] 4 [ ] 6 [ ] 3

[ ] I finished this question.

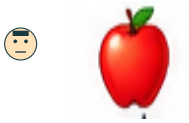

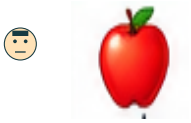

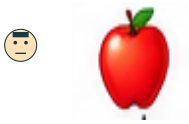

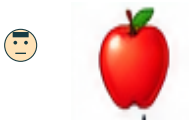

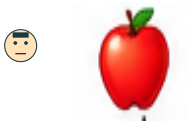

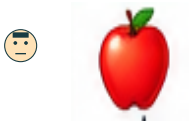

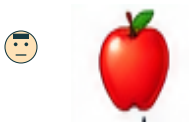

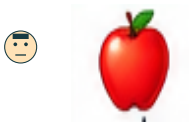

Excite Math 2: Count 20 children's snack choices

Count and compare

Ontario Math: B1.1 - Count the picture cards and represent the number in each requested group.

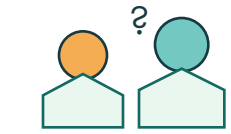

20 children picked a snack. Each card is one child's answer. Count the cards in each group. Tap + to add to your count. Tap a card when you have counted it. It will say Selected.

 Child 1: apple [ ] Counted	 Child 2: carrot [ ] Counted	 Child 3: apple [ ] Counted	 Child 4: pear [ ] Counted	 Child 5: carrot [ ] Counted
 Child 6: apple [ ] Counted	 Child 7: pear [ ] Counted	 Child 8: carrot [ ] Counted	 Child 9: apple [ ] Counted	 Child 10: carrot [ ] Counted
 Child 11: apple [ ] Counted	 Child 12: pear [ ] Counted	 Child 13: carrot [ ] Counted	 Child 14: apple [ ] Counted	 Child 15: pear [ ] Counted
 Child 16: carrot [ ] Counted	 Child 17: apple [ ] Counted	 Child 18: carrot [ ] Counted	 Child 19: apple [ ] Counted	 Child 20: pear [ ] Counted

Category	Tally marks	Count
Apple		
Carrot		
Pear		

[ ] I finished this question.

Excite Math 3: Make the apple graph

Count the children

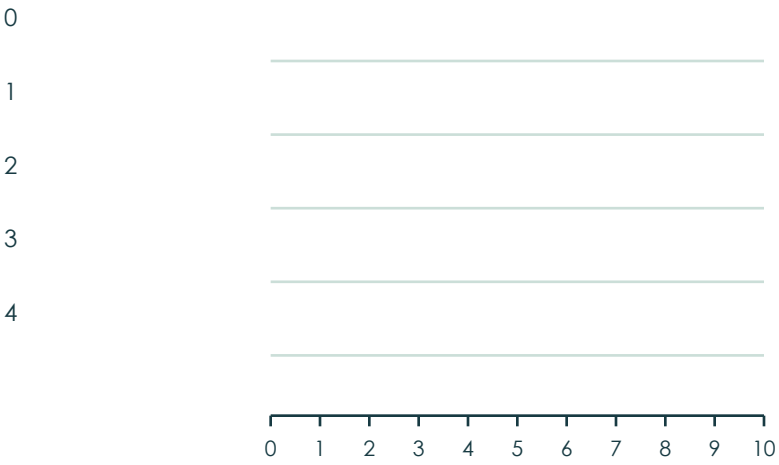

Ontario Math: D1.3 - Build bars to match the table, using a scale of 1 students per step.

Each number shows how many apples a child ate. Count the children in a row. Find the same apple number on the graph and draw a bar for that many children. Each marked step means 1 child.

Apples eaten by each child	Count the children
0	
1	
2	
3	
4	

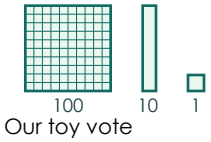

My bar graph

Each step = 1 child

[ ] I finished this question.

Excite Math 4: Our play-time toy vote

Our toy vote

Ontario Math: D1.3 - Build the picture graph from the table; each circle represents 1 child.

12 children vote for a toy to use at play time. Each child picks ONE toy. Count the children in each toy row. Draw the same number of child pictures on the matching graph row. Each child picture means one child.

Toy	Count the children
Blocks	
Toy cars	
Puzzles	

Toys picked for play time

Source: fictional class data. Each child picture = 1 child

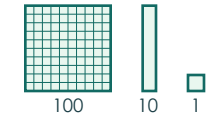

Blocks

Toy cars

Puzzles

[ ] I finished this question.

Excite Math 5: More stickers for our sticker box

Add the stickers

Ontario Math: B2.4 - Use the blocks to add 27 and 12.

Our sticker box has 27 stickers. We add 12 new stickers. How many stickers are in the box now? The blocks show both groups. Use them to help you add.

27 stickers already in the box

Big square = 100; stick = 10; little block = 1

12 new stickers

Big square = 100; stick = 10; little block = 1

My number: _____

[ ] I finished this question.

Excite Math 6: Make trays of apples

Make equal groups

Ontario Math: B2.5 - Build 3 equal groups of 3 objects and count the total.

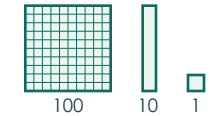

We are putting apples in trays. Look at the picture. There are 3 trays. Each holds 3. Count all the pictures. How many are there altogether?

Tray 1	
Tray 2	
Tray 3	

My number: _____

[ ] I finished this question.

Excite Math 7: Sticks and a number pattern

Read it. Build it!

Ontario Math: B1.1 - Read and build the stated whole numbers using place-value bundles and loose ones. · C1.3 - Use the add-1 pattern rule to find the next three numbers, with the block pictures as a guide.

Read the sticks. Circle the number they show. Then draw bundles and loose sticks to build the number. A bundle marked 10 is one ten. A loose stick is one.

Read the sticks

Circle one: 40 / 50 / 51

Read the sticks

Circle one: 51 / 52 / 53

Read the sticks

Circle one: 55 / 56 / 57

Read the sticks

Circle one: 3 / 13 / 14

Build 43 with sticks

Expanded form: _____ + _____ = _____

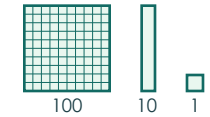

Finish the number pattern

Count on by 1: 56, 57, 58, __, __, __. Use the blocks. Circle each missing number.

[ ] I finished this question.

Excite Math 8: Jump back by 2

Follow the jumps

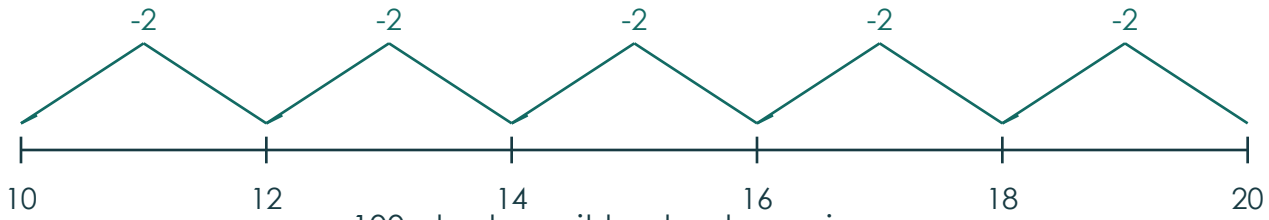

Ontario Math: B1.4 - Count back in steps of 2 to fill the missing numbers. · C1.3 - Use the repeating subtract-2 rule to find missing terms.

Start at 20. Jump back by 2. Circle the missing numbers.

Circle one number below each blank.

20 **18** **16** ____ ____ ____

12 / 14 / 16 10 / 12 / 14 8 / 10 / 12

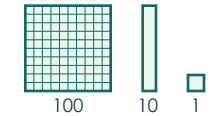

100-chart: use it to check your jumps

1	2	3	4	5	6	7	8	9	10
11	12	13	14	15	16	17	18	19	20

81	82	83	84	85	86	87	88	89	90
91	92	93	94	95	96	97	98	99	100

[ ] I finished this question.

Excite Math 9: Compare our toy cars

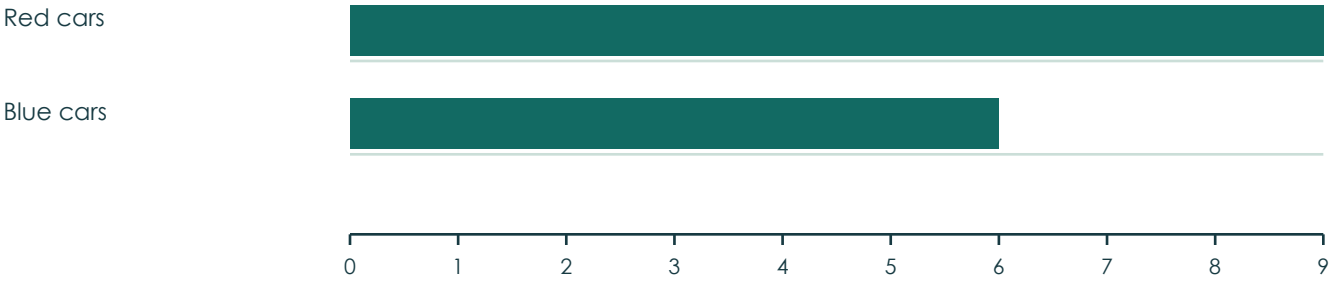

Compare our cars

Ontario Math: B2.4 - Match pictures of 9 red cars and 6 blue cars to find the difference.

Our toy box has 9 red cars and 6 blue cars. The pictures show the cars. How many MORE red cars are there? Write your answer below.

Cars in our toy box

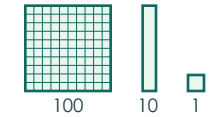

Source: fictional class data. Number of cars; scale of 1

My number: _____

[ ] I finished this question.

Excite Math 10: Count on to subtract

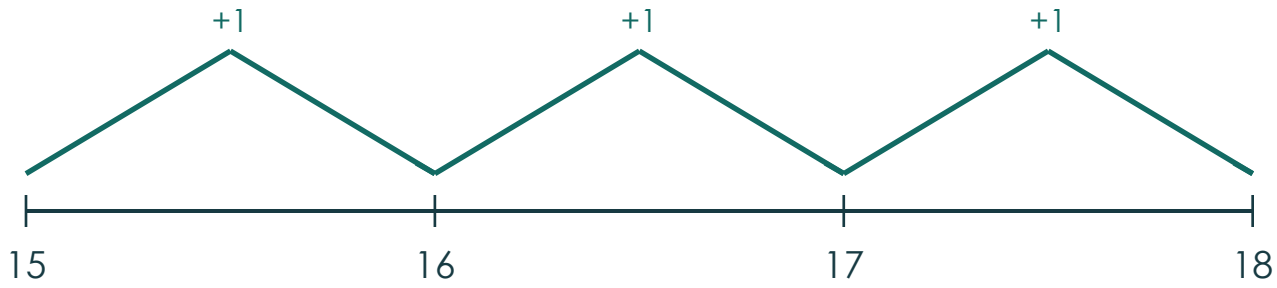

Count the jumps

Ontario Math: B2.2 - Model the related subtraction fact by counting on from the smaller number to the larger number.

18 - 15 = ? Start at 15. Count on to 18. How many jumps do you make?

18 - 15 = ?

Circle one: 2 / 3 / 4

[ ] I finished this question.

Math Mall 1

Excite - Day 2

10 Math questions

Name: _____ Date: _____

This day has its own work. Start here whenever you are ready. Save your online answers when you finish. Your teacher assesses this day separately.

Excite Math 1: Red, circles, or both?

Sort by colour and shape

Ontario Math: D1.1 - Sort shapes by two attributes, colour and shape, using an overlapping Venn diagram.

Sort the shapes. Left circle: red shapes. Right circle: circles. Put red circles in the middle. Put shapes that match neither rule in the box below.

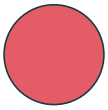

A red circle matches both rules. It goes in the middle.

A - Red square

B - Blue circle

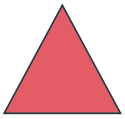

C - Large red circle

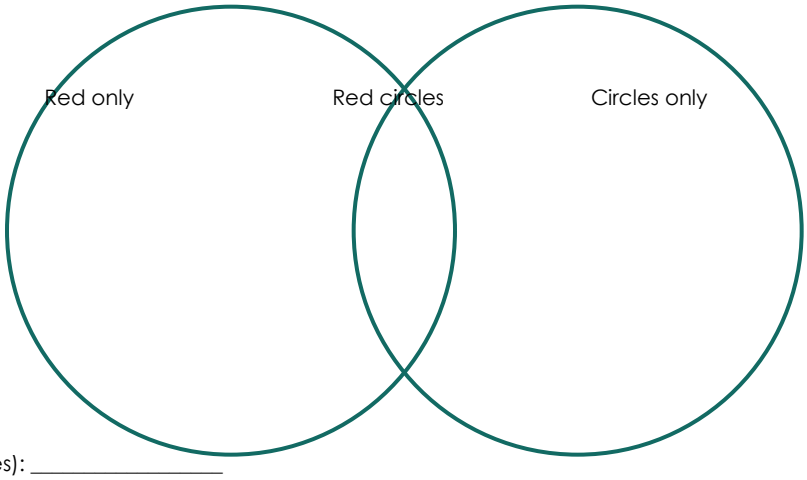

D - Blue square

E - Small red circle

F - Red triangle

Neither (outside the circles): _____

[ ] I finished this question.

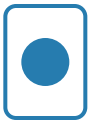

Excite Math 2: Sort 20 game cards

Count all 20 game cards

Ontario Math: D1.2 - Organize 20 game cards in a two-way tally table using colour and symbol.

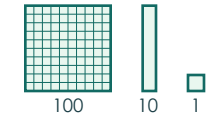

There are 20 game cards. Each card has a colour and a symbol. Count red stars, red circles, blue stars and blue circles. Tick Counted on each card. Make tally marks and write each group's total.

 Card 1: red / star [ ] Counted	 Card 2: blue / circle [ ] Counted	 Card 3: red / circle [ ] Counted	 Card 4: red / star [ ] Counted	 Card 5: blue / star [ ] Counted
 Card 6: red / circle [ ] Counted	 Card 7: blue / circle [ ] Counted	 Card 8: red / circle [ ] Counted	 Card 9: red / star [ ] Counted	 Card 10: blue / circle [ ] Counted
 Card 11: red / circle [ ] Counted	 Card 12: red / star [ ] Counted	 Card 13: blue / star [ ] Counted	 Card 14: red / circle [ ] Counted	 Card 15: blue / circle [ ] Counted
 Card 16: red / circle [ ] Counted	 Card 17: red / star [ ] Counted	 Card 18: blue / circle [ ] Counted	 Card 19: red / circle [ ] Counted	 Card 20: red / star [ ] Counted

Category	Tally marks	Count
Red / star		
Red / circle		
Blue / star		
Blue / circle		

[ ] I finished this question.

Excite Math 3: Make a pet bar graph

Match the table

Ontario Math: D1.3 - Build bars to match the table, using a scale of 1 children per step.

12 children each vote for ONE pet they like. Count the pictures in each row. Draw a bar on the matching graph row. Each marked step means 1 child.

Choice	Count the children
Cats	
Dogs	
Fish	

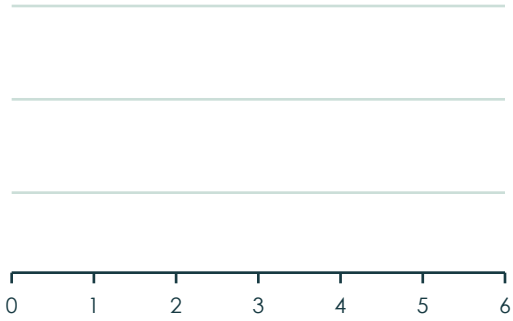

My bar graph

Each step = 1 child

Cats

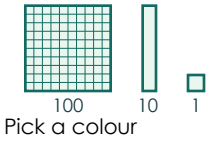

Dogs

Fish

[ ] I finished this question.

Excite Math 4: Paint for our pictures

Pick a colour

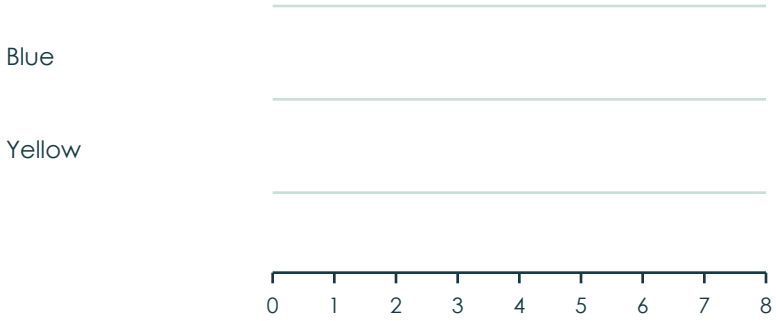

Ontario Math: D1.3 - Build bars to match the table, using a scale of 1 children per step.

13 children each pick ONE paint colour for a picture. Count the pictures in each row. Draw a bar on the matching graph row. Each marked step means 1 child.

Paint colour	Count the children
Red	
Blue	
Yellow	

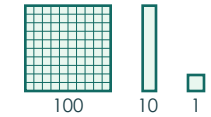

My bar graph

Each step = 1 child

[ ] I finished this question.

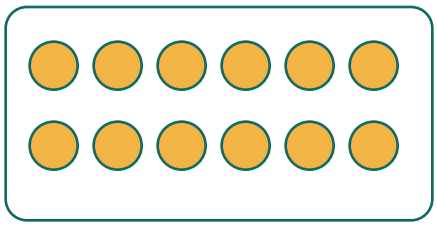

Excite Math 5: What happens when we use zero?

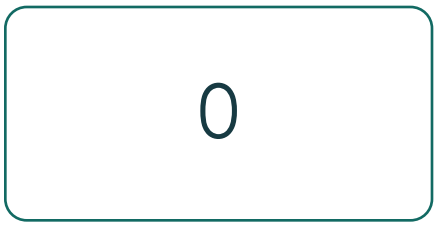

Zero means none

Ontario Math: B2.1 - Use the zero property: adding or subtracting zero leaves the pictured quantity unchanged.

There are 12 counters. Add none. Take away none. Look at the full box and the empty box. Tap an answer for each number sentence.

12 counters

No counters

12 + 0 = _____

Circle one: 0 / 12 / 13

0 + 12 = _____

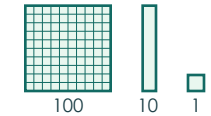

Circle one: 0 / 11 / 12

12 - 0 = _____

Circle one: 0 / 11 / 12

[ ] I finished this question.

Excite Math 6: Fill boxes with pencils

Fill the boxes

Ontario Math: B2.5 - Build 4 equal groups of 3 objects and count the total.

We are putting pencils in boxes. Look at the picture. There are 4 boxes. Each holds 3. Count all the pictures. How many are there altogether?

Box 1	
Box 2	
Box 3	
Box 4	

My number: _____

[ ] I finished this question.

Excite Math 7: Whole or cut? Sort the pictures

Sort the picture cards

Ontario Math: D1.1 - Sort the pictured objects by both rules using the sorting boxes.

Look at each picture. Can you see a cut piece? Write each card letter in a whole or cut-pieces box. Check if it is a fruit or vegetable too.

A - Whole apple

B - Cucumber with slices

C - Lemon with a cut piece

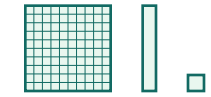

D - Whole pepper

Fruit: whole	Card letters: _____
Fruit: cut pieces shown	Card letters: _____
Vegetable: whole	Card letters: _____
Vegetable: cut pieces shown	Card letters: _____

[ ] I finished this question.

Excite Math 8: Read and build with sticks

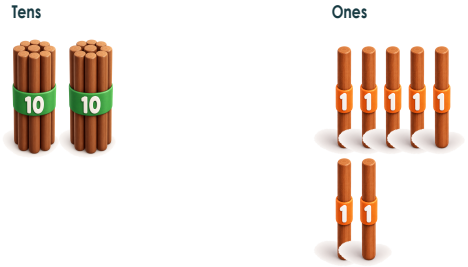

Read it. Build it!

Ontario Math: B1.1 - Read and build the stated whole numbers using place-value bundles and loose ones.

Read the sticks. Circle the number they show. Then draw bundles and loose sticks to build the number. A bundle marked 10 is one ten. A loose stick is one.

Read the sticks

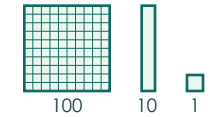

Circle one: 17 / 27 / 28

Build 67 with sticks

Expanded form: _____ + _____ = _____

[ ] I finished this question.

Excite Math 9: Jump back by 5

Follow the jumps

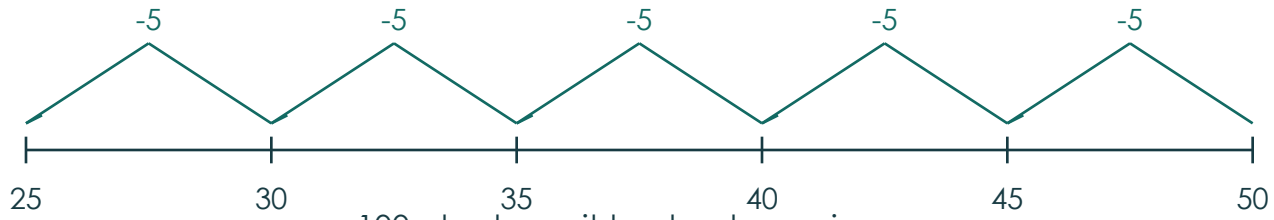

Ontario Math: B1.4 - Count back in steps of 5 to fill the missing numbers. · C1.3 - Use the repeating subtract-5 rule to find missing terms.

Start at 50. Jump back by 5. Circle the missing numbers.

Circle one number below each blank.

50 **45** **40** ____ ____ ____

30 / 35 / 40 25 / 30 / 35 20 / 25 / 30

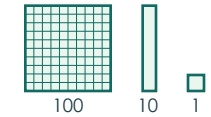

100-chart: use it to check your jumps

1	2	3	4	5	6	7	8	9	10
11	12	13	14	15	16	17	18	19	20
21	22	23	24	25	26	27	28	29	30
31	32	33	34	35	36	37	38	39	40
41	42	43	44	45	46	47	48	49	50
51	52	53	54	55	56	57	58	59	60
61	62	63	64	65	66	67	68	69	70

[ ] I finished this question.

Excite Math 10: Compare our toy cars

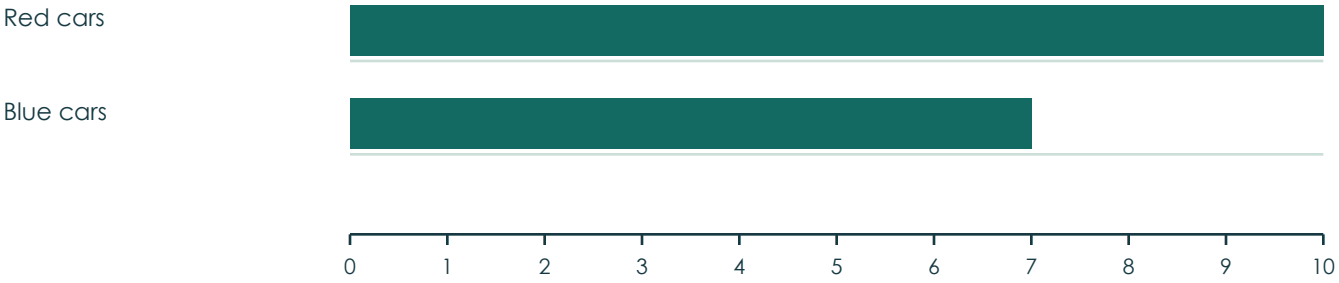

Compare our cars

Ontario Math: B2.4 - Use the bars to find the difference between 10 and 7.

Our toy box has 10 red cars and 7 blue cars. The bars show the cars. How many MORE red cars are there? Write your answer below.

Cars in our toy box

Source: fictional class data. Number of cars; scale of 1

My number: _____

[ ] I finished this question.

Math Mall 1

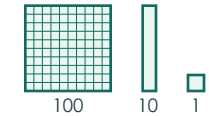

Excite - Day 3

10 Math questions

Name: _____ Date: _____

This day has its own work. Start here whenever you are ready. Save your online answers when you finish. Your teacher assesses this day separately.

Excite Math 1: Sort the toy box

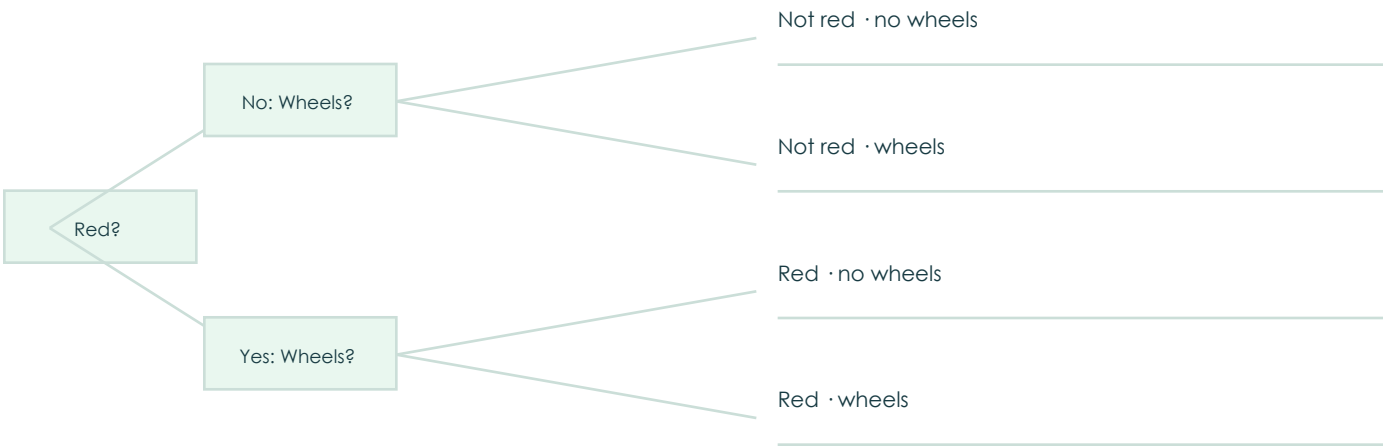

Tidy the toys

Ontario Math: D1.1 - Sort the pictured objects by both rules using the tree diagram.

Help tidy the toy box. Look at each toy card. First ask: Is it red? Then ask: Does it have wheels? Follow Yes or No to find its box.

Cards: A - Red car; B - Red ball; C - Blue car; D - Blue ball

[ ] I finished this question.

Excite Math 2: Ask about our library books

Ask two things

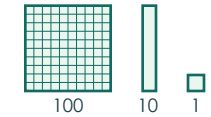

Ontario Math: D1.2 - Choose a survey question that collects both pieces of information named in the task.

We want to find out what books children like. We need TWO answers: the kind of book and how they like to read it. Which question asks for both?

Circle one: What kind of book do you like, and do you read it alone or with someone? / What kind of book do you like? / Do you read alone or with someone?

[ ] I finished this question.

Excite Math 3: Make a school-travel bar graph

Match the table

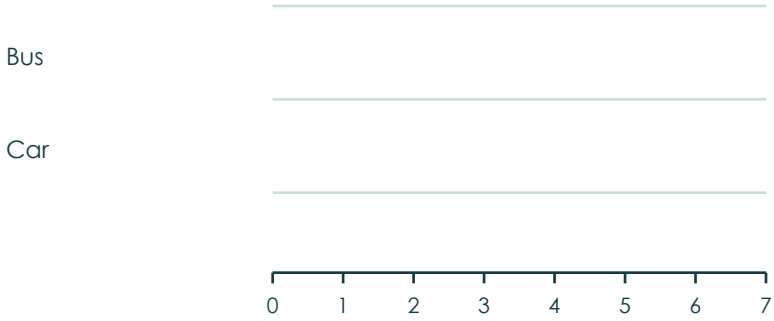

Ontario Math: D1.3 - Build bars to match the table, using a scale of 1 children per step.

15 children tell us how they came to school today. Count the pictures in each row. Draw a bar on the matching graph row. Each marked step means 1 child.

Choice	Count the children
Walk	
Bus	
Car	

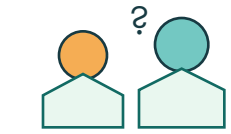

My bar graph

Each step = 1 child

[ ] I finished this question.

Excite Math 4: Which game got the most votes?

Our recess vote

Ontario Math: D1.4 - Find the most frequent choice or choices in the displayed votes: the mode or modes.

16 children each vote for ONE game to play at recess. Look at their votes in the bar graph. Which game got the most votes? The choice picked most often is called the mode.

Our recess game vote

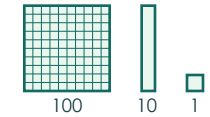

Source: fictional class data. Number of children; scale of 1

Circle one: Tag / Hide-and-seek / Hopscotch

[ ] I finished this question.

Excite Math 5: Count by 20

Follow the jumps

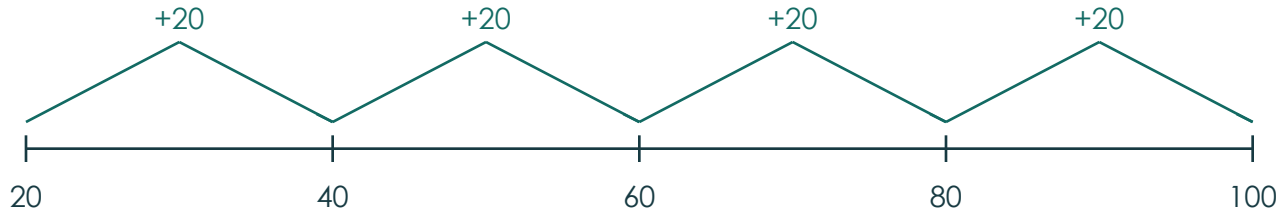

Ontario Math: B1.4 - Count forward in steps of 20 to fill the missing numbers. · C1.3 - Use the repeating add-20 rule to find missing terms.

Each box holds 20 pencils. Count the pencils as we add boxes. Start at 20. Jump forward by 20. Circle the missing numbers.

Circle one number below each blank.

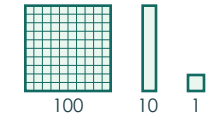

20 **40** _____ _____ _____

40 / 60 / 80 60 / 80 / 100 80 / 100 / 120

[ ] I finished this question.

Excite Math 6: Fill boxes with toy cars

Fill the boxes

Ontario Math: B2.5 - Build 5 equal groups of 3 objects and count the total.

We are putting toy cars in boxes. Look at the picture. There are 5 boxes. Each holds 3. Count all the pictures. How many are there altogether?

Box 1	
Box 2	
Box 3	
Box 4	
Box 5	

My number: _____

[ ] I finished this question.

Excite Math 7: Whole or cut? Sort the pictures

Sort the picture cards

Ontario Math: D1.1 - Sort the pictured objects by both rules using the sorting boxes.

Look at each picture. Can you see a cut piece? Write each card letter in a whole or cut-pieces box. Check if it is a fruit or vegetable too.

A - Whole apple

B - Cucumber with slices

C - Lemon with a cut piece

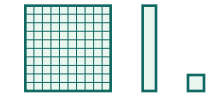

D - Whole pepper

Fruit: whole	Card letters: _____
Fruit: cut pieces shown	Card letters: _____
Vegetable: whole	Card letters: _____
Vegetable: cut pieces shown	Card letters: _____

[ ] I finished this question.

Excite Math 8: Read and build with sticks

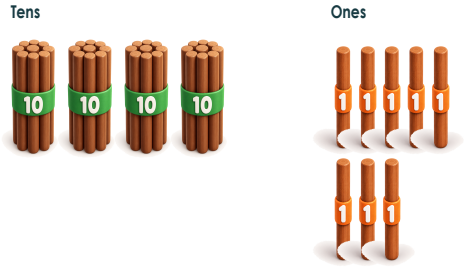

Read it. Build it!

Ontario Math: B1.1 - Read and build the stated whole numbers using place-value bundles and loose ones.

Read the sticks. Circle the number they show. Then draw bundles and loose sticks to build the number. A bundle marked 10 is one ten. A loose stick is one.

Read the sticks

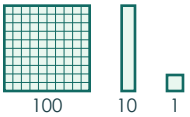

Circle one: 38 / 48 / 49

Build 54 with sticks

Expanded form: _____ + _____ = _____

[ ] I finished this question.

Excite Math 9: Jump back by 10

Follow the jumps

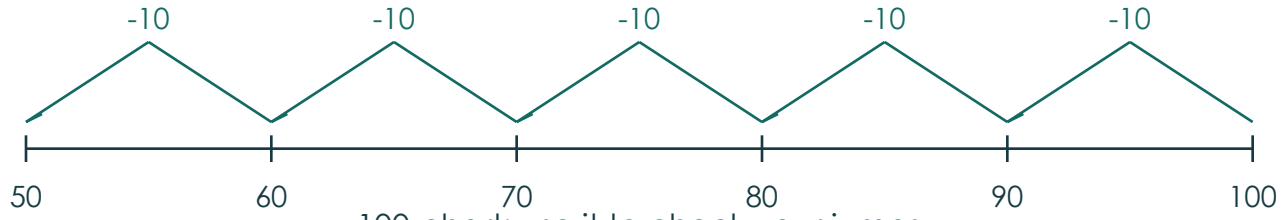

Ontario Math: B1.4 - Count back in steps of 10 to fill the missing numbers. · C1.3 - Use the repeating subtract-10 rule to find missing terms.

Start at 100. Jump back by 10. Circle the missing numbers.

Circle one number below each blank.

100 **90** **80** ____ ____ ____

60 / 70 / 80 50 / 60 / 70 40 / 50 / 60

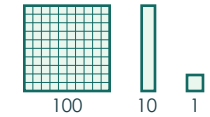

100-chart: use it to check your jumps

1	2	3	4	5	6	7	8	9	10
11	12	13	14	15	16	17	18	19	20

[ ] I finished this question.

Excite Math 10: Count on to subtract

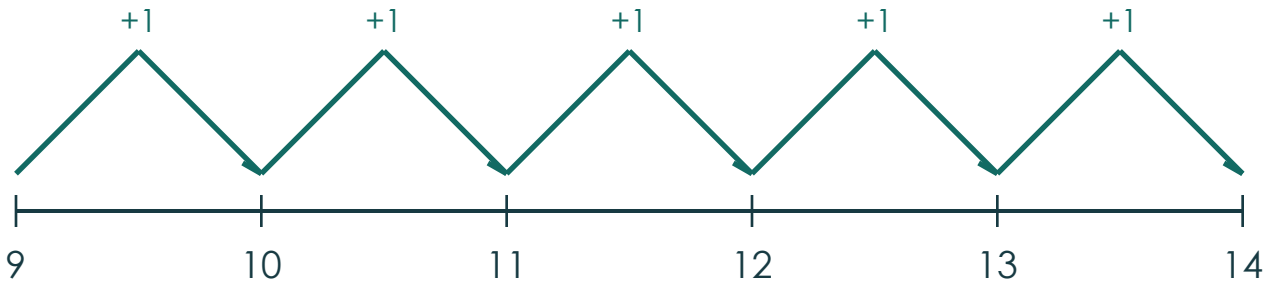

Count the jumps

Ontario Math: B2.2 - Model the related subtraction fact by counting on from the smaller number to the larger number.

14 - 9 = ? Start at 9. Count on to 14. How many jumps do you make?

14 - 9 = ?

Circle one: 4 / 5 / 6

[ ] I finished this question.

Math Mall 1

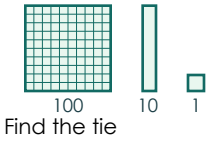

Excite - Day 4

10 Math questions

Name: _____ Date: _____

This day has its own work. Start here whenever you are ready. Save your online answers when you finish. Your teacher assesses this day separately.

Excite Math 1: Two favourite play-time choices

Find the tie

Ontario Math: D1.4 - Find the most frequent choice or choices in the displayed votes: the mode or modes.

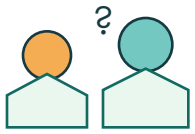

15 children each vote for ONE play-time activity. Look at the table. Which TWO activities have the most votes? They tie, so both are modes.

Category	Count
Drawing	6
Building	6
Puzzles	3

Circle one: Drawing and building / Drawing only / Puzzles only

[ ] I finished this question.

Excite Math 2: Compare playground choices

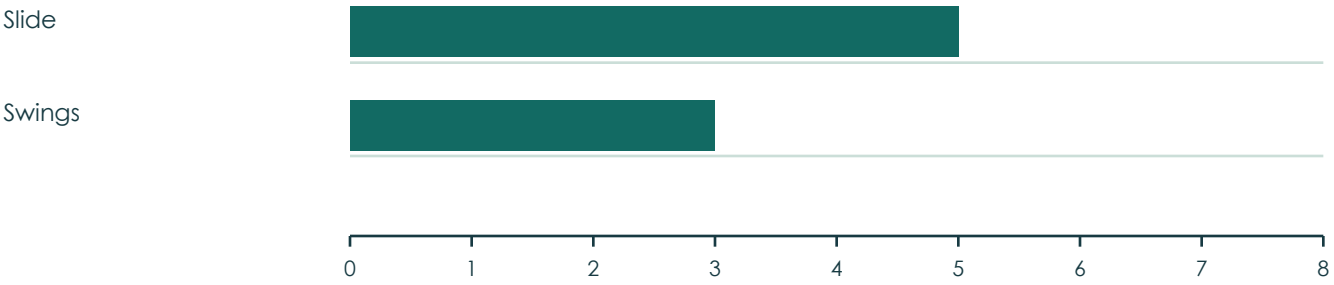

Compare the bars

Ontario Math: D1.5 - Read the displayed table or graph and compare the counts to answer the question. · B1.2 - Compare the given numbers or place-value models and choose the correct number or comparison sign.

Eight children picked a playground activity. Look at the bars. Which activity did more children pick?

Playground choices

Source: fictional class data. Number of children; scale of 1

Circle one: Slide / Swings / The same number

[ ] I finished this question.

Excite Math 3: Make a book bar graph

Match the table

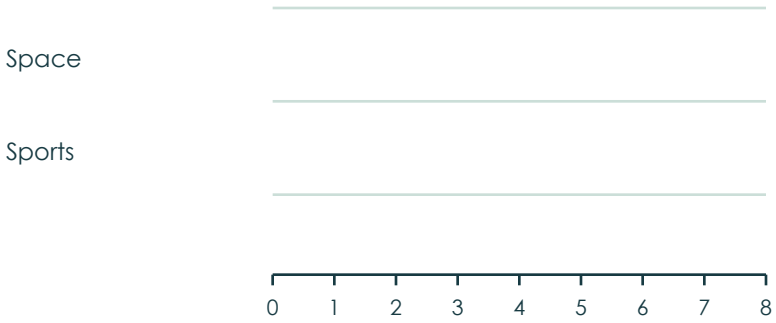

Ontario Math: D1.3 - Build bars to match the table, using a scale of 1 children per step.

18 children each pick ONE kind of library book. Count the pictures in each row. Draw a bar on the matching graph row. Each marked step means 1 child.

Choice	Count the children
Animals	
Space	
Sports	

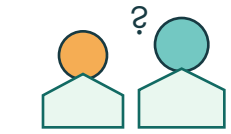

My bar graph

Each step = 1 child

[ ] I finished this question.

Excite Math 4: Make pairs for a game

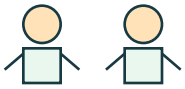

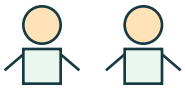

Count the pairs

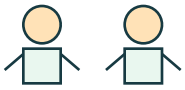

Ontario Math: B1.5 - Use pairs to show that 12 is even because no child is left over.

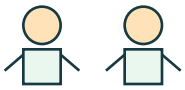

12 children make pairs for a game. Each pair has 2 children. Look at the pairs. How many pairs are there?

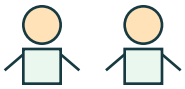

Each pair has two children

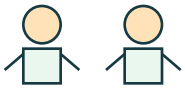

Group 1 

Group 2 

Group 3 

Group 4 

Group 5 

Group 6 

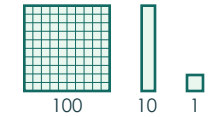

My number: _____

Is 12 odd or even?

[ ] Even: all children can form pairs. [ ] Odd: one child must be left over.

[ ] I finished this question.

Excite Math 5: Count by 25

Follow the jumps

Ontario Math: B1.4 - Count forward in steps of 25 to fill the missing numbers. · C1.3 - Use the repeating add-25 rule to find missing terms.

Each sticker sheet has 25 stickers. Count the stickers as we add sheets. Start at 25. Jump forward by 25. Circle the missing numbers.

Circle one number below each blank.

25

_____ 25 / 50 / 75

_____ 50 / 75 / 100

_____ 75 / 100 / 125

[ ] I finished this question.

Excite Math 6: Fill boxes with books

Fill the boxes

Ontario Math: B2.5 - Build 6 equal groups of 3 objects and count the total.

We are putting books in boxes. Look at the picture. There are 6 boxes. Each holds 3. Count all the pictures. How many are there altogether?

Box 1	
Box 2	
Box 3	
Box 4	
Box 5

Excite Math 4: Our outdoor game vote

Our outdoor game vote

Ontario Math: D1.4 - Find the most frequent choice or choices in the displayed votes: the mode or modes. · D1.5 - Read the displayed table or graph and compare the counts to answer the question.

13 children each pick ONE outdoor game. Each circle in the picture graph means one child. Which game did the most children pick?

Outdoor games picked

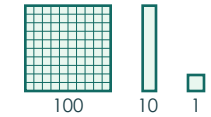

Source: fictional class data. Each whole circle = 1 child

Tag	● ● ● ● ● ●
Skipping	● ● ●
Hopscotch	● ● ● ●

Circle one: Tag / Skipping / Hopscotch

[ ] I finished this question.

Excite Math 5: More stickers for our sticker box

Add the stickers

Ontario Math: B2.4 - Use the blocks to add 39 and 16.

Our sticker box has 39 stickers. We add 16 new stickers. How many stickers are in the box now? The blocks show both groups. Use them to help you add.

39 stickers already in the box

Big square = 100; stick = 10; little block = 1

16 new stickers

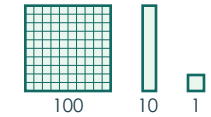

Big square = 100; stick = 10; little block = 1

My number: _____

[ ] I finished this question.

Excite Math 6: Fill boxes with building blocks

Fill the boxes

Ontario Math: B2.5 - Build 7 equal groups of 3 objects and count the total.

We are putting building blocks in boxes. Look at the picture. There are 7 boxes. Each holds 3. Count all the pictures. How many are there altogether?

Box 1	
Box 2	
Box 3	
Box 4	
Box 5

Box 7	

My number: _____

[ ] I finished this question.

Excite Math 7: Sort in a Carroll diagram

Sort the picture cards

Ontario Math: D1.1 - Sort the pictured objects by both rules using the Carroll table.

This sorting table is a Carroll diagram. Find the fruit or vegetable row. Then find the whole or cut-pieces column. Write each picture-card letter in its box.

A - Whole apple

B - Cucumber with slices

C - Lemon with a cut piece

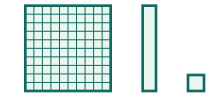

D - Whole pepper

	Whole	Cut pieces shown
Fruit	Card letters: _____	Card letters: _____
Vegetable	Card letters: _____	Card letters: _____

[ ] I finished this question.

Excite Math 8: Read and build with sticks

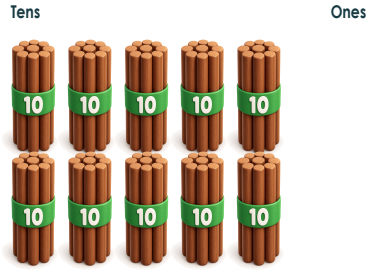

Read it. Build it!

Ontario Math: B1.1 - Read and build the stated whole numbers using place-value bundles and loose ones.

Read the sticks. Circle the number they show. Then draw bundles and loose sticks to build the number. A bundle marked 10 is one ten. A loose stick is one.

Read the sticks

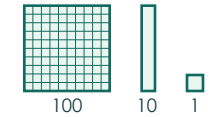

Circle one: 90 / 100 / 101

Build 69 with sticks

Expanded form: _____ + _____ = _____

[ ] I finished this question.

Excite Math 9: Count by 50

Follow the jumps

Ontario Math: B1.4 - Count forward in steps of 50 to fill the missing numbers. · C1.3 - Use the repeating add-50 rule to find missing terms.

Each bag holds 50 building blocks. Count the blocks as we add bags. Start at 50. Jump forward by 50. Circle the missing numbers.

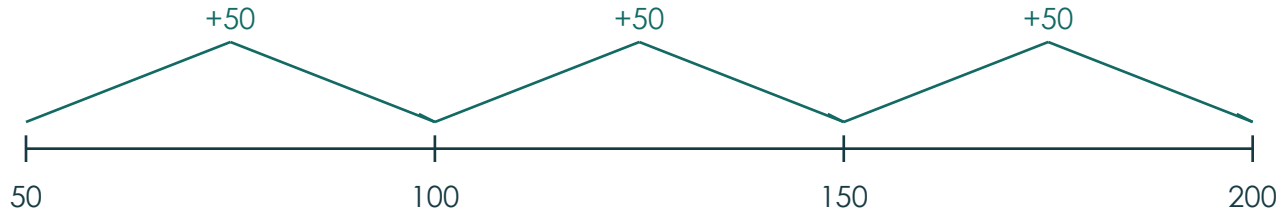

Circle one number below each blank.

50

_____ 50 / 100 / 150

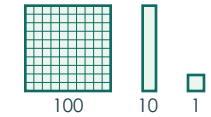

_____ 100 / 150 / 200

_____ 150 / 200 / 250

[ ] I finished this question.

Excite Math 10: Compare our toy cars

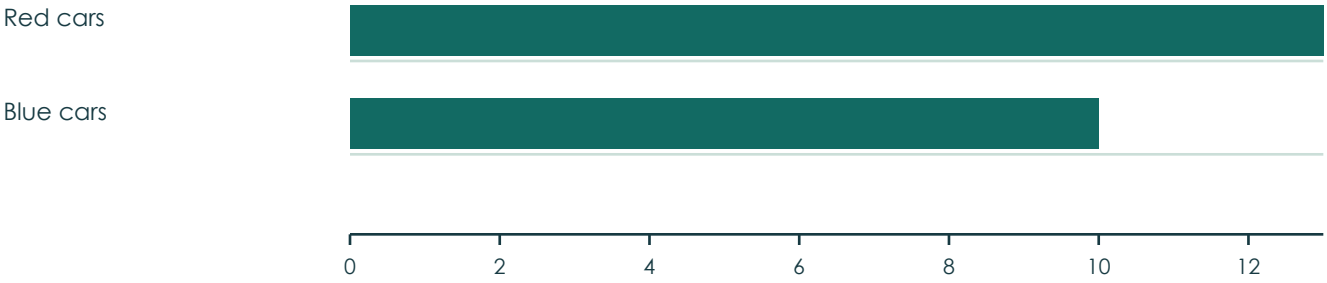

Compare our cars

Ontario Math: B2.4 - Use the bars to find the difference between 13 and 10.

Our toy box has 13 red cars and 10 blue cars. The bars show the cars. How many MORE red cars are there? Write your answer below.

Cars in our toy box

Source: fictional class data. Number of cars; scale of 1

[ ] I finished this question.

Math Mall 1

Inspire - Grade 3

Five days of Math

Each day has 10 questions. You can start on any day. Look at the pictures. Circle choices, tick boxes and mark the diagrams. A grown-up can read with you.

Name: _____

The matching HTML shows one question at a time. Tap Next question to move on. All parts of a Math question appear together on its page. You can check each answer online.

Day covers: 58, 69, 80, 91 and 102.

Math Mall 1

Inspire - Day 1

10 Math questions

Name: _____ Date: _____

This day has its own work. Start here whenever you are ready. Save your online answers when you finish. Your teacher assesses this day separately.

Inspire Math 1: Food sources and packaging

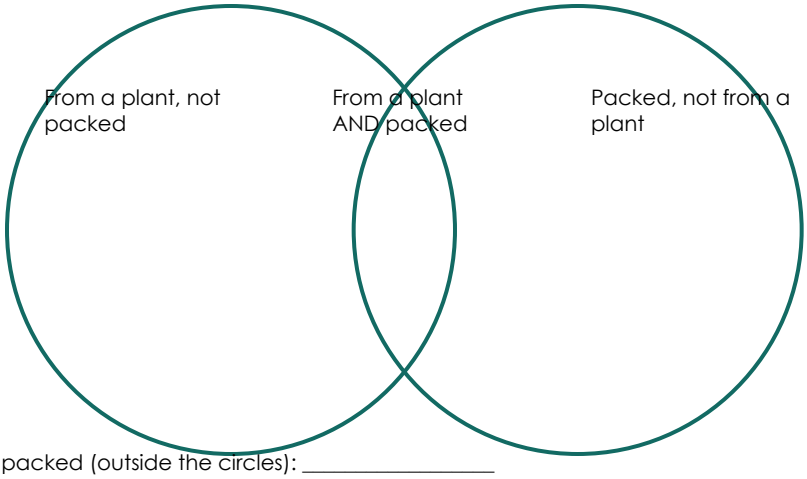

Sort the picture cards

Ontario Math: D1.1 - Sort the pictured objects by both rules using the Venn diagram.

Read each food card. Does the food come from a plant? Is it in a bag, box or carton? Move the card to the right part of the circles.

Carrots grow from plants. These carrots are in a bag too. The bag of carrots goes in the middle.

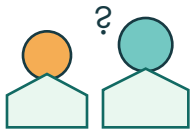

Cards: A - A: loose apple / plant / unpacked; B - B: bag of carrots / plant / packed; C - C: milk carton / animal / packed; D - D: fresh egg / animal / unpacked

Not from a plant and not packed (outside the circles): _____

[ ] I finished this question.

Inspire Math 2: Count the pet votes

One child, one vote

Ontario Math: D1.2 - Count the supplied survey responses and record each group in a frequency table. ·B1.1 - Count the picture cards and represent the number in each requested group.

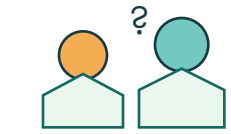

24 children each vote for ONE pet they like. Each card shows one child's vote. Count cats, dogs and fish. Tick Counted on each card. Make tally marks and write each group's total.

Child 1: dog [ ] Counted	Child 2: cat [ ] Counted	Child 3: dog [ ] Counted	Child 4: fish [ ] Counted	Child 5: cat [ ] Counted	Child 6: dog [ ] Counted
Child 7: dog [ ] Counted	Child 8: fish [ ] Counted	Child 9: cat [ ] Counted	Child 10: dog [ ] Counted	Child 11: dog [ ] Counted	Child 12: cat [ ] Counted
Child 13: dog [ ] Counted	Child 14: fish [ ] Counted	Child 15: cat [ ] Counted	Child 16: dog [ ] Counted	Child 17: dog [ ] Counted	Child 18: fish [ ] Counted

Category	Tally marks	Count
Cat		
Dog		
Fish		

[ ] I finished this question.

Inspire Math 3: Make a school activity bar graph

Build the club graph

Ontario Math: D1.3 - Build bars to match the table, using a scale of 2 children per step.

18 children at our school each pick ONE club to join. Count the pictures in each row. Draw a bar on the matching graph row. Each marked step means 2 children.

Club	Count the children
Art club	
Chess club	
Gardening club	

My bar graph

Each step = 2 children

Art club

Chess club

Gardening club

0 2 4 6 8 10

[ ] I finished this question.

Inspire Math 4: Our Grade 3 book vote

Our book vote

Ontario Math: D1.3 - Build the picture graph from the table; use whole circles for 2 children and half circles for 1.

Three Grade 3 classes vote for books to read. Each of the 60 children picks ONE kind of book. Use the table to draw a picture graph. Each circle means 2 children. A half circle means 1 child.

Kind of book	Count the children
Animals	
Space	
Sports	

Books picked for reading time

Source: fictional class data. Each whole circle = 2 children; half circle = 1 child

Animals

Space

Sports

[ ] I finished this question.

Inspire Math 5: New books for the school library

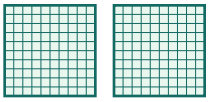

Add the books

Ontario Math: B2.5 - Use the blocks to add 200 and 90.

Our school library has 200 books. It gets 90 new books. How many books does it have now? Use the blocks to help you add.

Books already in the library

Big square = 100; stick = 10; little block = 1

New books

Big square = 100; stick = 10; little block = 1

My number: _____

[ ] I finished this question.

Inspire Math 6: Make trays of apples

Make equal groups

Ontario Math: B2.6 - Build 3 equal groups of 6 objects and count the total.

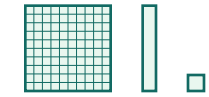

We are putting apples in trays. Look at the picture. There are 3 trays. Each holds 6. Count all the pictures. How many are there altogether?

Tray 1	🍎🍎🍎🍎🍎🍎
Tray 2	🍎🍎🍎🍎🍎🍎
Tray 3	🍎🍎🍎🍎🍎🍎

My number: _____

[ ] I finished this question.

Inspire Math 7: Share the tower blocks equally

Make equal groups

Ontario Math: D1.4 - Redistribute the four tower counts equally to show their mean.

Four children built towers with 1, 3, 5, 7 blocks. Move blocks so all four towers have the SAME number. How many blocks does each tower have now? This equal share is the mean.

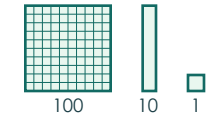

Each counter represents one block. Starting groups: 1, 3, 5, 7

Tower A	Tower B	Tower C	Tower D
Draw your equal group here.	Draw your equal group here.	Draw your equal group here.	Draw your equal group here.

Circle the equal amount in each group: 3 / 4 / 5

[ ] I finished this question.

Inspire Math 8: Read and build with sticks

Read it. Build it!

Ontario Math: B1.1 - Read and build the stated whole numbers using place-value bundles and loose ones. ·B1.5 - Use hundreds, tens and ones to read, build or compare the place-value model.

Read the sticks. Circle the number they show. Then draw bundles and loose sticks to build the number. A bundle marked 10 is one ten. A loose stick is one. A bundle marked 100 is one hundred.

Read the sticks

Hundreds

Tens

Ones

Circle one: 125 / 135 / 136

Build 124 with sticks

Expanded form: _____ + _____ + _____ = _____

[ ] I finished this question.

Inspire Math 9: Library books on a number line

Follow the jumps

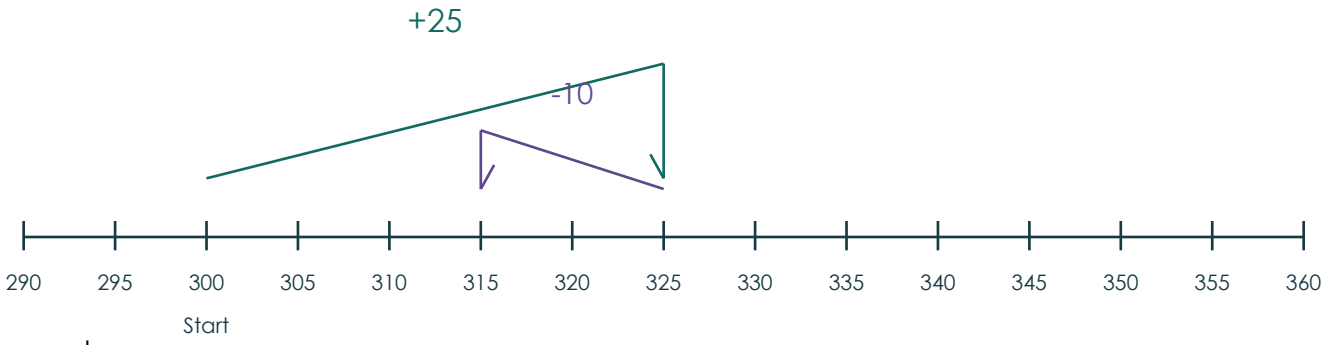

Ontario Math: B2.5 - Follow the forward and backward jumps on the number line to solve the book story.

The school library has 300 books. It gets 25 new books. Children borrow 10 books. How many books are still in the library? Start at 300, jump forward 25, then back 10. Circle where you land.

Start with 300 books

Add 25 books

Borrow 10 books

My number: _____

[ ] I finished this question.

Inspire Math 10: Compare two library shelves

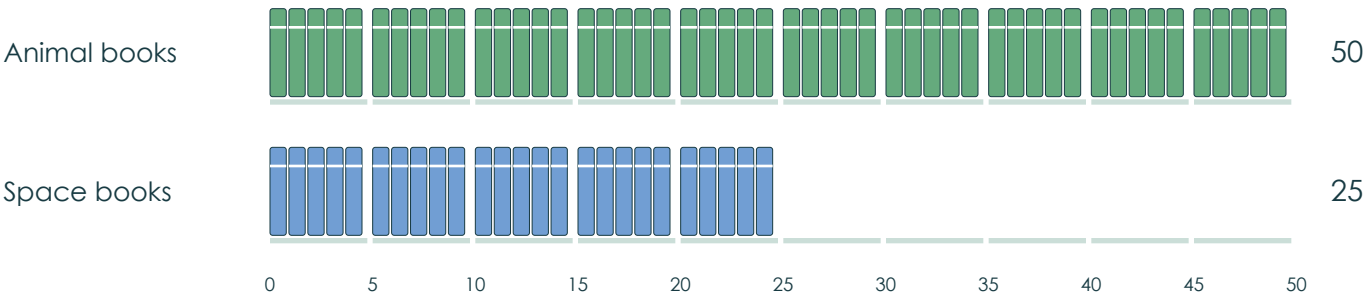

Compare the shelves

Ontario Math: B2.5 - Use the bars to find the difference between 50 and 25.

Our library has 50 animal books and 25 space books. The bars show the books. How many MORE animal books are there? Write your answer below.

Books on two library shelves

Each small book is one book. Each group has 5 books.

My number: _____

[ ] I finished this question.

Math Mall 1

Inspire - Day 2

10 Math questions

Name: _____ Date: _____

This day has its own work. Start here whenever you are ready. Save your online answers when you finish. Your teacher assesses this day separately.

Inspire Math 1: Read two food-label rules

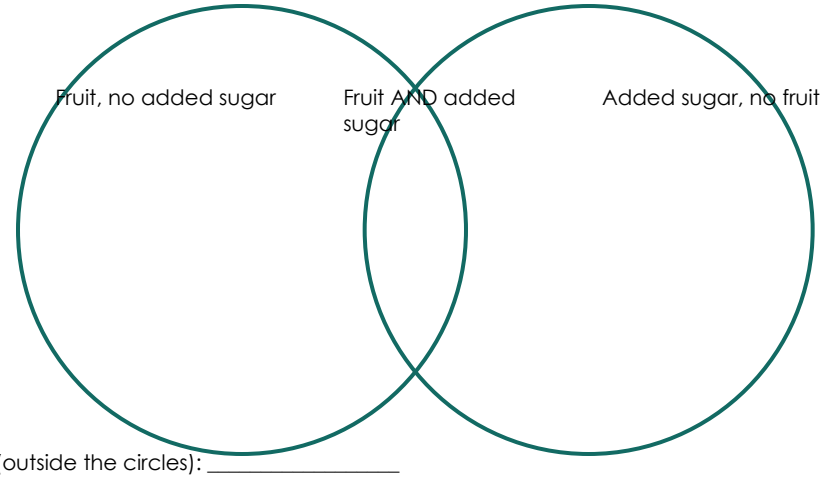

Sort the picture cards

Ontario Math: D1.1 - Sort the pictured objects by both rules using the Venn diagram.

Read what is in each food. Is a fruit listed? Is sugar listed? Move the card to the right part of the circles.

A label with apples AND sugar goes in the middle. Read what is in the food on each card.

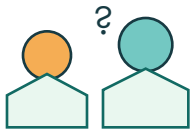

Cards: A - A: apples, water; B - B: apples, water, sugar; C - C: oats, sugar; D - D: beans, water; E - E: berries only; F - F: pears, sugar

No fruit or added sugar (outside the circles): _____

[ ] I finished this question.

Inspire Math 2: Plan a pet survey

Ask a survey question

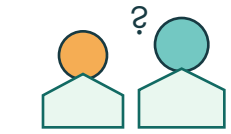

Ontario Math: D1.2 - Choose a survey question that collects both pieces of information named in the task.

We want to find out what pets children have and how many pets they have. Which survey question gives us both answers?

Circle one: What kind of pets do you have, and how many? / What is your favourite colour? / Do you like animals?

[ ] I finished this question.

Inspire Math 3: Make a school activity bar graph

Build the club graph

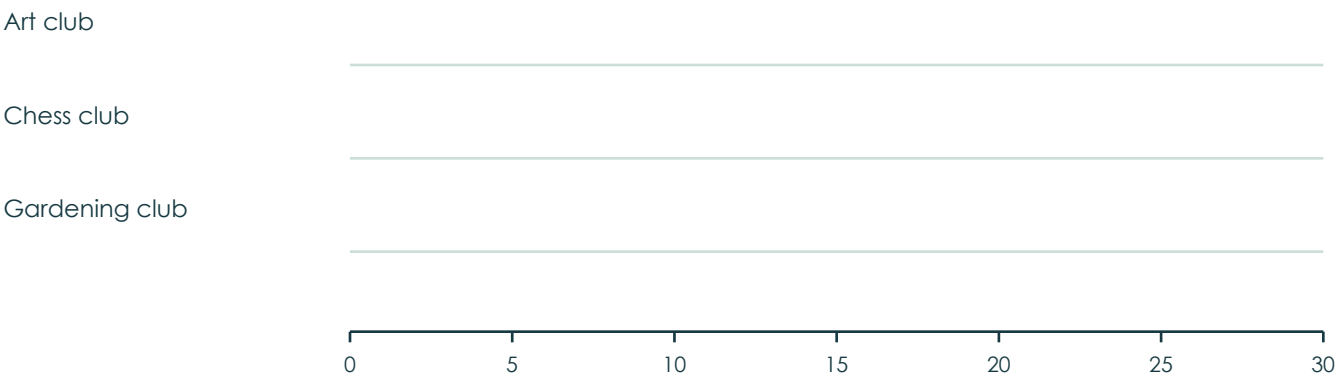

Ontario Math: D1.3 - Build bars to match the table, using a scale of 5 children per step.

60 children at our school each pick ONE club to join. Count the pictures in each row. Draw a bar on the matching graph row. Each marked step means 5 children.

Club	Count the children
Art club	
Chess club	
Gardening club	

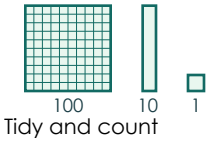

My bar graph

Each step = 5 children

[ ] I finished this question.

Inspire Math 4: Count our sports equipment

Tidy and count

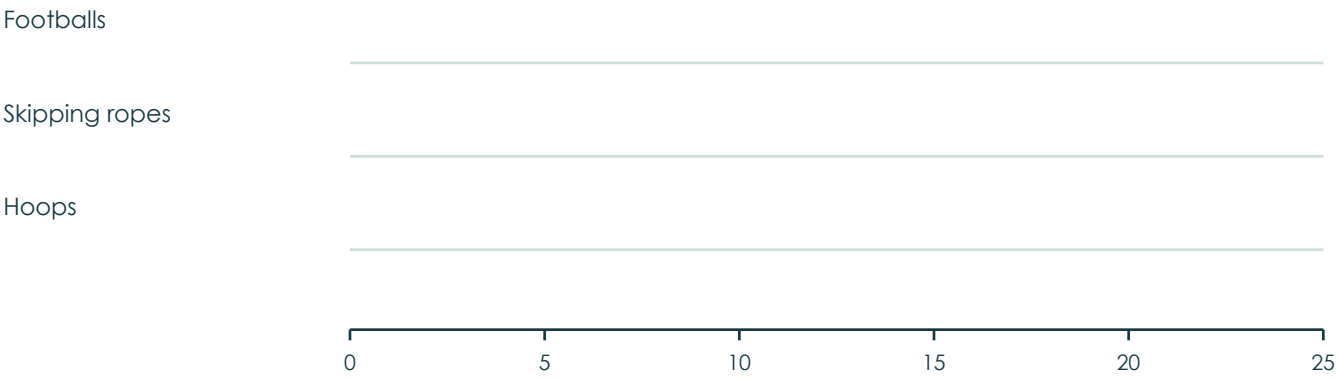

Ontario Math: D1.3 - Build bars to match the table, using a scale of 5 items per step.

We are tidying the sports cupboard. Count the pictures in each row. Draw a bar on the matching graph row. Each marked step means 5 items.

Equipment	Count the items
Footballs	
Skipping ropes	
Hoops	

My bar graph

Each step = 5 items

[ ] I finished this question.

Inspire Math 5: New books for the school library

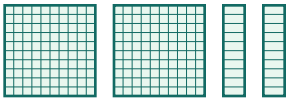

Add the books

Ontario Math: B2.5 - Use the blocks to add 220 and 95.

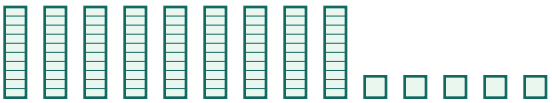

Our school library has 220 books. It gets 95 new books. How many books does it have now? Use the blocks to help you add.

Books already in the library

Big square = 100; stick = 10; little block = 1

New books

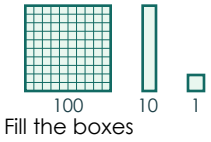

Big square = 100; stick = 10; little block = 1

My number: _____

[ ] I finished this question.

Inspire Math 6: Fill boxes with pencils

Fill the boxes

Ontario Math: B2.6 - Build 4 equal groups of 7 objects and count the total.

We are putting pencils in boxes. Look at the picture. There are 4 boxes. Each holds 7. Count all the pictures. How many are there altogether?

Box 1 

Box 2 

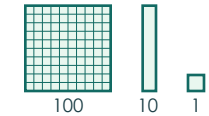

Box 3 

Box 4 

My number: _____

[ ] I finished this question.

Inspire Math 7: Share the tower blocks equally

Make equal groups

Ontario Math: D1.4 - Redistribute the four tower counts equally to show their mean.

Four children built towers with 2, 4, 6, 8 blocks. Move blocks so all four towers have the SAME number. How many blocks does each tower have now? This equal share is the mean.

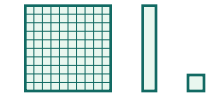

Each counter represents one block. Starting groups: 2, 4, 6, 8

Tower A	Tower B	Tower C	Tower D
Draw your equal group here.	Draw your equal group here.	Draw your equal group here.	Draw your equal group here.

Circle the equal amount in each group: 4 / 6 / 5

[ ] I finished this question.

Inspire Math 8: Read and build with sticks

Read it. Build it!

Ontario Math: B1.1 - Read and build the stated whole numbers using place-value bundles and loose ones. ·B1.5 - Use hundreds, tens and ones to read, build or compare the place-value model.

Read the sticks. Circle the number they show. Then draw bundles and loose sticks to build the number. A bundle marked 10 is one ten. A loose stick is one. A bundle marked 100 is one hundred.

Read the sticks

Hundreds

Tens

Ones

Circle one: 236 / 246 / 247

Inspire - Day 5

10 Math questions

Name: _____ Date: _____

This day has its own work. Start here whenever you are ready. Save your online answers when you finish. Your teacher assesses this day separately.

Inspire Math 1: Food sources and packaging

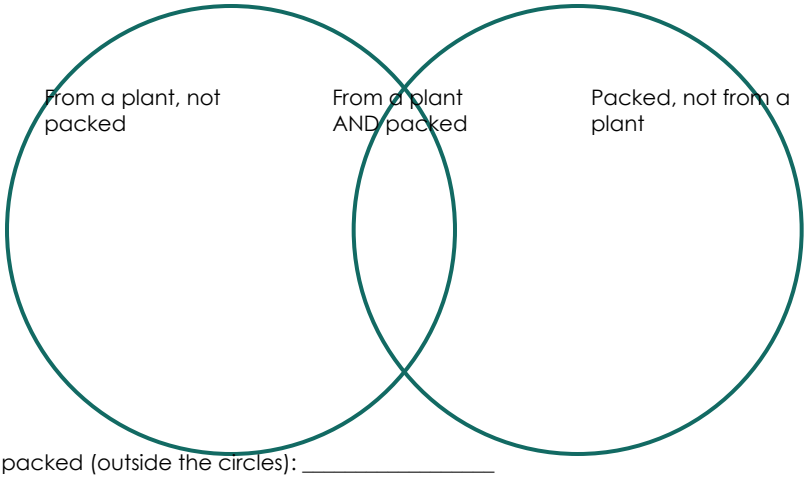

Sort the picture cards

Ontario Math: D1.1 - Sort the pictured objects by both rules using the Venn diagram.

Read each food card. Does the food come from a plant? Is it in a bag, box or carton? Move the card to the right part of the circles.

Carrots grow from plants. These carrots are in a bag too. The bag of carrots goes in the middle.

Cards: A - A: loose apple / plant / unpacked; B - B: bag of carrots / plant / packed; C - C: milk carton / animal / packed; D - D: fresh egg / animal / unpacked

Not from a plant and not packed (outside the circles): _____

[ ] I finished this question.

Inspire Math 2: Share fruit fairly

Make equal groups

Ontario Math: B1.6 - Share 6 equal slices fairly among 4 children, using half-slice counters for fractional shares. · B2.7 - Represent the fair share of 6 slices among 4 children using whole and half-slice amounts.

Four children share 6 equal apple slices. Each counter is HALF of one slice, so there are 12 counters. Move them so every child gets the same amount. How much does each child get?

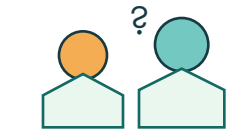

Each counter represents half a slice. Starting groups: 6, 2, 2, 2

Child 1	Child 2	Child 3	Child 4
Draw your equal group here.	Draw your equal group here.	Draw your equal group here.	Draw your equal group here.

Circle the equal amount in each group: 1 slice / 1 and 1/2 slices / 2 slices

Inspire Math 3: Make a school activity bar graph

Build the club graph

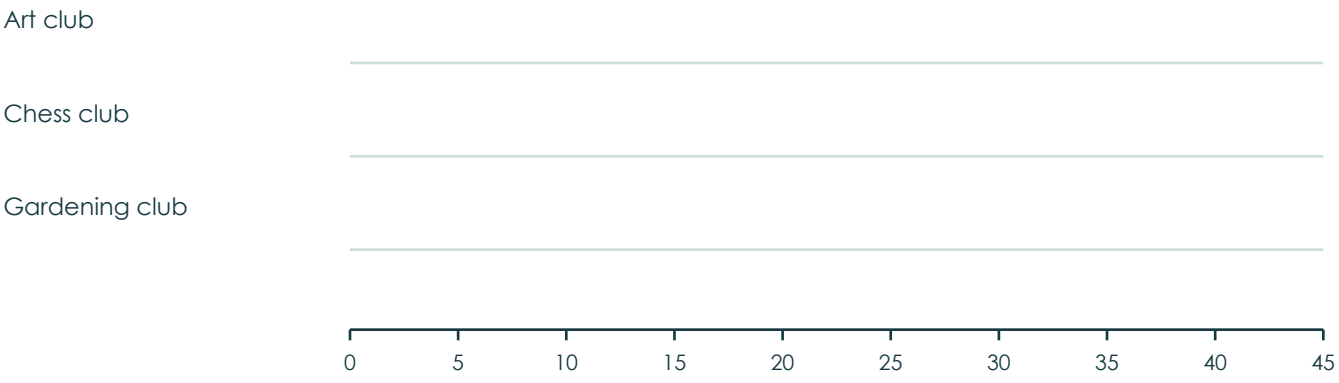

Ontario Math: D1.3 - Build bars to match the table, using a scale of 5 children per step.

105 children at our school each pick ONE club to join. Count the pictures in each row. Draw a bar on the matching graph row. Each marked step means 5 children.

Club	Count the children
Art club	
Chess club	
Gardening club	

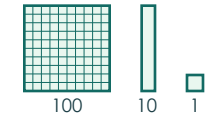

My bar graph

Each step = 5 children

Inspire Math 4: Room at the art club

Find the empty seats

Ontario Math: B2.5 - Use the models to subtract 23 occupied seats from 30 seats.

Art club has 30 seats. 23 children have signed up. How many seats are still free? The blocks show 30 and 23. Use them to help you work it out.

30 seats in the club

Big square = 100; stick = 10; little block = 1

23 children signed up

Big square = 100; stick = 10; little block = 1

Circle one: 6 / 7 / 8

[ ] I finished this question.

Inspire Math 5: New books for the school library

Add the books

Ontario Math: B2.5 - Use the blocks to add 280 and 110.

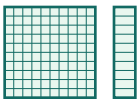

Our school library has 280 books. It gets 110 new books. How many books does it have now? Use the blocks to help you add.

Books already in the library

Big square = 100; stick = 10; little block = 1

New books

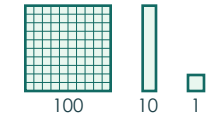

Big square = 100; stick = 10; little block = 1

My number: _____

[ ] I finished this question.

Inspire Math 6: Fill boxes with building blocks

Fill the boxes

Ontario Math: B2.6 - Build 7 equal groups of 10 objects and count the total.

We are putting building blocks in boxes. Look at the picture. There are 7 boxes. Each holds 10. Count all the pictures. How many are there altogether?

Box 1

Box 2

Box 3

Box 4

Box 5

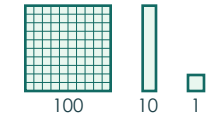

Box 6

Box 7

My number: _____

Inspire Math 7: Share the tower blocks equally

Make equal groups

Ontario Math: D1.4 - Redistribute the four tower counts equally to show their mean.

Four children built towers with 5, 7, 9, 11 blocks. Move blocks so all four towers have the SAME number. How many blocks does each tower have now? This equal share is the mean.

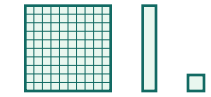

Each counter represents one block. Starting groups: 5, 7, 9, 11

Tower A	Tower B	Tower C	Tower D
Draw your equal group here.	Draw your equal group here.	Draw your equal group here.	Draw your equal group here.

Circle the equal amount in each group: 7 / 8 / 9

[ ] I finished this question.

Inspire Math 8: Read and build with sticks

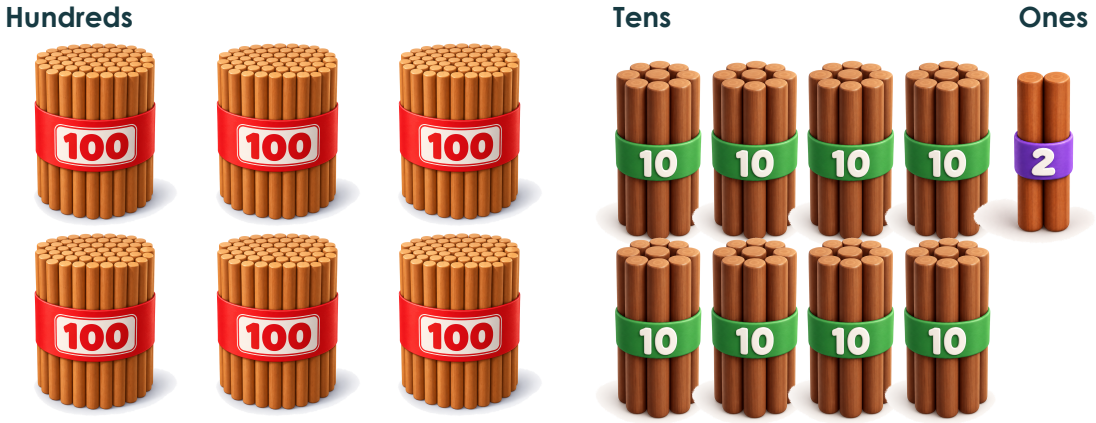

Read it. Build it!

Ontario Math: B1.1 - Read and build the stated whole numbers using place-value bundles and loose ones. ·B1.5 - Use hundreds, tens and ones to read, build or compare the place-value model.

Read the sticks. Circle the number they show. Then draw bundles and loose sticks to build the number. A bundle marked 10 is one ten. A loose stick is one. A bundle marked 100 is one hundred.

Read the sticks

Circle one: 672 / 682 / 683

Build 609 with sticks

Expanded form: _____ + _____ + _____ = _____

[ ] I finished this question.

Inspire Math 9: Library books on a number line

Follow the jumps

Ontario Math: B2.5 - Follow the forward and backward jumps on the number line to solve the book story.

The school library has 700 books. It gets 45 new books. Children borrow 10 books. How many books are still in the library? Start at 700, jump forward 45, then back 10. Circle where you land.

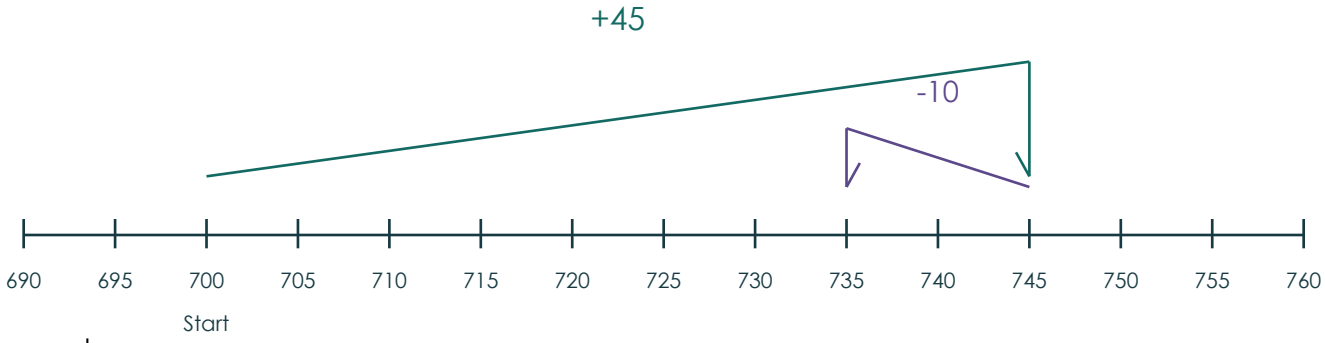

Start with 700 books

Add 45 books

Borrow 10 books

My number: _____

[ ] I finished this question.

Inspire Math 10: Compare two library shelves

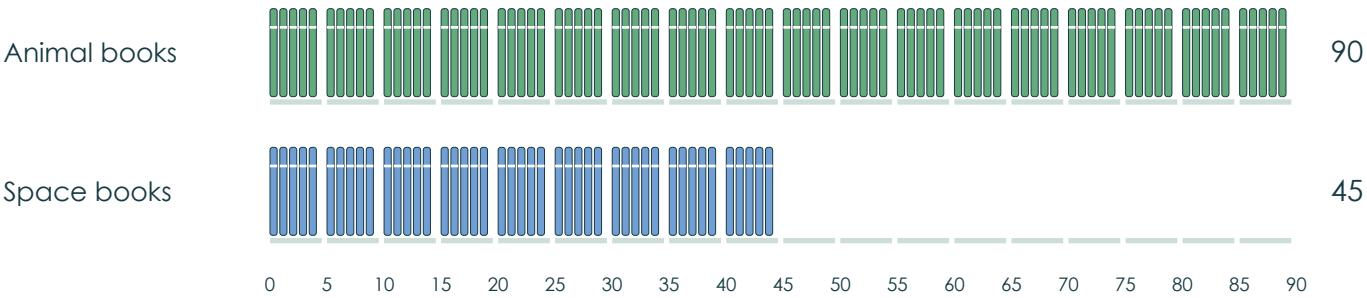

Compare the shelves

Ontario Math: B2.5 - Use the bars to find the difference between 90 and 45.

Our library has 90 animal books and 45 space books. The bars show the books. How many MORE animal books are there? Write your answer below.

Books on two library shelves

Each small book is one book. Each group has 5 books.

My number: _____

[ ] I finished this question.
